

京大対策 自由英作文

解答・解説編

全60題 | 模範解答3例 | 詳細解説・構文・コロケーション
意見・賛否論述／抽象的な問い／比較・選択型

氏名

学校

学年

英語で考えを組み立てるために

受験生へのメッセージ

自由英作文では、難しい語を並べることよりも、自分の立場を明確にし、その理由を読み手が追える順序で示すことが大切です。最初から完璧な英文を書こうとせず、まず主張・理由・具体例・結論を短く設計してください。書いた後には、主語と動詞の対応、単数・複数、冠詞、同じ語の反復を確認しましょう。一本の答案を丁寧に書き直す経験は、何題も急いで解くこと以上に力になります。考えを英語で形にする過程を楽しみながら、少しずつ自分の表現を増やしてください。

京大自由英作文への向き合い方

京都大学の英語では、表面的な語彙力だけでなく、文章の論理を正確に読み、自分の考えを筋道立てて表現する力が問われます。自由英作文でも、極端な断定を避け、条件や例外を意識しながら、限られた語数で論点を整理することが重要です。本書では三つの答案例を比較し、同じ問いに複数の妥当な答え方があることを示します。模範解答を暗記するのではなく、主張の置き方、理由のつながり方、具体例の役割、結論の限定方法を自分の答案へ移してください。

基本手順：①問いの範囲を確認する ②立場を一文で決める ③理由を二つまで選ぶ ④具体例を一つ入れる ⑤結論で主張を限定・再確認する ⑥90-100語に調整する

Q01	大学教育と実用性	意見・賛否論述	6
Q02	知識の価値	抽象的な問い	11
Q03	専門性か幅広さか	比較・選択型	16
Q04	学校でのスマートフォン	意見・賛否論述	21

Q55	安全保障とプライバシー	意見・賛否論述	276
Q56	規則と創造性	抽象的な問い	281
Q57	中央集権か分権か	比較・選択型	286
Q58	大学授業への出席	意見・賛否論述	291
Q59	信頼できる社会	抽象的な問い	296
Q60	深さか幅か	比較・選択型	301

OPINION | 90-100 WORDS

大学教育と実用性

大学教育は、学問的知識よりも実社会で直接役立つ技能を重視すべきだ、という意見について論じなさい。

ANSWER A

中心主張

Universities should give greater weight to practical skills

主な理由

graduates need to connect academic knowledge with unfamiliar real-world problems

ANSWER B

中心主張

Universities should preserve academic inquiry as their central purpose

主な理由

fundamental knowledge enables people to adapt after particular techniques become obsolete

ANSWER C

統合の方向

to combine rigorous academic study with carefully designed opportunities for application

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Universities should give greater weight to practical skills. The main reason is that graduates need to connect academic knowledge with unfamiliar real-world problems. For example, internships can reveal weaknesses in a student's assumptions that classroom tests never expose. Internships therefore expose where theory needs testing, adaptation, and judgment. Admittedly, vocational training can become outdated as industries change. Even so, careful safeguards can preserve the policy's central benefit. The balance may reasonably differ across disciplines and courses, under careful review. For these reasons, the proposal merits cautious adoption with periodic review.

- S1** Universities should give greater weight to practical skills.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that graduates need to connect academic knowledge with unfamiliar real-world problems.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, internships can reveal weaknesses in a student's assumptions that classroom tests never expose.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Internships therefore expose where theory needs testing, adaptation, and judgment.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, vocational training can become outdated as industries change.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Even so, careful safeguards can preserve the policy's central benefit.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The balance may reasonably differ across disciplines and courses, under careful review.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** For these reasons, the proposal merits cautious adoption with periodic review.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

91 words

Universities should preserve academic inquiry as their central purpose. This is mainly because fundamental knowledge enables people to adapt after particular techniques become obsolete. For instance, a student who understands statistics deeply can learn many new analytical tools later. Deep statistical understanding is durable precisely because it transfers across changing tools. Certainly, some courses remain disconnected from students' future needs. Even so, the wider risks still justify caution. The balance may reasonably differ across disciplines and courses. For these reasons, broad reform should remain limited until its unequal costs are addressed.

S1 Universities should preserve academic inquiry as their central purpose.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because fundamental knowledge enables people to adapt after particular techniques become obsolete.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a student who understands statistics deeply can learn many new analytical tools later.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Deep statistical understanding is durable precisely because it transfers across changing tools.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, some courses remain disconnected from students' future needs.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the wider risks still justify caution.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The balance may reasonably differ across disciplines and courses.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 For these reasons, broad reform should remain limited until its unequal costs are addressed.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

90 words

University education works best when rigorous inquiry is joined to purposeful application. First, graduates need to connect academic knowledge with unfamiliar real-world problems. For example, internships can reveal weaknesses in a student's assumptions that classroom tests never expose. However, fundamental knowledge enables people to adapt after particular techniques become obsolete. For instance, a student who understands statistics deeply can learn many new analytical tools later. A sound approach is to combine rigorous academic study with carefully designed opportunities for application. This balance respects real differences among disciplines, courses, and students.

- S1** University education works best when rigorous inquiry is joined to purposeful application.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, graduates need to connect academic knowledge with unfamiliar real-world problems.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, internships can reveal weaknesses in a student's assumptions that classroom tests never expose.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, fundamental knowledge enables people to adapt after particular techniques become obsolete.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, a student who understands statistics deeply can learn many new analytical tools later.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** A sound approach is to combine rigorous academic study with carefully designed opportunities for application.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among disciplines, courses, and students.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

頻出コロケーション

place greater weight on

語を一つずつではなく、この
まとまりで覚える。

acquire transferable skills

関連構文

not necessarily + 動詞／形容詞：部分否定。「必ずしも～ではない」。

Admittedly, A. Even so, B.：譲歩してから主張を立て直す。

rather than + 名詞／-ing：対比する要素の形をそろえる。

when / where / if + 節：結論の適用条件を限定し、過度の断定を避ける。

よくある減点表現

× I think A is good because it is good for people.

○ A can improve ... because it enables people to ...

理由を抽象語の反復で済ませず、作用の過程を書く。

× There are many merits and demerits.

○ One advantage is that ...; however, ...

merit/demerit の羅列より、評価軸を明示する。

× We can solve this problem perfectly.

○ This approach may reduce the problem if ...

社会的・抽象的な問題では断定の強さを調整する。

25点の採点基準

項目	見る点
内容・論理 10	問いに答え、理由と具体例が主張を支えているか。
構成 5	主張→理由→例→結論が自然につながるか。
文法 5	主語・動詞、時制、冠詞、単複、修飾関係が正確か。
語彙・表現 3	文脈に合う動詞・連語を用い、不必要な反復を避けたか。
自然さ 2	英語として読みやすく、極端な直訳がないか。

自己添削：最初と最後の文だけを読んで主張が一致しているか、各文の先頭を追って論理の流れが見えるか、具体例が理由の説明になっているかを確認する。

ABSTRACT | 90-100 WORDS

知識の価値

知識は、どのようなときに価値を持つと言えるか。あなたの考えを述べなさい。

ANSWER A

中心主張

Knowledge becomes valuable when it changes how people think or act

主な理由

information matters only when it helps us judge situations more accurately

ANSWER B

中心主張

Knowledge has value even when it has no immediate practical use

主な理由

apparently useless ideas can deepen curiosity and later lead to unexpected discoveries

ANSWER C

統合の方向

to judge knowledge by both its power to transform understanding and the purposes for which it is used

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Knowledge becomes valuable when it changes how people think or act. The main reason is that information matters only when it helps us judge situations more accurately. For example, understanding probability can prevent people from being misled by dramatic but rare events. Probability becomes valuable here by improving judgment rather than merely enlarging memory. Admittedly, useful knowledge may still be used for harmful purposes. Even so, the proposed distinction remains useful, while keeping relevant counterexamples clearly in view. For these reasons, this definition remains persuasive without claiming to be exhaustive.

- S1** Knowledge becomes valuable when it changes how people think or act.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that information matters only when it helps us judge situations more accurately.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, understanding probability can prevent people from being misled by dramatic but rare events.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Probability becomes valuable here by improving judgment rather than merely enlarging memory.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, useful knowledge may still be used for harmful purposes.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Even so, the proposed distinction remains useful, while keeping relevant counterexamples clearly in view.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** For these reasons, this definition remains persuasive without claiming to be exhaustive.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

99 words

Knowledge has value even when it has no immediate practical use. This is mainly because apparently useless ideas can deepen curiosity and later lead to unexpected discoveries. For instance, number theory was studied for centuries before becoming essential to digital security. Number theory shows that usefulness may emerge long after knowledge is first pursued. Certainly, society cannot support every field without considering priorities. Even so, the first definition remains incomplete. The criteria should be explicit and applied consistently across fields of inquiry and periods of time. The concept must include this second dimension rather than collapse into one rule.

S1 Knowledge has value even when it has no immediate practical use.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because apparently useless ideas can deepen curiosity and later lead to unexpected discoveries.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, number theory was studied for centuries before becoming essential to digital security.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Number theory shows that usefulness may emerge long after knowledge is first pursued.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, society cannot support every field without considering priorities.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the first definition remains incomplete.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across fields of inquiry and periods of time.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 The concept must include this second dimension rather than collapse into one rule.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

91 words

Knowledge should be judged by both its power to deepen understanding and its eventual uses. First, information matters only when it helps us judge situations more accurately. For example, understanding probability can prevent people from being misled by dramatic but rare events. However, apparently useless ideas can deepen curiosity and later lead to unexpected discoveries. For instance, number theory was studied for centuries before becoming essential to digital security. A workable balance is to judge knowledge by both its power to transform understanding and the purposes for which it is used.

- S1** Knowledge should be judged by both its power to deepen understanding and its eventual uses.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, information matters only when it helps us judge situations more accurately.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, understanding probability can prevent people from being misled by dramatic but rare events.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, apparently useless ideas can deepen curiosity and later lead to unexpected discoveries.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, number theory was studied for centuries before becoming essential to digital security.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** A workable balance is to judge knowledge by both its power to transform understanding and the purposes for which it is used.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

専門性か幅広さか

一つの分野を深く学ぶことと、多くの分野を幅広く学ぶことのどちらが重要だと思うか。

ANSWER A

中心主張

Studying one field deeply is generally more valuable than covering many fields superficially

主な理由

depth teaches learners how evidence, methods, and disagreements operate within a discipline

ANSWER B

中心主張

A broad education is more important in a rapidly changing world

主な理由

major problems rarely fit within the boundaries of a single academic discipline

ANSWER C

統合の方向

to build a firm specialty first and deliberately connect it with neighboring fields

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

100 words

Studying one field deeply is generally more valuable than covering many fields superficially. The main reason is that depth teaches learners how evidence, methods, and disagreements operate within a discipline. For example, a serious study of biology shows why attractive explanations may fail experimental tests. Biology illustrates how depth trains students to challenge plausible claims with disciplined evidence. Admittedly, specialists may overlook connections beyond their field. Even so, the first approach remains the sounder default. The choice should remain open to revision as circumstances change. For these reasons, the first option should remain the default while deliberate exceptions stay possible.

- S1** Studying one field deeply is generally more valuable than covering many fields superficially.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that depth teaches learners how evidence, methods, and disagreements operate within a discipline.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, a serious study of biology shows why attractive explanations may fail experimental tests.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Biology illustrates how depth trains students to challenge plausible claims with disciplined evidence.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, specialists may overlook connections beyond their field.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Even so, the first approach remains the sounder default.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The choice should remain open to revision as circumstances change.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** For these reasons, the first option should remain the default while deliberate exceptions stay possible.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

98 words

A broad education is more important in a rapidly changing world. This is mainly because major problems rarely fit within the boundaries of a single academic discipline. For instance, climate policy requires scientific, economic, political, and ethical understanding. Climate policy shows why breadth is needed when facts, incentives, and values interact. Certainly, breadth can become shallow if students never master any method. Even so, the second approach remains the sounder default. The criteria should be explicit and applied consistently across subjects and stages of education. The second option should lead, with the first retained where it adds value.

- | | |
|----|--|
| S1 | A broad education is more important in a rapidly changing world.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。 |
| S2 | This is mainly because major problems rarely fit within the boundaries of a single academic discipline.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。 |

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。 |
| S4 | Climate policy shows why breadth is needed when facts, incentives, and values interact.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。 |
| S5 | Certainly, breadth can become shallow if students never master any method.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。 |
| S6 | Even so, the second approach remains the sounder default.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。 |
| S7 | The criteria should be explicit and applied consistently across subjects and stages of education.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。 |
| S8 | The second option should lead, with the first retained where it adds value.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

94 words

A strong education needs a disciplinary center as well as contact with other fields. First, depth teaches learners how evidence, methods, and disagreements operate within a discipline. For example, a serious study of biology shows why attractive explanations may fail experimental tests. However, major problems rarely fit within the boundaries of a single academic discipline. For instance, climate policy requires scientific, economic, political, and ethical understanding. The better synthesis is to build a firm specialty first and deliberately connect it with neighboring fields. This balance respects real differences among subjects and stages of education.

S1 A strong education needs a disciplinary center as well as contact with other fields.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, depth teaches learners how evidence, methods, and disagreements operate within a discipline.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a serious study of biology shows why attractive explanations may fail experimental tests.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, major problems rarely fit within the boundaries of a single academic discipline.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, climate policy requires scientific, economic, political, and ethical understanding.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 The better synthesis is to build a firm specialty first and deliberately connect it with neighboring fields.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among subjects and stages of education.

射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

学校でのスマートフォン

学校は授業中のスマートフォン使用を全面的に禁止すべきだ、という意見について論じなさい。

ANSWER A

中心主張

Schools should prohibit students from using smartphones during ordinary lessons

主な理由

constant notifications divide attention and make sustained thought more difficult

ANSWER B

中心主張

A complete ban on smartphones at school would be too rigid

主な理由

students need to learn responsible use rather than depend on rules that remove every temptation

ANSWER C

統合の方向

to keep phones out of routine individual use while permitting clearly supervised educational uses

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Schools should prohibit students from using smartphones during ordinary lessons. The main reason is that constant notifications divide attention and make sustained thought more difficult. For example, even a silent phone on a desk can tempt students to check messages instead of following an explanation. The temptation itself fragments attention, even when the device remains silent. Admittedly, phones can support research and accessibility when teachers use them deliberately. Still, careful safeguards can preserve the policy's central benefit, as evidence develops. On balance, the proposal merits cautious adoption with periodic review.

S1 Schools should prohibit students from using smartphones during ordinary lessons.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that constant notifications divide attention and make sustained thought more difficult.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, even a silent phone on a desk can tempt students to check messages instead of following an explanation.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The temptation itself fragments attention, even when the device remains silent.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, phones can support research and accessibility when teachers use them deliberately.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, careful safeguards can preserve the policy's central benefit, as evidence develops.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 On balance, the proposal merits cautious adoption with periodic review.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

97 words

A complete ban on smartphones at school would be too rigid. This is mainly because students need to learn responsible use rather than depend on rules that remove every temptation. For instance, a teacher can use phones for quick surveys, dictionaries, or emergency communication. Used deliberately, the same device can become a tool rather than a distraction. Certainly, unequal devices and entertainment apps can disrupt lessons. Still, the wider risks still justify caution. Conditions differ across ages and lessons, so uniform rules may fail. On balance, broad reform should remain limited until its unequal costs are addressed.

S1 A complete ban on smartphones at school would be too rigid.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because students need to learn responsible use rather than depend on rules that remove every temptation.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a teacher can use phones for quick surveys, dictionaries, or emergency communication.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Used deliberately, the same device can become a tool rather than a distraction.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, unequal devices and entertainment apps can disrupt lessons.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the wider risks still justify caution.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Conditions differ across ages and lessons, so uniform rules may fail.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, broad reform should remain limited until its unequal costs are addressed.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

91 words

Smartphones belong in lessons only when a teacher assigns a clear educational purpose. First, constant notifications divide attention and make sustained thought more difficult. For example, even a silent phone on a desk can tempt students to check messages instead of following an explanation. However, students need to learn responsible use rather than depend on rules that remove every temptation. For instance, a teacher can use phones for quick surveys, dictionaries, or emergency communication. In practice, we should keep phones out of routine individual use while permitting clearly supervised educational uses.

S1 Smartphones belong in lessons only when a teacher assigns a clear educational purpose.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, constant notifications divide attention and make sustained thought more difficult.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, even a silent phone on a desk can tempt students to check messages instead of following an explanation.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, students need to learn responsible use rather than depend on rules that remove every temptation.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a teacher can use phones for quick surveys, dictionaries, or emergency communication.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 In practice, we should keep phones out of routine individual use while permitting clearly supervised educational uses.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

ABSTRACT | 90-100 WORDS

責任のない自由

責任を伴わない自由は、本当の自由と言えるか。

ANSWER A

中心主張

Freedom is incomplete unless people accept responsibility for its consequences

主な理由

our choices affect others and therefore cannot be treated as purely private matters

ANSWER B

中心主張

Freedom should not depend on accepting every consequence imposed by society

主な理由

authorities sometimes label obedience as responsibility in order to restrict legitimate choice

ANSWER C

統合の方向

to understand freedom as protected choice combined with accountability for reasonably foreseeable harm

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Freedom is incomplete unless people accept responsibility for its consequences. The main reason is that our choices affect others and therefore cannot be treated as purely private matters. For example, freedom of expression does not remove the duty to correct deliberate falsehoods. Expression remains free, but its exercise still carries duties toward those affected. Admittedly, excessive emphasis on responsibility can be used to silence unpopular views. Still, the proposed distinction remains useful, while keeping relevant counterexamples clearly in view. On balance, this definition remains persuasive without claiming to be exhaustive.

- S1** Freedom is incomplete unless people accept responsibility for its consequences.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that our choices affect others and therefore cannot be treated as purely private matters.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, freedom of expression does not remove the duty to correct deliberate falsehoods.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Expression remains free, but its exercise still carries duties toward those affected.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, excessive emphasis on responsibility can be used to silence unpopular views.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Still, the proposed distinction remains useful, while keeping relevant counterexamples clearly in view.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** On balance, this definition remains persuasive without claiming to be exhaustive.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

93 words

Freedom should not depend on accepting every consequence imposed by society. This is mainly because authorities sometimes label obedience as responsibility in order to restrict legitimate choice. For instance, a whistle-blower may rightly reject rules designed to conceal wrongdoing. The whistle-blower shows why responsibility cannot simply mean obedience to authority. Certainly, individuals still need to consider foreseeable harm to others. Still, the first definition remains incomplete. The criteria should be explicit and applied consistently across rights and harms. On balance, the concept must include this second dimension rather than collapse into one rule.

S1 Freedom should not depend on accepting every consequence imposed by society.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because authorities sometimes label obedience as responsibility in order to restrict legitimate choice.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a whistle-blower may rightly reject rules designed to conceal wrongdoing.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The whistle-blower shows why responsibility cannot simply mean obedience to authority.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, individuals still need to consider foreseeable harm to others.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the first definition remains incomplete.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across rights and harms.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, the concept must include this second dimension rather than collapse into one rule.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

94 words

Freedom requires accountability for foreseeable harm, but not obedience disguised as responsibility. First, our choices affect others and therefore cannot be treated as purely private matters. For example, freedom of expression does not remove the duty to correct deliberate falsehoods. However, authorities sometimes label obedience as responsibility in order to restrict legitimate choice. For instance, a whistle-blower may rightly reject rules designed to conceal wrongdoing. The strongest policy is to understand freedom as protected choice combined with accountability for reasonably foreseeable harm. This balance respects real differences among rights, harms, and relations of power.

- S1** Freedom requires accountability for foreseeable harm, but not obedience disguised as responsibility.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, our choices affect others and therefore cannot be treated as purely private matters.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, freedom of expression does not remove the duty to correct deliberate falsehoods.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, authorities sometimes label obedience as responsibility in order to restrict legitimate choice.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, a whistle-blower may rightly reject rules designed to conceal wrongdoing.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** The strongest policy is to understand freedom as protected choice combined with accountability for reasonably foreseeable harm.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among rights, harms, and relations of power.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

都市か地方か

若者が暮らす場所として、大都市と地方のどちらが望ましいと思うか。

ANSWER A

中心主張

Large cities offer young people more opportunities to learn and develop

主な理由

dense networks of universities, companies, and cultural institutions make unexpected encounters possible

ANSWER B

中心主張

Smaller communities can provide a healthier environment for young people

主な理由

lower costs, shorter journeys, and closer relationships leave more time for purposeful activity

ANSWER C

統合の方向

to choose according to personal goals while improving mobility and digital access between regions

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

93 words

Large cities offer young people more opportunities to learn and develop. The main reason is that dense networks of universities, companies, and cultural institutions make unexpected encounters possible. For example, a student can attend a public lecture, find an internship, and meet people from different backgrounds in one week. Such density multiplies both the number and variety of opportunities available. Admittedly, high costs and long commutes can reduce quality of life. Still, the first approach remains the sounder default. On balance, the first option should remain the default while deliberate exceptions stay possible.

S1 Large cities offer young people more opportunities to learn and develop.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that dense networks of universities, companies, and cultural institutions make unexpected encounters possible.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a student can attend a public lecture, find an internship, and meet people from different backgrounds in one week.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Such density multiplies both the number and variety of opportunities available.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, high costs and long commutes can reduce quality of life.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the first approach remains the sounder default.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 On balance, the first option should remain the default while deliberate exceptions stay possible.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

91 words

Smaller communities can provide a healthier environment for young people. This is mainly because lower costs, shorter journeys, and closer relationships leave more time for purposeful activity. For instance, a young worker may participate directly in local projects rather than remain anonymous in a huge organization. Closer local participation can give young people responsibility that large systems withhold. Certainly, limited employment and education can force residents to leave. Still, the second approach remains the sounder default. On balance, the second option should lead, with the first retained where it adds value.

S1 Smaller communities can provide a healthier environment for young people.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because lower costs, shorter journeys, and closer relationships leave more time for purposeful activity.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a young worker may participate directly in local projects rather than remain anonymous in a huge organization.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Closer local participation can give young people responsibility that large systems withhold.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, limited employment and education can force residents to leave.

OPINION | 90-100 WORDS

リモートワーク

企業は、可能な限りリモートワークを拡大すべきだ、という意見について論じなさい。

ANSWER A

中心主張

Companies should allow remote work whenever the nature of the job permits it

主な理由

flexibility can reduce commuting time and enable employees to organize focused work more effectively

ANSWER B

中心主張

Companies should be cautious about making remote work the normal arrangement

主な理由

shared physical space supports spontaneous questions, mentorship, and a sense of common purpose

ANSWER C

統合の方向

to use a hybrid system based on the task, the team, and the employee's stage of development

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

95 words

Companies should allow remote work whenever the nature of the job permits it. The main reason is that flexibility can reduce commuting time and enable employees to organize focused work more effectively. For example, a parent may use the time saved from travel for both concentrated work and family responsibilities. The gain is not mere comfort: saved travel time can be used purposefully. Admittedly, new employees can find it harder to learn informally or build trust. Yet careful safeguards can preserve the policy's central benefit. Taken together, the proposal merits cautious adoption with periodic review.

- S1** Companies should allow remote work whenever the nature of the job permits it.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that flexibility can reduce commuting time and enable employees to organize focused work more effectively.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, a parent may use the time saved from travel for both concentrated work and family responsibilities.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** The gain is not mere comfort: saved travel time can be used purposefully.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, new employees can find it harder to learn informally or build trust.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

90 words

Companies should be cautious about making remote work the normal arrangement. This is mainly because shared physical space supports spontaneous questions, mentorship, and a sense of common purpose. For instance, a brief conversation beside a colleague's desk can solve a problem that would require several formal messages. Some knowledge travels through informal contact more efficiently than through scheduled messages. Certainly, daily office attendance can waste time and exclude some workers. Yet the wider risks still justify caution. Taken together, broad reform should remain limited until its unequal costs are addressed.

S1 Companies should be cautious about making remote work the normal arrangement.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because shared physical space supports spontaneous questions, mentorship, and a sense of common purpose.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a brief conversation beside a colleague's desk can solve a problem that would require several formal messages.
具体例。場面・主体・結果を置き、抽象的な理由が現実にごう働くかを示す。

S4 Some knowledge travels through informal contact more efficiently than through scheduled messages.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, daily office attendance can waste time and exclude some workers.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the wider risks still justify caution.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, broad reform should remain limited until its unequal costs are addressed.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

90 words

A hybrid system is attractive because flexibility can reduce commuting time and support focused work, as conditions change. For example, a parent may use the time saved from travel for both concentrated work and family responsibilities. However, shared physical space supports spontaneous questions, mentorship, and a sense of common purpose. For instance, a brief conversation beside a colleague's desk can solve a problem that would require several formal messages. A workable balance is to use a hybrid system based on the task, the team, and the employee's stage of development.

S1 A hybrid system is attractive because flexibility can reduce commuting time and support focused work, as conditions change.

統合方針＋根拠①。冒頭で結論の方向と第一の理由を同時に示す。

S2 For example, a parent may use the time saved from travel for both concentrated work and family responsibilities.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S3 However, shared physical space supports spontaneous questions, mentorship, and a sense of common purpose.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S4 For instance, a brief conversation beside a colleague's desk can solve a problem that would require several formal messages.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S5 A workable balance is to use a hybrid system based on the task, the team, and the employee's stage of development.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

ABSTRACT | 90-100 WORDS

便利さと幸福

生活が便利になることは、必ず人を幸福にするだろうか。

ANSWER A

中心主張

Convenience improves life only when it serves purposes people have consciously chosen

主な理由

saving time is valuable if the saved time is used for rest, relationships, or meaningful work

ANSWER B

中心主張

Convenience itself often contributes directly to well-being

主な理由

reducing physical effort and uncertainty protects people from avoidable stress

ANSWER C

統合の方向

to evaluate convenience by what it enables rather than by the mere amount of effort it removes

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

93 words

Convenience improves life only when it serves purposes people have consciously chosen. The main reason is that saving time is valuable if the saved time is used for rest, relationships, or meaningful work. For example, online banking can remove tedious travel and leave more time for family life. Online banking improves life only if the released time serves something worthwhile. Admittedly, convenient services can create dependence and constant expectations of speed. Yet the proposed distinction remains useful, without making the concept absolute. Taken together, this definition remains persuasive without claiming to be exhaustive.

S1 Convenience improves life only when it serves purposes people have consciously chosen.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that saving time is valuable if the saved time is used for rest, relationships, or meaningful work.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, online banking can remove tedious travel and leave more time for family life.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Online banking improves life only if the released time serves something worthwhile.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, convenient services can create dependence and constant expectations of speed.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the proposed distinction remains useful, without making the concept absolute.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, this definition remains persuasive without claiming to be exhaustive.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

99 words

Convenience itself often contributes directly to well-being. This is mainly because reducing physical effort and uncertainty protects people from avoidable stress. For instance, reliable public transport and household appliances give many people greater independence. These services increase independence even before users decide how to spend saved time. Certainly, comfort alone cannot answer questions about meaning or belonging. Yet the first definition remains incomplete. The balance may reasonably differ across users and needs. The criteria should be explicit and applied consistently across users and needs. Taken together, the concept must include this second dimension rather than collapse into one rule.

- | | |
|----|---|
| S1 | Convenience itself often contributes directly to well-being.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。 |
| S2 | This is mainly because reducing physical effort and uncertainty protects people from avoidable stress.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。 |

| S8 | The criteria should be explicit and applied consistently across users and needs.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。 |
| S9 | Taken together, the concept must include this second dimension rather than collapse into one rule.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

92 words

Convenience should be assessed by the independence and worthwhile activity it enables, under continued review. First, saving time is valuable if the saved time is used for rest, relationships, or meaningful work. For example, online banking can remove tedious travel and leave more time for family life. However, reducing physical effort and uncertainty protects people from avoidable stress. For instance, reliable public transport and household appliances give many people greater independence. The better synthesis is to evaluate convenience by what it enables rather than by the mere amount of effort it removes.

- S1** Convenience should be assessed by the independence and worthwhile activity it enables, under continued review.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, saving time is valuable if the saved time is used for rest, relationships, or meaningful work.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, online banking can remove tedious travel and leave more time for family life.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, reducing physical effort and uncertainty protects people from avoidable stress.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, reliable public transport and household appliances give many people greater independence.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** The better synthesis is to evaluate convenience by what it enables rather than by the mere amount of effort it removes.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

一人で学ぶか共同で学ぶか

一人で学ぶことと、他者と協力して学ぶことのどちらが効果的だと思うか。

ANSWER A

中心主張

Independent study is the foundation of serious learning

主な理由

learners need uninterrupted time to identify exactly what they do not understand

ANSWER B

中心主張

Collaborative learning is more effective for most difficult subjects

主な理由

explaining an idea to another person exposes gaps and introduces alternative approaches

ANSWER C

統合の方向

to study independently first and then use discussion to test and refine one's understanding

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

97 words

Independent study is the foundation of serious learning. The main reason is that learners need uninterrupted time to identify exactly what they do not understand. For example, solving a difficult problem alone forces a student to test every step instead of following a confident classmate. Working alone reveals whether understanding is genuine or merely borrowed from others. Admittedly, working alone can preserve unnoticed misunderstandings. Yet the first approach remains the sounder default. Conditions differ across learners and subjects, so uniform rules may fail. Taken together, the first option should remain the default while deliberate exceptions stay possible.

| S7 | Conditions differ across learners and subjects, so uniform rules may fail.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。 |
| S8 | Taken together, the first option should remain the default while deliberate exceptions stay possible.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

97 words

Collaborative learning is more effective for most difficult subjects. This is mainly because explaining an idea to another person exposes gaps and introduces alternative approaches. For instance, a group comparing solutions may discover that several methods reach the same answer. Comparison makes hidden gaps visible and turns disagreement into a learning resource. Certainly, unequal participation can allow some members to avoid thinking. Yet the second approach remains the sounder default. The criteria should be explicit and applied consistently across learners and subjects. Taken together, the second option should lead, with the first retained where it adds value.

S1 Collaborative learning is more effective for most difficult subjects.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because explaining an idea to another person exposes gaps and introduces alternative approaches.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a group comparing solutions may discover that several methods reach the same answer.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Comparison makes hidden gaps visible and turns disagreement into a learning resource.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, unequal participation can allow some members to avoid thinking.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the second approach remains the sounder default.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across learners and subjects.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Taken together, the second option should lead, with the first retained where it adds value.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

91 words

Serious learning alternates between private effort and discussion with others, as conditions change. First, learners need uninterrupted time to identify exactly what they do not understand. For example, solving a difficult problem alone forces a student to test every step instead of following a confident classmate. However, explaining an idea to another person exposes gaps and introduces alternative approaches. For instance, a group comparing solutions may discover that several methods reach the same answer. In practice, we should study independently first and then use discussion to test and refine one's understanding.

- S1** Serious learning alternates between private effort and discussion with others, as conditions change.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, learners need uninterrupted time to identify exactly what they do not understand.

OPINION | 90-100 WORDS

都市の自動車規制

大都市は中心部への自家用車の乗り入れを厳しく制限すべきだ、という意見について論じなさい。

ANSWER A

中心主張

Major cities should restrict private cars in their central districts

主な理由

limited road space should be used in ways that move more people with less pollution

ANSWER B

中心主張

Strict limits on private cars may create unfair costs

主な理由

public transport does not serve every neighborhood, job, or physical need equally

ANSWER C

統合の方向

to introduce restrictions gradually while expanding reliable transport and granting narrowly defined exemptions

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Major cities should restrict private cars in their central districts. The main reason is that limited road space should be used in ways that move more people with less pollution. For example, bus lanes and safe cycling routes can transport many residents while improving public space. Reallocating road space can improve mobility rather than simply punish drivers. Admittedly, restrictions can burden disabled people and workers with unusual schedules. Despite that, careful safeguards can preserve the policy's central benefit, as evidence develops. Overall, the proposal merits cautious adoption with periodic review.

S1

Major cities should restrict private cars in their central districts.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2

The main reason is that limited road space should be used in ways that move more people with less pollution.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3

For example, bus lanes and safe cycling routes can transport many residents while improving public space.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4

Reallocating road space can improve mobility rather than simply punish drivers.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5

Admittedly, restrictions can burden disabled people and workers with unusual schedules.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6

Despite that, careful safeguards can preserve the policy's central benefit, as evidence develops.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7

Overall, the proposal merits cautious adoption with periodic review.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

92 words

Strict limits on private cars may create unfair costs. This is mainly because public transport does not serve every neighborhood, job, or physical need equally. For instance, a hospital worker finishing after midnight may have no realistic alternative to driving. The hospital worker shows that transport restrictions impose unequal burdens without alternatives. Certainly, unregulated traffic imposes serious costs on everyone. Despite that, the wider risks still justify caution. The criteria should be explicit and applied consistently across neighborhoods and workers. Overall, broad reform should remain limited until its unequal costs are addressed.

- S1** Strict limits on private cars may create unfair costs.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because public transport does not serve every neighborhood, job, or physical need equally.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, a hospital worker finishing after midnight may have no realistic alternative to driving.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** The hospital worker shows that transport restrictions impose unequal burdens without alternatives.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Certainly, unregulated traffic imposes serious costs on everyone.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Despite that, the wider risks still justify caution.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across neighborhoods and workers.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Overall, broad reform should remain limited until its unequal costs are addressed.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

98 words

Car restrictions are defensible only when cities provide reliable alternatives and necessary exemptions. First, limited road space should be used in ways that move more people with less pollution. For example, bus lanes and safe cycling routes can transport many residents while improving public space. However, public transport does not serve every neighborhood, job, or physical need equally. For instance, a hospital worker finishing after midnight may have no realistic alternative to driving. We should introduce restrictions gradually while expanding reliable transport and granting narrowly defined exemptions. This balance respects real differences among neighborhoods, workers, and mobility needs.

S1 Car restrictions are defensible only when cities provide reliable alternatives and necessary exemptions.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, limited road space should be used in ways that move more people with less pollution.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, bus lanes and safe cycling routes can transport many residents while improving public space.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, public transport does not serve every neighborhood, job, or physical need equally.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a hospital worker finishing after midnight may have no realistic alternative to driving.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 We should introduce restrictions gradually while expanding reliable transport and granting narrowly defined exemptions.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among neighborhoods, workers, and mobility needs.

射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

ABSTRACT | 90-100 WORDS

失敗の評価

ある試みが失敗だったかどうかは、結果だけで判断できるだろうか。

ANSWER A

中心主張

An attempt should not be judged solely by its immediate result

主な理由

a careful process can produce knowledge that improves later decisions even when the original goal is missed

ANSWER B

中心主張

Results must remain central when we evaluate success and failure

主な理由

good intentions and interesting lessons do not replace the achievement of necessary goals

ANSWER C

統合の方向

to assess both the importance of the outcome and the quality and learning value of the process

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

93 words

An attempt should not be judged solely by its immediate result. The main reason is that a careful process can produce knowledge that improves later decisions even when the original goal is missed. For example, a failed experiment may reveal that a widely accepted assumption was false. The experiment fails as a result but succeeds in correcting future inquiry. Admittedly, repeated poor results can indicate that the method itself needs revision. Despite that, the proposed distinction remains useful, without making the concept absolute. Overall, this definition remains persuasive without claiming to be exhaustive.

- S7** Overall, this definition remains persuasive without claiming to be exhaustive.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

93 words

Results must remain central when we evaluate success and failure. This is mainly because good intentions and interesting lessons do not replace the achievement of necessary goals. For instance, a medical program that teaches researchers much but fails patients cannot be called successful. Learning from failure matters, yet it cannot substitute for protecting patients. Certainly, short-term outcomes may conceal benefits that appear later. Despite that, the first definition remains incomplete. The balance may reasonably differ across goals and processes. Overall, the concept must include this second dimension rather than collapse into one rule.

S1

Results must remain central when we evaluate success and failure.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2

This is mainly because good intentions and interesting lessons do not replace the achievement of necessary goals.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3

For instance, a medical program that teaches researchers much but fails patients cannot be called successful.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4

Learning from failure matters, yet it cannot substitute for protecting patients.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5

Certainly, short-term outcomes may conceal benefits that appear later.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6

Despite that, the first definition remains incomplete.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7

The balance may reasonably differ across goals and processes.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8

Overall, the concept must include this second dimension rather than collapse into one rule.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

95 words

Success should reflect both the result and what a sound process teaches. First, a careful process can produce knowledge that improves later decisions even when the original goal is missed. For example, a failed experiment may reveal that a widely accepted assumption was false. However, good intentions and interesting lessons do not replace the achievement of necessary goals. For instance, a medical program that teaches researchers much but fails patients cannot be called successful. A sound approach is to assess both the importance of the outcome and the quality and learning value of the process.

S1 Success should reflect both the result and what a sound process teaches.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, a careful process can produce knowledge that improves later decisions even when the original goal is missed.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a failed experiment may reveal that a widely accepted assumption was false.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, good intentions and interesting lessons do not replace the achievement of necessary goals.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a medical program that teaches researchers much but fails patients cannot be called successful.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 A sound approach is to assess both the importance of the outcome and the quality and learning value of the process.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

伝統の保存か変化か

伝統を守るには、形を変えずに保存することと、時代に合わせて変化させることのどちらが重要か。

ANSWER A

中心主張

Traditions need continuity of form if they are to retain their identity

主な理由

specific practices connect present participants with people who performed them in earlier generations

ANSWER B

中心主張

Traditions survive by adapting to new circumstances

主な理由

change allows people to preserve meaning even when social conditions no longer support the original form

ANSWER C

統合の方向

to protect a clearly identified core while allowing changes that keep the practice socially meaningful

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

97 words

Traditions need continuity of form if they are to retain their identity. The main reason is that specific practices connect present participants with people who performed them in earlier generations. For example, preserving an old festival route can keep local history physically visible. The route gives continuity a visible form that participants can repeatedly experience. Admittedly, unchanged forms may become detached from contemporary life. Despite that, the first approach remains the sounder default. Conditions differ across communities and generations, so uniform rules may fail. Overall, the first option should remain the default while deliberate exceptions stay possible.

S1 Traditions need continuity of form if they are to retain their identity.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that specific practices connect present participants with people who performed them in earlier generations.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, preserving an old festival route can keep local history physically visible.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The route gives continuity a visible form that participants can repeatedly experience.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, unchanged forms may become detached from contemporary life.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the first approach remains the sounder default.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Conditions differ across communities and generations, so uniform rules may fail.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Overall, the first option should remain the default while deliberate exceptions stay possible.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

97 words

Traditions survive by adapting to new circumstances. This is mainly because change allows people to preserve meaning even when social conditions no longer support the original form. For instance, a ceremony can include new participants without abandoning its central values. Adaptation preserves the ceremony's meaning by widening participation without erasing its core. Certainly, too much adaptation can turn tradition into mere entertainment. Despite that, the second approach remains the sounder default. The criteria should be explicit and applied consistently across communities and generations. Overall, the second option should lead, with the first retained where it adds value.

S1 Traditions survive by adapting to new circumstances.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because change allows people to preserve meaning even when social conditions no longer support the original form.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a ceremony can include new participants without abandoning its central values.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Adaptation preserves the ceremony's meaning by widening participation without erasing its core.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, too much adaptation can turn tradition into mere entertainment.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the second approach remains the sounder default.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across communities and generations.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Overall, the second option should lead, with the first retained where it adds value.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

99 words

A living tradition protects an identifiable core while adapting forms that no longer serve it. First, specific practices connect present participants with people who performed them in earlier generations. For example, preserving an old festival route can keep local history physically visible. However, change allows people to preserve meaning even when social conditions no longer support the original form. For instance, a ceremony can include new participants without abandoning its central values. We should protect a clearly identified core while allowing changes that keep the practice socially meaningful. This balance respects real differences among communities, generations, and social conditions.

S1 A living tradition protects an identifiable core while adapting forms that no longer serve it.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, specific practices connect present participants with people who performed them in earlier generations.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, preserving an old festival route can keep local history physically visible.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, change allows people to preserve meaning even when social conditions no longer support the original form.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a ceremony can include new participants without abandoning its central values.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 We should protect a clearly identified core while allowing changes that keep the practice socially meaningful.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among communities, generations, and social conditions.

射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

教育におけるAI

学校教育で生成AIを積極的に利用すべきだ、という意見について論じなさい。

ANSWER A

中心主張

Schools should teach students to use generative AI critically and responsibly

主な理由

the technology will influence future study and work whether schools approve of it or not

ANSWER B

中心主張

Schools should limit generative AI until students master basic intellectual skills

主な理由

learners cannot evaluate automated answers without sufficient knowledge of their own

ANSWER C

統合の方向

to require independent work for core skills and supervised AI use for verification, comparison, and revision

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

92 words

Schools should teach students to use generative AI critically and responsibly. The main reason is that the technology will influence future study and work whether schools approve of it or not. For example, students can compare an AI explanation with reliable sources and identify hidden assumptions or errors. Verification turns AI from an answer machine into an object of critical study. Admittedly, easy generation may weaken writing skills if it replaces independent thought. On balance, careful safeguards can preserve the policy's central benefit. Accordingly, the proposal merits cautious adoption with periodic review.

S1 Schools should teach students to use generative AI critically and responsibly.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that the technology will influence future study and work whether schools approve of it or not.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, students can compare an AI explanation with reliable sources and identify hidden assumptions or errors.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Verification turns AI from an answer machine into an object of critical study.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, easy generation may weaken writing skills if it replaces independent thought.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, careful safeguards can preserve the policy's central benefit.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Accordingly, the proposal merits cautious adoption with periodic review.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

99 words

Schools should limit generative AI until students master basic intellectual skills. This is mainly because learners cannot evaluate automated answers without sufficient knowledge of their own. For instance, a student who has never constructed an argument may accept fluent but empty prose as convincing. Fluent output is dangerous when students lack the knowledge needed to question it. Certainly, complete avoidance would leave students unprepared for real-world use. On balance, the wider risks still justify caution. Practical effects on subjects and ages matter as much as the principle. Accordingly, broad reform should remain limited until its unequal costs are addressed.

S1 Schools should limit generative AI until students master basic intellectual skills.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because learners cannot evaluate automated answers without sufficient knowledge of their own.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a student who has never constructed an argument may accept fluent but empty prose as convincing.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Fluent output is dangerous when students lack the knowledge needed to question it.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, complete avoidance would leave students unprepared for real-world use.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the wider risks still justify caution.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Practical effects on subjects and ages matter as much as the principle.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Accordingly, broad reform should remain limited until its unequal costs are addressed.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

95 words

Schools should secure independent foundations before using AI for checking and revision. First, the technology will influence future study and work whether schools approve of it or not. For example, students can compare an AI explanation with reliable sources and identify hidden assumptions or errors. However, learners cannot evaluate automated answers without sufficient knowledge of their own. For instance, a student who has never constructed an argument may accept fluent but empty prose as convincing. The better synthesis is to require independent work for core skills and supervised AI use for verification, comparison, and revision.

ABSTRACT | 90-100 WORDS

客観性

人間は完全に客観的になることができるだろうか。

ANSWER A

中心主張

Complete objectivity is probably impossible for human beings

主な理由

attention and interpretation are always influenced by language, experience, and prior expectations

ANSWER B

中心主張

People can achieve a meaningful degree of objectivity through disciplined methods

主な理由

shared procedures allow claims to be tested beyond the perspective of one observer

ANSWER C

統合の方向

to treat objectivity as a continuing practice of testing and correction rather than a perfect mental state

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Complete objectivity is probably impossible for human beings. The main reason is that attention and interpretation are always influenced by language, experience, and prior expectations. For example, two honest witnesses can notice different details in the same event. The witnesses show that honest observation is still selective rather than neutral. Admittedly, admitting bias does not mean that every judgment is equally unreliable. On balance, the proposed distinction remains useful, without making the concept absolute. For a durable judgment, effects that emerge slowly deserve review. Accordingly, this definition remains persuasive without claiming to be exhaustive.

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

91 words

People can achieve a meaningful degree of objectivity through disciplined methods. This is mainly because shared procedures allow claims to be tested beyond the perspective of one observer. For instance, scientists publish methods so that others can repeat experiments and challenge conclusions. Replicable methods reduce personal bias by making conclusions open to public challenge. Certainly, institutions themselves can preserve unnoticed assumptions. On balance, the first definition remains incomplete. The balance may reasonably differ across observers and methods. Accordingly, the concept must include this second dimension rather than collapse into one rule.

- S1** People can achieve a meaningful degree of objectivity through disciplined methods.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because shared procedures allow claims to be tested beyond the perspective of one observer.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, scientists publish methods so that others can repeat experiments and challenge conclusions.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

COMPARISON | 90-100 WORDS

予防か治療か

限られた公的医療予算は、病気の予防と高度な治療のどちらに優先的に使うべきか。

ANSWER A

中心主張

Public health budgets should give priority to prevention

主な理由

preventing disease can protect more people at lower cost before suffering becomes severe

ANSWER B

中心主張

Advanced treatment deserves priority when patients face immediate and serious harm

主な理由

a society has a duty not to abandon people simply because their care is expensive

ANSWER C

統合の方向

to secure essential treatment while directing additional resources toward proven preventive measures

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

93 words

Public health budgets should give priority to prevention. The main reason is that preventing disease can protect more people at lower cost before suffering becomes severe. For example, vaccination and early screening can reduce both deaths and expensive hospital treatment. Prevention acts before illness becomes both harder to treat and more expensive. Admittedly, some illnesses cannot be prevented and require advanced care. On balance, the first approach remains the sounder default. The balance may reasonably differ across patients and diseases. Accordingly, the first option should remain the default while deliberate exceptions stay possible.

- S1** Public health budgets should give priority to prevention.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that preventing disease can protect more people at lower cost before suffering becomes severe.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, vaccination and early screening can reduce both deaths and expensive hospital treatment.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Prevention acts before illness becomes both harder to treat and more expensive.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, some illnesses cannot be prevented and require advanced care.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** On balance, the first approach remains the sounder default.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The balance may reasonably differ across patients and diseases.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Accordingly, the first option should remain the default while deliberate exceptions stay possible.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

100 words

Advanced treatment deserves priority when patients face immediate and serious harm. This is mainly because a society has a duty not to abandon people simply because their care is expensive. For instance, new cancer therapies may save lives and later become cheaper through wider use. Immediate patients cannot be sacrificed solely for benefits that may appear later. Certainly, treatment-focused systems may neglect avoidable causes of illness. On balance, the second approach remains the sounder default. A fuller assessment shows that effects that emerge slowly deserve review. Accordingly, the second option should lead, with the first retained where it adds value.

S1 Advanced treatment deserves priority when patients face immediate and serious harm.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because a society has a duty not to abandon people simply because their care is expensive.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, new cancer therapies may save lives and later become cheaper through wider use.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Immediate patients cannot be sacrificed solely for benefits that may appear later.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, treatment-focused systems may neglect avoidable causes of illness.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the second approach remains the sounder default.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 A fuller assessment shows that effects that emerge slowly deserve review.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Accordingly, the second option should lead, with the first retained where it adds value.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

98 words

Health systems should guarantee essential treatment while investing more in effective prevention. First, preventing disease can protect more people at lower cost before suffering becomes severe. For example, vaccination and early screening can reduce both deaths and expensive hospital treatment. However, a society has a duty not to abandon people simply because their care is expensive. For instance, new cancer therapies may save lives and later become cheaper through wider use. The strongest policy is to secure essential treatment while directing additional resources toward proven preventive measures. This balance respects real differences among patients, diseases, and time horizons.

- S1** Health systems should guarantee essential treatment while investing more in effective prevention.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, preventing disease can protect more people at lower cost before suffering becomes severe.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, vaccination and early screening can reduce both deaths and expensive hospital treatment.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, a society has a duty not to abandon people simply because their care is expensive.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, new cancer therapies may save lives and later become cheaper through wider use.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** The strongest policy is to secure essential treatment while directing additional resources toward proven preventive measures.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among patients, diseases, and time horizons.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

芸術への公的支援

政府は税金を使って芸術や文化活動を支援すべきだ、という意見について論じなさい。

ANSWER A

中心主張

Governments should provide limited public support for arts and culture

主な理由

many cultural benefits are shared widely and cannot be funded through ticket sales alone

ANSWER B

中心主張

Art should depend mainly on voluntary audiences and private support

主な理由

creative independence may be weakened when artists must satisfy public funding committees

ANSWER C

統合の方向

to fund access, preservation, and experimentation through transparent decisions while protecting artistic independence

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

91 words

Governments should provide limited public support for arts and culture. The main reason is that many cultural benefits are shared widely and cannot be funded through ticket sales alone. For example, a local museum may educate children and preserve regional memory even if it never earns a profit. The museum creates public value that no individual ticket price fully captures. Admittedly, official funding can favor fashionable institutions or political preferences. Even so, the risk supports limits rather than rejection. For these reasons, the reform deserves conditional support rather than outright rejection.

S1 Governments should provide limited public support for arts and culture.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that many cultural benefits are shared widely and cannot be funded through ticket sales alone.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a local museum may educate children and preserve regional memory even if it never earns a profit.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The museum creates public value that no individual ticket price fully captures.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, official funding can favor fashionable institutions or political preferences.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the risk supports limits rather than rejection.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 For these reasons, the reform deserves conditional support rather than outright rejection.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

98 words

Art should depend mainly on voluntary audiences and private support. This is mainly because creative independence may be weakened when artists must satisfy public funding committees. For instance, small online communities can directly support work that traditional institutions ignore. Direct support lets neglected artists reach audiences without institutional approval. Certainly, market demand alone may eliminate valuable but less popular forms. Even so, selective exceptions are safer than a general rule. The criteria should be explicit and applied consistently across art forms and communities. For these reasons, the proposed change should not become a general rule without stronger evidence.

S1 Art should depend mainly on voluntary audiences and private support.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because creative independence may be weakened when artists must satisfy public funding committees.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, small online communities can directly support work that traditional institutions ignore.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Direct support lets neglected artists reach audiences without institutional approval.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, market demand alone may eliminate valuable but less popular forms.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, selective exceptions are safer than a general rule.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across art forms and communities.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 For these reasons, the proposed change should not become a general rule without stronger evidence.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

100 words

Public arts funding is justified when decisions are transparent and creative independence is protected. First, many cultural benefits are shared widely and cannot be funded through ticket sales alone. For example, a local museum may educate children and preserve regional memory even if it never earns a profit. However, creative independence may be weakened when artists must satisfy public funding committees. For instance, small online communities can directly support work that traditional institutions ignore. We should fund access, preservation, and experimentation through transparent decisions while protecting artistic independence. This balance respects real differences among art forms, communities, and funding bodies.

S1 Public arts funding is justified when decisions are transparent and creative independence is protected.

ABSTRACT | 90-100 WORDS

他者を理解すること

他者を理解するとは、どのようなことだと思うか。

ANSWER A

中心主張

Understanding another person means reconstructing the reasons that make their actions intelligible to them

主な理由

agreement is unnecessary, but we must see how experiences and values shape a judgment

ANSWER B

中心主張

Human beings can never fully understand another person's inner world

主な理由

language reveals only part of experience and is interpreted through the listener's own memories

ANSWER C

統合の方向

to approach others with informed humility, seeking reasons while recognizing that some distance remains

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Understanding another person means reconstructing the reasons that make their actions intelligible to them. The main reason is that agreement is unnecessary, but we must see how experiences and values shape a judgment. For example, a student may oppose a classmate's decision yet understand the fear behind it. Understanding begins when disagreement no longer prevents us from reconstructing another's reasons. Admittedly, explanation should not become an excuse for harmful conduct. Even so, the qualification narrows but does not defeat the definition. For these reasons, the proposed interpretation captures a necessary part of the concept.

S1 Understanding another person means reconstructing the reasons that make their actions intelligible to them.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that agreement is unnecessary, but we must see how experiences and values shape a judgment.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a student may oppose a classmate's decision yet understand the fear behind it.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Understanding begins when disagreement no longer prevents us from reconstructing another's reasons.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, explanation should not become an excuse for harmful conduct.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the qualification narrows but does not defeat the definition.

S7 For these reasons, the proposed interpretation captures a necessary part of the concept.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

97 words

Human beings can never fully understand another person's inner world. This is mainly because language reveals only part of experience and is interpreted through the listener's own memories. For instance, two close friends may attach different meanings to the same silence. Different meanings attached to silence reveal the limits of even close relationships. Certainly, incomplete understanding can still support respect and cooperation. Even so, the counterexample exposes a real limit in the initial view. Beyond the immediate case, the initial judgment should remain provisional. For these reasons, the first definition should be widened to accommodate the counterexample.

S1 Human beings can never fully understand another person's inner world.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because language reveals only part of experience and is interpreted through the listener's own memories.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, two close friends may attach different meanings to the same silence.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Different meanings attached to silence reveal the limits of even close relationships.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, incomplete understanding can still support respect and cooperation.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the counterexample exposes a real limit in the initial view.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Beyond the immediate case, the initial judgment should remain provisional.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 For these reasons, the first definition should be widened to accommodate the counterexample.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

92 words

Understanding another person means seeking reasons while admitting that complete access is impossible, as conditions change. First, agreement is unnecessary, but we must see how experiences and values shape a judgment. For example, a student may oppose a classmate's decision yet understand the fear behind it. However, language reveals only part of experience and is interpreted through the listener's own memories. For instance, two close friends may attach different meanings to the same silence. A workable balance is to approach others with informed humility, seeking reasons while recognizing that some distance remains.

- S1** Understanding another person means seeking reasons while admitting that complete access is impossible, as conditions change.

COMPARISON | 90-100 WORDS

読書か映像講義か

新しい分野を学ぶ際、書籍を読むことと映像講義を見ることのどちらが優れていると思うか。

ANSWER A

中心主張

Books are usually better for learning a new field in depth

主な理由

readers can control the pace, return to difficult passages, and examine an argument closely

ANSWER B

中心主張

Video lectures provide a more accessible introduction to unfamiliar subjects

主な理由

voice, diagrams, and demonstrations can make relationships visible before learners know the terminology

ANSWER C

統合の方向

to use lectures for orientation and books for slow analysis, retrieval, and independent verification

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

91 words

Books are usually better for learning a new field in depth. The main reason is that readers can control the pace, return to difficult passages, and examine an argument closely. For example, a student can compare definitions across chapters and mark the exact point where confusion begins. A book lets the learner slow down exactly where understanding breaks. Admittedly, beginners may struggle without visual guidance or explanation. Even so, the weakness calls for exceptions, not reversed priorities. For these reasons, the first approach offers the sounder starting point despite its limits.

S1 Books are usually better for learning a new field in depth.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that readers can control the pace, return to difficult passages, and examine an argument closely.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a student can compare definitions across chapters and mark the exact point where confusion begins.

具体例。場面・主体・結果を置き、抽象的な理由が現実にごう働くかを示す。

S4 A book lets the learner slow down exactly where understanding breaks.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S7 For these reasons, the first approach offers the sounder starting point despite its limits.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

97 words

Video lectures provide a more accessible introduction to unfamiliar subjects. This is mainly because voice, diagrams, and demonstrations can make relationships visible before learners know the terminology. For instance, an animated physics lecture can show motion that a static description leaves abstract. Animation can supply an initial mental model before technical language becomes manageable. Certainly, passive viewing can create an illusion of understanding. Even so, the weakness calls for exceptions, not reversed priorities. Conditions differ across subjects and learners, so uniform rules may fail. For these reasons, the second approach offers the better default despite its limitations.

S1 Video lectures provide a more accessible introduction to unfamiliar subjects.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because voice, diagrams, and demonstrations can make relationships visible before learners know the terminology.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, an animated physics lecture can show motion that a static description leaves abstract.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Animation can supply an initial mental model before technical language becomes manageable.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, passive viewing can create an illusion of understanding.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Conditions differ across subjects and learners, so uniform rules may fail.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 For these reasons, the second approach offers the better default despite its limitations.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

92 words

Video can orient beginners, but books remain essential for slow analysis and verification. First, readers can control the pace, return to difficult passages, and examine an argument closely. For example, a student can compare definitions across chapters and mark the exact point where confusion begins. However, voice, diagrams, and demonstrations can make relationships visible before learners know the terminology. For instance, an animated physics lecture can show motion that a static description leaves abstract. The better synthesis is to use lectures for orientation and books for slow analysis, retrieval, and independent verification.

S1 Video can orient beginners, but books remain essential for slow analysis and verification.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, readers can control the pace, return to difficult passages, and examine an argument closely.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a student can compare definitions across chapters and mark the exact point where confusion begins.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, voice, diagrams, and demonstrations can make relationships visible before learners know the terminology.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, an animated physics lecture can show motion that a static description leaves abstract.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 The better synthesis is to use lectures for orientation and books for slow analysis, retrieval, and independent verification.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

試験か平常評価か

学校の成績は、一度の試験よりも日常の課題や授業参加を重視して決めるべきだ、という意見について論じなさい。

ANSWER A

中心主張

Schools should base grades on a broad range of work rather than a single examination

主な理由

continuous assessment reflects effort, revision, communication, and different kinds of ability

ANSWER B

中心主張

Major examinations should remain the main basis of academic grades

主な理由

a common test provides a clear standard and limits differences between teachers

ANSWER C

統合の方向

to combine common examinations with selected assignments that show sustained reasoning and improvement

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Schools should base grades on a broad range of work rather than a single examination. The main reason is that continuous assessment reflects effort, revision, communication, and different kinds of ability. For example, a student who improves through repeated drafts demonstrates learning that one timed test may miss. Repeated drafts make improvement visible instead of treating performance as a single event. Admittedly, daily grading can reward compliance and increase constant pressure. Still, the risk supports limits rather than rejection. On balance, the reform deserves conditional support rather than outright rejection.

S1 Schools should base grades on a broad range of work rather than a single examination.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that continuous assessment reflects effort, revision, communication, and different kinds of ability.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a student who improves through repeated drafts demonstrates learning that one timed test may miss.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Repeated drafts make improvement visible instead of treating performance as a single event.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, daily grading can reward compliance and increase constant pressure.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the risk supports limits rather than rejection.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 On balance, the reform deserves conditional support rather than outright rejection.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

97 words

Major examinations should remain the main basis of academic grades. This is mainly because a common test provides a clear standard and limits differences between teachers. For instance, students in separate classes can be compared through the same questions and time conditions. Common conditions make differences in scores easier to interpret across classrooms. Certainly, one poor day may distort a student's actual ability. Still, selective exceptions are safer than a general rule. Conditions differ across students and teachers, so uniform rules may fail. On balance, the proposed change should not become a general rule without stronger evidence.

S1 Major examinations should remain the main basis of academic grades.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because a common test provides a clear standard and limits differences between teachers.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, students in separate classes can be compared through the same questions and time conditions.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, one poor day may distort a student's actual ability.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, selective exceptions are safer than a general rule.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Conditions differ across students and teachers, so uniform rules may fail.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, the proposed change should not become a general rule without stronger evidence.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

98 words

Fair assessment combines common examinations with work showing sustained reasoning and improvement. First, continuous assessment reflects effort, revision, communication, and different kinds of ability. For example, a student who improves through repeated drafts demonstrates learning that one timed test may miss. However, a common test provides a clear standard and limits differences between teachers. For instance, students in separate classes can be compared through the same questions and time conditions. In practice, we should combine common examinations with selected assignments that show sustained reasoning and improvement. This balance respects real differences among students, teachers, and kinds of learning.

S1 Fair assessment combines common examinations with work showing sustained reasoning and improvement.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, continuous assessment reflects effort, revision, communication, and different kinds of ability.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a student who improves through repeated drafts demonstrates learning that one timed test may miss.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, a common test provides a clear standard and limits differences between teachers.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, students in separate classes can be compared through the same questions and time conditions.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 In practice, we should combine common examinations with selected assignments that show sustained reasoning and improvement.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among students, teachers, and kinds of learning.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

ABSTRACT | 90-100 WORDS

平等と公平

すべての人を同じように扱うことは、公平であることと同じだろうか。

ANSWER A

中心主張

Treating everyone identically is not always fair

主な理由

people begin from different circumstances and may need different forms of support to access the same opportunity

ANSWER B

中心主張

Equal treatment remains an essential protection against favoritism

主な理由

allowing officials to treat cases differently can hide prejudice behind claims about individual need

ANSWER C

統合の方向

to use common principles while permitting clearly justified adjustments that remove relevant barriers

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Treating everyone identically is not always fair. The main reason is that people begin from different circumstances and may need different forms of support to access the same opportunity. For example, providing captions gives deaf students access to a lecture without lowering academic standards. Captions change access to the task, not the intellectual standard itself. Admittedly, special measures can appear arbitrary if their purpose is not explained. Still, the qualification narrows but does not defeat the definition, without making the concept absolute. On balance, the proposed interpretation captures a necessary part of the concept.

S1 Treating everyone identically is not always fair.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that people begin from different circumstances and may need different forms of support to access the same opportunity.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, providing captions gives deaf students access to a lecture without lowering academic standards.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Captions change access to the task, not the intellectual standard itself.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, special measures can appear arbitrary if their purpose is not explained.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the qualification narrows but does not defeat the definition, without making the concept absolute.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 On balance, the proposed interpretation captures a necessary part of the concept.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

100 words

Equal treatment remains an essential protection against favoritism. This is because allowing officials to treat cases differently can hide prejudice behind claims about individual need. For instance, transparent admission rules prevent personal connections from deciding outcomes. Uniform rules limit the discretion through which favoritism can enter decisions. Certainly, rigid uniformity can preserve disadvantages that already exist. Still, the counterexample exposes a limit in the initial view. The criteria should be explicit and applied consistently across needs and barriers. Practical effects on needs and barriers matter as much as the principle. The first definition should be widened to accommodate the counterexample.

S1 Equal treatment remains an essential protection against favoritism.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is because allowing officials to treat cases differently can hide prejudice behind claims about individual need.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, transparent admission rules prevent personal connections from deciding outcomes.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Uniform rules limit the discretion through which favoritism can enter decisions.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, rigid uniformity can preserve disadvantages that already exist.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the counterexample exposes a limit in the initial view.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across needs and barriers.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Practical effects on needs and barriers matter as much as the principle.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S9 The first definition should be widened to accommodate the counterexample.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

90 words

Fairness requires common principles and justified adjustments that remove relevant barriers, under continued review. First, people begin from different circumstances and may need different forms of support to access the same opportunity. For example, providing captions gives deaf students access to a lecture without lowering academic standards. However, allowing officials to treat cases differently can hide prejudice behind claims about individual need. For instance, transparent admission rules prevent personal connections from deciding outcomes. The strongest policy is to use common principles while permitting clearly justified adjustments that remove relevant barriers.

S1 Fairness requires common principles and justified adjustments that remove relevant barriers, under continued review.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, people begin from different circumstances and may need different forms of support to access the same opportunity.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, providing captions gives deaf students access to a lecture without lowering academic standards.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

COMPARISON | 90-100 WORDS

安定した仕事か挑戦か

安定した職業を選ぶことと、失敗の危険があっても強く関心のある道を選ぶことのどちらが望ましいか。

ANSWER A

中心主張

Choosing a stable career is often the more responsible decision

主な理由

financial security gives people room to support others and pursue interests without constant fear

ANSWER B

中心主張

People should accept reasonable risk to pursue work they find meaningful

主な理由

long-term motivation is difficult to maintain when daily activity conflicts with one's strongest interests

ANSWER C

統合の方向

to test a serious interest through gradual commitments while maintaining a realistic financial foundation

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

91 words

Choosing a stable career is often the more responsible decision. The main reason is that financial security gives people room to support others and pursue interests without constant fear. For example, a person with dependable income may study, volunteer, or create art outside working hours. Financial stability can support meaningful pursuits rather than merely compete with them. Admittedly, security can become an excuse for remaining in deeply unsuitable work. Still, the weakness calls for exceptions, not reversed priorities. On balance, the first approach offers the sounder starting point despite its limits.

S1 Choosing a stable career is often the more responsible decision.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that financial security gives people room to support others and pursue interests without constant fear.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a person with dependable income may study, volunteer, or create art outside working hours.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S7 On balance, the first approach offers the sounder starting point despite its limits.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

94 words

People should accept reasonable risk to pursue work they find meaningful. This is mainly because long-term motivation is difficult to maintain when daily activity conflicts with one's strongest interests. For instance, an aspiring researcher may need uncertain early positions before finding a lasting role. The researcher's uncertainty is a cost accepted for sustained, purposeful work. Certainly, passion does not guarantee ability, income, or satisfaction. Still, the weakness calls for exceptions, not reversed priorities. In addition, later consequences may alter the result. On balance, the second approach offers the better default despite its limitations.

S1 People should accept reasonable risk to pursue work they find meaningful.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because long-term motivation is difficult to maintain when daily activity conflicts with one's strongest interests.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, an aspiring researcher may need uncertain early positions before finding a lasting role.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The researcher's uncertainty is a cost accepted for sustained, purposeful work.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, passion does not guarantee ability, income, or satisfaction.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the weakness calls for exceptions, not reversed priorities.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 In addition, later consequences may alter the result.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, the second approach offers the better default despite its limitations.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

92 words

A sensible career strategy tests meaningful work while preserving a realistic financial base. First, financial security gives people room to support others and pursue interests without constant fear. For example, a person with dependable income may study, volunteer, or create art outside working hours. However, long-term motivation is difficult to maintain when daily activity conflicts with one's strongest interests. For instance, an aspiring researcher may need uncertain early positions before finding a lasting role. A sound approach is to test a serious interest through gradual commitments while maintaining a realistic financial foundation.

- S1** A sensible career strategy tests meaningful work while preserving a realistic financial base.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, financial security gives people room to support others and pursue interests without constant fear.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, a person with dependable income may study, volunteer, or create art outside working hours.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, long-term motivation is difficult to maintain when daily activity conflicts with one's strongest interests.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, an aspiring researcher may need uncertain early positions before finding a lasting role.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** A sound approach is to test a serious interest through gradual commitments while maintaining a realistic financial foundation.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

実名制のSNS

SNSでは、利用者に実名の使用を義務づけるべきだ、という意見について論じなさい。

ANSWER A

中心主張

Social media platforms should require stronger identity verification for public accounts

主な理由

accountability can discourage deliberate harassment, fraud, and coordinated manipulation

ANSWER B

中心主張

Users should retain the right to communicate under pseudonyms

主な理由

anonymity allows people to discuss sensitive experiences without exposing themselves to retaliation

ANSWER C

統合の方向

to verify users privately while allowing public pseudonyms and responding firmly to documented abuse

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Social media platforms should require stronger identity verification for public accounts. The main reason is that accountability can discourage deliberate harassment, fraud, and coordinated manipulation. For example, people may hesitate before spreading a false accusation when it is clearly tied to their identity. Identity can raise the personal cost of spreading accusations one cannot defend. Admittedly, real-name rules can endanger dissidents, victims, and vulnerable minorities. Yet the risk supports limits rather than rejection, as institutions learn from actual outcomes. Taken together, the reform deserves conditional support rather than outright rejection.

S1 Social media platforms should require stronger identity verification for public accounts.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that accountability can discourage deliberate harassment, fraud, and coordinated manipulation.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, people may hesitate before spreading a false accusation when it is clearly tied to their identity.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Identity can raise the personal cost of spreading accusations one cannot defend.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, real-name rules can endanger dissidents, victims, and vulnerable minorities.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the risk supports limits rather than rejection, as institutions learn from actual outcomes.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, the reform deserves conditional support rather than outright rejection.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

99 words

Users should retain the right to communicate under pseudonyms. This is mainly because anonymity allows people to discuss sensitive experiences without exposing themselves to retaliation. For instance, a teenager may seek advice about family problems more safely without using a legal name. A pseudonym can protect honest help-seeking without making the speaker invisible to platforms. Certainly, anonymous accounts can be abused to avoid responsibility. Yet selective exceptions are safer than a general rule. The criteria should be explicit and applied consistently across users and risks. Taken together, the proposed change should not become a general rule without stronger evidence.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。 |
| S8 | Taken together, the proposed change should not become a general rule without stronger evidence.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

99 words

Platforms can verify users privately while allowing public pseudonyms and punishing documented abuse. First, accountability can discourage deliberate harassment, fraud, and coordinated manipulation. For example, people may hesitate before spreading a false accusation when it is clearly tied to their identity. However, anonymity allows people to discuss sensitive experiences without exposing themselves to retaliation. For instance, a teenager may seek advice about family problems more safely without using a legal name. We should verify users privately while allowing public pseudonyms and responding firmly to documented abuse. This balance respects real differences among users, risks, and kinds of public account.

- S1** Platforms can verify users privately while allowing public pseudonyms and punishing documented abuse.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, accountability can discourage deliberate harassment, fraud, and coordinated manipulation.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, people may hesitate before spreading a false accusation when it is clearly tied to their identity.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, anonymity allows people to discuss sensitive experiences without exposing themselves to retaliation.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, a teenager may seek advice about family problems more safely without using a legal name.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** We should verify users privately while allowing public pseudonyms and responding firmly to documented abuse.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among users, risks, and kinds of public account.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

ABSTRACT | 90-100 WORDS

不確実性の強さ

不確実であることが、かえって強みになる場合はあるだろうか。

ANSWER A

中心主張

Uncertainty can be a strength when it keeps judgment open to correction

主な理由

people who recognize incomplete evidence are more likely to seek new information and revise plans

ANSWER B

中心主張

Confidence is often more valuable than uncertainty in difficult situations

主な理由

groups need clear decisions when delay itself creates serious risk

ANSWER C

統合の方向

to make provisional decisions firmly while stating what remains unknown and when reconsideration is required

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Uncertainty can be a strength when it keeps judgment open to correction. The main reason is that people who recognize incomplete evidence are more likely to seek new information and revise plans. For example, a doctor who admits uncertainty may order another test instead of forcing an early diagnosis. Admitted uncertainty prompts another test instead of disguising an unsupported conclusion. Admittedly, constant hesitation can prevent necessary action. Yet the qualification narrows but does not defeat the definition, without making the concept absolute. Taken together, the proposed interpretation captures a necessary part of the concept.

S1 Uncertainty can be a strength when it keeps judgment open to correction.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that people who recognize incomplete evidence are more likely to seek new information and revise plans.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a doctor who admits uncertainty may order another test instead of forcing an early diagnosis.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Admitted uncertainty prompts another test instead of disguising an unsupported conclusion.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, constant hesitation can prevent necessary action.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the qualification narrows but does not defeat the definition, without making the concept absolute.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, the proposed interpretation captures a necessary part of the concept.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

95 words

Confidence is often more valuable than uncertainty in difficult situations. This is mainly because groups need clear decisions when delay itself creates serious risk. For instance, emergency teams must act on the best available evidence before every doubt is resolved. In emergencies, decisiveness has value because waiting can itself cause harm. Certainly, confidence becomes dangerous when it cannot be questioned. Yet the counterexample exposes a real limit in the initial view. The criteria should be explicit and applied consistently across decisions and evidence. Taken together, the first definition should be widened to accommodate the counterexample.

- S1** Confidence is often more valuable than uncertainty in difficult situations.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because groups need clear decisions when delay itself creates serious risk.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, emergency teams must act on the best available evidence before every doubt is resolved.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** In emergencies, decisiveness has value because waiting can itself cause harm.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Certainly, confidence becomes dangerous when it cannot be questioned.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Yet the counterexample exposes a real limit in the initial view.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across decisions and evidence.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Taken together, the first definition should be widened to accommodate the counterexample.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

91 words

Good judgment acts firmly on current evidence while stating what remains uncertain. First, people who recognize incomplete evidence are more likely to seek new information and revise plans. For example, a doctor who admits uncertainty may order another test instead of forcing an early diagnosis. However, groups need clear decisions when delay itself creates serious risk. For instance, emergency teams must act on the best available evidence before every doubt is resolved. The better synthesis is to make provisional decisions firmly while stating what remains unknown and when reconsideration is required.

S1 Good judgment acts firmly on current evidence while stating what remains uncertain.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, people who recognize incomplete evidence are more likely to seek new information and revise plans.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a doctor who admits uncertainty may order another test instead of forcing an early diagnosis.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, groups need clear decisions when delay itself creates serious risk.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, emergency teams must act on the best available evidence before every doubt is resolved.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 The better synthesis is to make provisional decisions firmly while stating what remains unknown and when reconsideration is required.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

速さか正確さか

仕事や学習では、速さと正確さのどちらを優先すべきだと思うか。

ANSWER A

中心主張

Accuracy should usually take priority over speed

主な理由

errors can create later costs that far exceed the time initially saved

ANSWER B

中心主張

Speed is often more important in environments where information changes rapidly

主な理由

an imperfect answer delivered at the right moment may be more useful than a perfect answer delivered too late

ANSWER C

統合の方向

to set a required level of accuracy first and then work as quickly as that standard safely permits

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

93 words

Accuracy should usually take priority over speed. The main reason is that errors can create later costs that far exceed the time initially saved. For example, a rushed calculation in medicine or engineering may endanger lives and require extensive correction. Here, a small gain in speed could create irreversible human costs. Admittedly, perfectionism can delay decisions whose value depends on timing. Yet the weakness calls for exceptions, not reversed priorities. For a durable judgment, later consequences may alter the result. Taken together, the first approach offers the sounder starting point despite its limits.

S1

Accuracy should usually take priority over speed.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2

The main reason is that errors can create later costs that far exceed the time initially saved.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3

For example, a rushed calculation in medicine or engineering may endanger lives and require extensive correction.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4

Here, a small gain in speed could create irreversible human costs.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5

Admittedly, perfectionism can delay decisions whose value depends on timing.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6

Yet the weakness calls for exceptions, not reversed priorities.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7

For a durable judgment, later consequences may alter the result.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8

Taken together, the first approach offers the sounder starting point despite its limits.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

92 words

Speed is often more important in environments where information changes rapidly. This is mainly because an imperfect answer delivered at the right moment may be more useful than a perfect answer delivered too late. For instance, emergency communication must reach people before every minor detail is confirmed. Timeliness is part of accuracy when information must guide immediate action. Certainly, habitual haste can damage trust and quality. Yet the weakness calls for exceptions, not reversed priorities, while justified exceptions remain possible. Taken together, the second approach offers the better default despite its limitations.

S1 Speed is often more important in environments where information changes rapidly.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because an imperfect answer delivered at the right moment may be more useful than a perfect answer delivered too late.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, emergency communication must reach people before every minor detail is confirmed.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Timeliness is part of accuracy when information must guide immediate action.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, habitual haste can damage trust and quality.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the weakness calls for exceptions, not reversed priorities, while justified exceptions remain possible.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, the second approach offers the better default despite its limitations.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

97 words

Decision-makers should define necessary accuracy first and then work as quickly as safety permits. First, errors can create later costs that far exceed the time initially saved. For example, a rushed calculation in medicine or engineering may endanger lives and require extensive correction. However, an imperfect answer delivered at the right moment may be more useful than a perfect answer delivered too late. For instance, emergency communication must reach people before every minor detail is confirmed. In practice, we should set a required level of accuracy first and then work as quickly as that standard safely permits.

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

98 words

Students should normally continue directly to university after high school. This is mainly because academic habits and friendships are easier to maintain without a long interruption. For instance, a student who begins mathematics immediately may preserve skills needed for demanding first-year courses. Continuity protects both demanding skills and the routines that sustain study. Certainly, entering university without reflection can lead to poor choices. Despite that, selective exceptions are safer than a general rule. The criteria should be explicit and applied consistently across students and plans. Overall, the proposed change should not become a general rule without stronger evidence.

S1 Students should normally continue directly to university after high school.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because academic habits and friendships are easier to maintain without a long interruption.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a student who begins mathematics immediately may preserve skills needed for demanding first-year courses.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Continuity protects both demanding skills and the routines that sustain study.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, entering university without reflection can lead to poor choices.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, selective exceptions are safer than a general rule.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across students and plans.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Overall, the proposed change should not become a general rule without stronger evidence.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

100 words

A gap year is worthwhile only when it has an affordable purpose, structure, and supervision. First, work, travel, or service can help students examine goals before committing to a course of study. For example, a student who works in elder care may discover a genuine interest in health policy. However, academic habits and friendships are easier to maintain without a long interruption. For instance, a student who begins mathematics immediately may preserve skills needed for demanding first-year courses. The strongest policy is to recommend a gap year only when the student has a clear plan, supervision, and an affordable purpose.

ANSWER A

中心主張

A choice is genuinely one's own when the person can examine and endorse the reasons behind it

主な理由

complete independence from social influence is impossible, but reflection can distinguish influence from blind obedience

ANSWER B

中心主張

A choice can be authentic even without lengthy conscious reflection

主な理由

habits, emotions, and relationships are parts of the self rather than external forces alone

ANSWER C

統合の方向

to regard a choice as one's own when it reflects values the person can question, explain, and revise

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

A choice is genuinely one's own when the person can examine and endorse the reasons behind it. The main reason is that complete independence from social influence is impossible, but reflection can distinguish influence from blind obedience. For example, a student may adopt a family profession yet do so after seriously considering alternatives. Admittedly, people may rationalize pressures they are afraid to resist. Despite that, the qualification narrows but does not defeat the definition, without making the concept absolute. Overall, the proposed interpretation captures a necessary part of the concept.

S1 A choice is genuinely one's own when the person can examine and endorse the reasons behind it.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that complete independence from social influence is impossible, but reflection can distinguish influence from blind obedience.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a student may adopt a family profession yet do so after seriously considering alternatives.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Admittedly, people may rationalize pressures they are afraid to resist.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S5 Despite that, the qualification narrows but does not defeat the definition, without making the concept absolute.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S6 Overall, the proposed interpretation captures a necessary part of the concept.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

99 words

A choice can be authentic even without lengthy conscious reflection. This is mainly because habits, emotions, and relationships are parts of the self rather than external forces alone. For instance, someone may immediately help a friend because loyalty has become a deeply held value. Immediate loyalty may express a settled value rather than an unexamined impulse. Certainly, impulse can also conceal manipulation or fear. Despite that, the counterexample exposes a real limit in the initial view. The criteria should be explicit and applied consistently across influences and values. Overall, the first definition should be widened to accommodate the counterexample.

| S7 | The criteria should be explicit and applied consistently across influences and values.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。 |
| S8 | Overall, the first definition should be widened to accommodate the counterexample.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

98 words

A choice is one's own when it reflects values the person can question, explain, and revise. First, complete independence from social influence is impossible, but reflection can distinguish influence from blind obedience. For example, a student may adopt a family profession yet do so after seriously considering alternatives. However, habits, emotions, and relationships are parts of the self rather than external forces alone. For instance, someone may immediately help a friend because loyalty has become a deeply held value. We should regard a choice as one's own when it reflects values the person can question, explain, and revise.

S1 A choice is one's own when it reflects values the person can question, explain, and revise.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, complete independence from social influence is impossible, but reflection can distinguish influence from blind obedience.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a student may adopt a family profession yet do so after seriously considering alternatives.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, habits, emotions, and relationships are parts of the self rather than external forces alone.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, someone may immediately help a friend because loyalty has become a deeply held value.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 We should regard a choice as one's own when it reflects values the person can question, explain, and revise.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

25点の採点基準

項目	見る点
内容・論理 10	問いに答え、理由と具体例が主張を支えているか。
構成 5	主張→理由→例→結論が自然につながるか。
文法 5	主語・動詞、時制、冠詞、単複、修飾関係が正確か。
語彙・表現 3	文脈に合う動詞・連語を用い、不必要な反復を避けたか。
自然さ 2	英語として読みやすく、極端な直訳がないか。

自己添削：最初と最後の文だけを読んで主張が一致しているか、各文の先頭を追って論理の流れが見えるか、具体例が理由の説明になっているかを確認する。

COMPARISON | 90-100 WORDS

地域か国か

社会問題への対策は、地域ごとに考えることと、国全体で統一的に進めることのどちらが効果的か。

ANSWER A

中心主張

Local solutions are often more effective because they respond to specific conditions

主な理由

residents and local officials possess detailed knowledge that national planners cannot easily obtain

ANSWER B

中心主張

National policies are necessary when problems cross local boundaries or involve basic rights

主な理由

common standards prevent a person's protection from depending entirely on where they live

ANSWER C

統合の方向

to establish national goals and minimum standards while allowing local authorities to design implementation

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

98 words

Local solutions are often more effective because they respond to specific conditions. The main reason is that residents and local officials possess detailed knowledge that national planners cannot easily obtain. For example, a rural transport plan can reflect actual school, hospital, and work routes. Local knowledge makes policy responsive to routes that aggregate data may overlook. Admittedly, local governments may lack money, expertise, or political independence. Despite that, the weakness calls for exceptions, not reversed priorities. Beyond the present case, deferred costs must also be considered. Overall, the first approach offers the sounder starting point despite its limits.

S1 Local solutions are often more effective because they respond to specific conditions.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that residents and local officials possess detailed knowledge that national planners cannot easily obtain.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a rural transport plan can reflect actual school, hospital, and work routes.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Local knowledge makes policy responsive to routes that aggregate data may overlook.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, local governments may lack money, expertise, or political independence.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the weakness calls for exceptions, not reversed priorities.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Beyond the present case, deferred costs must also be considered.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Overall, the first approach offers the sounder starting point despite its limits.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

96 words

National policies are necessary when problems cross local boundaries or involve basic rights. This is mainly because common standards prevent a person's protection from depending entirely on where they live. For instance, national pollution limits stop one region from gaining economically by harming its neighbors. National limits prevent local advantage from being purchased at neighboring communities' expense. Certainly, uniform rules may ignore important local differences. Despite that, the weakness calls for exceptions, not reversed priorities. Beyond the present case, deferred costs must also be considered. Overall, the second approach offers the better default despite its limitations.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

96 words

National goals should guide policy, while local authorities design implementation. First, residents and local officials possess detailed knowledge that national planners cannot easily obtain. For example, a rural transport plan can reflect actual school, hospital, and work routes. However, common standards prevent a person's protection from depending entirely on where they live. For instance, national pollution limits stop one region from gaining economically by harming its neighbors. A workable balance is to establish national goals and minimum standards while allowing local authorities to design implementation. This balance respects real differences among regions, rights, and cross-border effects.

S1 National goals should guide policy, while local authorities design implementation.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, residents and local officials possess detailed knowledge that national planners cannot easily obtain.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a rural transport plan can reflect actual school, hospital, and work routes.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, common standards prevent a person's protection from depending entirely on where they live.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, national pollution limits stop one region from gaining economically by harming its neighbors.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 A workable balance is to establish national goals and minimum standards while allowing local authorities to design implementation.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among regions, rights, and cross-border effects.

射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

動物園

現代社会に動物園は必要だ、という意見について論じなさい。

ANSWER A

中心主張

Well-regulated zoos can still serve important educational and conservation purposes

主な理由

direct observation can create concern for species that otherwise remain distant abstractions

ANSWER B

中心主張

Traditional zoos should gradually be replaced by sanctuaries and digital education

主な理由

human curiosity does not justify confining animals in inadequate artificial environments

ANSWER C

統合の方向

to retain only institutions that meet strict welfare standards and contribute measurably to conservation

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Well-regulated zoos can still serve important educational and conservation purposes. The main reason is that direct observation can create concern for species that otherwise remain distant abstractions. For example, a breeding program may preserve genetic diversity while teaching visitors about habitat loss. The program links personal encounter with measurable work against species loss. Admittedly, captivity can restrict natural behavior and turn animals into entertainment. On balance, the risk supports limits rather than rejection, with clear exceptions and periodic public review. Accordingly, the reform deserves conditional support rather than outright rejection.

S1 Well-regulated zoos can still serve important educational and conservation purposes.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that direct observation can create concern for species that otherwise remain distant abstractions.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a breeding program may preserve genetic diversity while teaching visitors about habitat loss.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The program links personal encounter with measurable work against species loss.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, captivity can restrict natural behavior and turn animals into entertainment.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the risk supports limits rather than rejection, with clear exceptions and periodic public review.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Accordingly, the reform deserves conditional support rather than outright rejection.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

96 words

Traditional zoos should gradually be replaced by sanctuaries and digital education. This is mainly because human curiosity does not justify confining animals in inadequate artificial environments. For instance, high- quality documentaries can show migration and social behavior more accurately than small enclosures. Documentaries can inform curiosity without making confinement the price of learning. Certainly, some conservation programs depend on managed breeding and public funding. On balance, selective exceptions are safer than a general rule. The balance may reasonably differ across species and institutions. Accordingly, the proposed change should not become a general rule without stronger evidence.

S1 Traditional zoos should gradually be replaced by sanctuaries and digital education.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because human curiosity does not justify confining animals in inadequate artificial environments.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, high- quality documentaries can show migration and social behavior more accurately than small enclosures.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Documentaries can inform curiosity without making confinement the price of learning.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, some conservation programs depend on managed breeding and public funding.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, selective exceptions are safer than a general rule.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The balance may reasonably differ across species and institutions.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Accordingly, the proposed change should not become a general rule without stronger evidence.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

97 words

Only institutions that protect welfare and contribute measurably to conservation deserve to remain. First, direct observation can create concern for species that otherwise remain distant abstractions. For example, a breeding program may preserve genetic diversity while teaching visitors about habitat loss. However, human curiosity does not justify confining animals in inadequate artificial environments. For instance, high-quality documentaries can show migration and social behavior more accurately than small enclosures. The better synthesis is to retain only institutions that meet strict welfare standards and contribute measurably to conservation. This balance respects real differences among species, institutions, and conservation results.

- S1** Only institutions that protect welfare and contribute measurably to conservation deserve to remain.

ABSTRACT | 90-100 WORDS

技術と人間性

技術の発達は、人間の本質そのものを変えるだろうか。

ANSWER A

中心主張

Technology changes human behavior more readily than it changes basic human nature

主な理由

new tools alter habits and institutions, but desires for status, belonging, safety, and meaning remain recognizable

ANSWER B

中心主張

Technology can gradually transform what human beings are capable of becoming

主な理由

tools reshape memory, attention, relationships, and even the boundaries of the body

ANSWER C

統合の方向

to distinguish enduring human needs from the changing capacities and social forms through which they are expressed

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

91 words

Technology changes human behavior more readily than it changes basic human nature. The main reason is that new tools alter habits and institutions, but desires for status, belonging, safety, and meaning remain recognizable. For example, social media accelerates comparison, yet comparison itself existed long before smartphones. The medium accelerates an old desire; it does not create comparison itself. Admittedly, long exposure to new environments may eventually reshape emotional expectations. On balance, the qualification narrows but does not defeat the definition. Accordingly, the proposed interpretation captures a necessary part of the concept.

S1 Technology changes human behavior more readily than it changes basic human nature.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that new tools alter habits and institutions, but desires for status, belonging, safety, and meaning remain recognizable.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, social media accelerates comparison, yet comparison itself existed long before smartphones.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The medium accelerates an old desire; it does not create comparison itself.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, long exposure to new environments may eventually reshape emotional expectations.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the qualification narrows but does not defeat the definition.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Accordingly, the proposed interpretation captures a necessary part of the concept.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

95 words

Technology can gradually transform what human beings are capable of becoming. This is mainly because tools reshape memory, attention, relationships, and even the boundaries of the body. For instance, writing externalized memory, while future neural devices may alter thought more directly. Writing already shows that tools can reorganize fundamental human capacities. Certainly, biological and emotional limits continue to constrain change. On balance, the counterexample exposes a real limit in the initial view. The criteria should be explicit and applied consistently across tools and institutions. Accordingly, the first definition should be widened to accommodate the counterexample.

S1 Technology can gradually transform what human beings are capable of becoming.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because tools reshape memory, attention, relationships, and even the boundaries of the body.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, writing externalized memory, while future neural devices may alter thought more directly.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Writing already shows that tools can reorganize fundamental human capacities.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, biological and emotional limits continue to constrain change.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the counterexample exposes a real limit in the initial view.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across tools and institutions.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Accordingly, the first definition should be widened to accommodate the counterexample.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

92 words

Technology changes human capacities and institutions while continuing to express enduring needs, as conditions change. First, new tools alter habits and institutions, but desires for status, belonging, safety, and meaning remain recognizable. For example, social media accelerates comparison, yet comparison itself existed long before smartphones. However, tools reshape memory, attention, relationships, and even the boundaries of the body. For instance, writing externalized memory, while future neural devices may alter thought more directly. In practice, we should distinguish enduring human needs from the changing capacities and social forms through which they are expressed.

S1 Technology changes human capacities and institutions while continuing to express enduring needs, as conditions change.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, new tools alter habits and institutions, but desires for status, belonging, safety, and meaning remain recognizable.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, social media accelerates comparison, yet comparison itself existed long before smartphones.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, tools reshape memory, attention, relationships, and even the boundaries of the body.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, writing externalized memory, while future neural devices may alter thought more directly.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 In practice, we should distinguish enduring human needs from the changing capacities and social forms through which they are expressed.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

25点の採点基準

項目	見る点
内容・論理 10	問いに答え、理由と具体例が主張を支えているか。
構成 5	主張→理由→例→結論が自然につながるか。
文法 5	主語・動詞、時制、冠詞、単複、修飾関係が正確か。
語彙・表現 3	文脈に合う動詞・連語を用い、不必要な反復を避けたか。
自然さ 2	英語として読みやすく、極端な直訳がないか。

自己添削：最初と最後の文だけを読んで主張が一致しているか、各文の先頭を追って論理の流れが見えるか、具体例が理由の説明になっているかを確認する。

COMPARISON | 90-100 WORDS

対面か文章か

重要な問題を話し合う際、対面での会話と文章によるやり取りのどちらが優れていると思うか。

ANSWER A

中心主張

Face-to-face conversation is better for resolving sensitive disagreements

主な理由

tone, timing, and immediate questions help people correct misunderstandings before they harden

ANSWER B

中心主張

Written communication is better for complex and important decisions

主な理由

writing gives participants time to organize evidence and creates a record that can be checked later

ANSWER C

統合の方向

to discuss relationships and misunderstandings orally while recording evidence, proposals, and decisions in writing

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

96 words

Face-to-face conversation is better for resolving sensitive disagreements. The main reason is that tone, timing, and immediate questions help people correct misunderstandings before they harden. For example, a hesitant expression can show that a harsh sentence was poorly phrased rather than deliberately insulting. Immediate feedback allows intention and wording to be repaired before distrust grows. Admittedly, strong emotions may prevent careful thought. On balance, the weakness calls for exceptions, not reversed priorities. The criteria should be explicit and applied consistently across relationships and evidence. Accordingly, the first approach offers the sounder starting point despite its limits.

- S1** Face-to-face conversation is better for resolving sensitive disagreements.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that tone, timing, and immediate questions help people correct misunderstandings before they harden.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, a hesitant expression can show that a harsh sentence was poorly phrased rather than deliberately insulting.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Immediate feedback allows intention and wording to be repaired before distrust grows.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, strong emotions may prevent careful thought.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** On balance, the weakness calls for exceptions, not reversed priorities.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across relationships and evidence.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Accordingly, the first approach offers the sounder starting point despite its limits.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

97 words

Written communication is better for complex and important decisions. This is mainly because writing gives participants time to organize evidence and creates a record that can be checked later. For instance, a detailed proposal can be reread and compared with earlier commitments. A written record separates what was agreed from what participants later remember. Certainly, written words can sound colder or more final than intended. On balance, the weakness calls for exceptions, not reversed priorities. A fuller assessment shows that deferred costs must also be considered. Accordingly, the second approach offers the better default despite its limitations.

S1 Written communication is better for complex and important decisions.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because writing gives participants time to organize evidence and creates a record that can be checked later.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a detailed proposal can be reread and compared with earlier commitments.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 A written record separates what was agreed from what participants later remember.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, written words can sound colder or more final than intended.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the weakness calls for exceptions, not reversed priorities.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 A fuller assessment shows that deferred costs must also be considered.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Accordingly, the second approach offers the better default despite its limitations.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

92 words

Sensitive disputes need spoken clarification followed by written records of evidence and decisions. First, tone, timing, and immediate questions help people correct misunderstandings before they harden. For example, a hesitant expression can show that a harsh sentence was poorly phrased rather than deliberately insulting. However, writing gives participants time to organize evidence and creates a record that can be checked later. For instance, a detailed proposal can be reread and compared with earlier commitments. The strongest policy is to discuss relationships and misunderstandings orally while recording evidence, proposals, and decisions in writing.

S1 Sensitive disputes need spoken clarification followed by written records of evidence and decisions.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, tone, timing, and immediate questions help people correct misunderstandings before they harden.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a hesitant expression can show that a harsh sentence was poorly phrased rather than deliberately insulting.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, writing gives participants time to organize evidence and creates a record that can be checked later.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a detailed proposal can be reread and compared with earlier commitments.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 The strongest policy is to discuss relationships and misunderstandings orally while recording evidence, proposals, and decisions in writing.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

キャッシュレス社会

社会は現金を廃止し、完全なキャッシュレス化を目指すべきだ、という意見について論じなさい。

ANSWER A

中心主張

A largely cashless society would make many transactions faster and more transparent

主な理由

digital records can reduce some forms of theft, tax evasion, and administrative cost

ANSWER B

中心主張

Cash should remain a guaranteed public option

主な理由

physical money works without electricity, private platforms, or the disclosure of every purchase

ANSWER C

統合の方向

to expand convenient digital payment while legally protecting access to cash for resilience and inclusion

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

A largely cashless society would make many transactions faster and more transparent. The main reason is that digital records can reduce some forms of theft, tax evasion, and administrative cost. For example, small businesses can manage payments without storing large amounts of cash. Digital payment can reduce both physical risk and routine administrative work. Admittedly, systems may fail and exclude people without devices, accounts, or digital skills. Even so, the proposal remains defensible if implementation is cautious. For these reasons, the change should proceed under safeguards and clearly defined exceptions.

S1 A largely cashless society would make many transactions faster and more transparent.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that digital records can reduce some forms of theft, tax evasion, and administrative cost.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, small businesses can manage payments without storing large amounts of cash.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Digital payment can reduce both physical risk and routine administrative work.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, systems may fail and exclude people without devices, accounts, or digital skills.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the proposal remains defensible if implementation is cautious.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 For these reasons, the change should proceed under safeguards and clearly defined exceptions.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

92 words

Cash should remain a guaranteed public option. This is mainly because physical money works without electricity, private platforms, or the disclosure of every purchase. For instance, during a network failure, cash allows basic trade to continue immediately. Cash provides resilience because it does not depend on a working network. Certainly, cash also enables hidden crime and creates handling costs. Even so, the case for broad reform remains unproven, as evidence develops. The balance may reasonably differ across users and emergencies. For these reasons, narrow exceptions are preferable to an immediate universal shift.

S1 Cash should remain a guaranteed public option.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because physical money works without electricity, private platforms, or the disclosure of every purchase.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, during a network failure, cash allows basic trade to continue immediately.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Cash provides resilience because it does not depend on a working network.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, cash also enables hidden crime and creates handling costs.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the case for broad reform remains unproven, as evidence develops.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The balance may reasonably differ across users and emergencies.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 For these reasons, narrow exceptions are preferable to an immediate universal shift.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

99 words

Digital payment should expand without removing cash as a guarantee of resilience and inclusion. First, digital records can reduce some forms of theft, tax evasion, and administrative cost. For example, small businesses can manage payments without storing large amounts of cash. However, physical money works without electricity, private platforms, or the disclosure of every purchase. For instance, during a network failure, cash allows basic trade to continue immediately. A sound approach is to expand convenient digital payment while legally protecting access to cash for resilience and inclusion. This balance respects real differences among users, emergencies, and kinds of transaction.

- S1** Digital payment should expand without removing cash as a guarantee of resilience and inclusion.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, digital records can reduce some forms of theft, tax evasion, and administrative cost.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

ABSTRACT | 90-100 WORDS

忘れること

忘れることは、人間が生きていくために必要だろうか。

ANSWER A

中心主張

Forgetting is necessary because memory must select rather than preserve every detail equally

主な理由

letting minor information fade allows attention to focus on patterns, priorities, and present needs

ANSWER B

中心主張

The ability to preserve memory is more important than the ability to forget

主な理由

personal identity and social justice depend on maintaining connections with the past

ANSWER C

統合の方向

to preserve meanings and responsibilities while allowing unnecessary detail and emotional intensity to fade

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Forgetting is necessary because memory must select rather than preserve every detail equally. The main reason is that letting minor information fade allows attention to focus on patterns, priorities, and present needs. For example, we remember the lesson of an embarrassing mistake without replaying every painful moment. Selective forgetting preserves a lesson while reducing the emotional burden of detail. Admittedly, forgetting can also erase responsibility or valuable experience. Even so, the account still captures an essential feature. For these reasons, this account is stronger than a simple or absolute definition.

- S1** Forgetting is necessary because memory must select rather than preserve every detail equally.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that letting minor information fade allows attention to focus on patterns, priorities, and present needs.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

- S7** For these reasons, this account is stronger than a simple or absolute definition.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

96 words

The ability to preserve memory is more important than the ability to forget. This is mainly because personal identity and social justice depend on maintaining connections with the past. For instance, a community must remember discrimination if it hopes to prevent its repetition. Collective memory gives past injustice consequences for present choices. Certainly, perfect memory could trap people in grief or resentment. Even so, the broader account explains something the first one misses. The criteria should be explicit and applied consistently across individuals and communities. For these reasons, a broader account explains the evidence more convincingly.

S1 The ability to preserve memory is more important than the ability to forget.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because personal identity and social justice depend on maintaining connections with the past.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a community must remember discrimination if it hopes to prevent its repetition.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Collective memory gives past injustice consequences for present choices.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, perfect memory could trap people in grief or resentment.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the broader account explains something the first one misses.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across individuals and communities.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 For these reasons, a broader account explains the evidence more convincingly.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

100 words

We should preserve memory's meaning and responsibility while allowing needless detail to fade. First, letting minor information fade allows attention to focus on patterns, priorities, and present needs. For example, we remember the lesson of an embarrassing mistake without replaying every painful moment. However, personal identity and social justice depend on maintaining connections with the past. For instance, a community must remember discrimination if it hopes to prevent its repetition. A workable balance is to preserve meanings and responsibilities while allowing unnecessary detail and emotional intensity to fade. This balance respects real differences among individuals, communities, and kinds of memory.

- S1** We should preserve memory's meaning and responsibility while allowing needless detail to fade.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

COMPARISON | 90-100 WORDS

競争か協力か

学校教育では、生徒同士の競争と協力のどちらをより重視すべきだと思うか。

ANSWER A

中心主張

Schools should place greater emphasis on cooperation

主な理由

many adult tasks require people to combine different abilities and share responsibility

ANSWER B

中心主張

Competition can motivate students and provide clear feedback

主な理由

visible standards encourage learners to test their limits and recognize areas requiring improvement

ANSWER C

統合の方向

to use individual challenges for feedback while making cooperative work the normal model for complex tasks

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

100 words

Schools should place greater emphasis on cooperation. The main reason is that many adult tasks require people to combine different abilities and share responsibility. For example, a science project can teach students to explain methods, divide work, and respond to criticism. The project makes communication and shared responsibility part of the learning itself. Admittedly, group work can hide unequal effort and individual weakness. Even so, the first option offers the stronger starting point. The criteria should be explicit and applied consistently across students and tasks. For these reasons, priority should go to the first choice, with room for justified exceptions.

| S7 | The criteria should be explicit and applied consistently across students and tasks.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。 |
| S8 | For these reasons, priority should go to the first choice, with room for justified exceptions.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

97 words

Competition can motivate students and provide clear feedback. This is mainly because visible standards encourage learners to test their limits and recognize areas requiring improvement. For instance, a mathematics contest may inspire sustained practice beyond ordinary assignments. A visible challenge can convert an abstract standard into sustained individual effort. Certainly, constant ranking can damage confidence and discourage risk-taking. Even so, the second option offers the stronger starting point. The criteria should be explicit and applied consistently across students and tasks. For these reasons, priority should go to the second choice while the first plays a supporting role.

- S1** Competition can motivate students and provide clear feedback.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because visible standards encourage learners to test their limits and recognize areas requiring improvement.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, a mathematics contest may inspire sustained practice beyond ordinary assignments.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** A visible challenge can convert an abstract standard into sustained individual effort.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Certainly, constant ranking can damage confidence and discourage risk-taking.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Even so, the second option offers the stronger starting point.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across students and tasks.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** For these reasons, priority should go to the second choice while the first plays a supporting role.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

99 words

Schools should make cooperation normal and use competition selectively for feedback. First, many adult tasks require people to combine different abilities and share responsibility. For example, a science project can teach students to explain methods, divide work, and respond to criticism. However, visible standards encourage learners to test their limits and recognize areas requiring improvement. For instance, a mathematics contest may inspire sustained practice beyond ordinary assignments. The better synthesis is to use individual challenges for feedback while making cooperative work the normal model for complex tasks. This balance respects real differences among students, tasks, and forms of motivation.

S1 Schools should make cooperation normal and use competition selectively for feedback.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, many adult tasks require people to combine different abilities and share responsibility.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a science project can teach students to explain methods, divide work, and respond to criticism.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, visible standards encourage learners to test their limits and recognize areas requiring improvement.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a mathematics contest may inspire sustained practice beyond ordinary assignments.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 The better synthesis is to use individual challenges for feedback while making cooperative work the normal model for complex tasks.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among students, tasks, and forms of motivation.

射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

宇宙開発への投資

政府は、地上の問題が未解決でも宇宙開発に多額の資金を投じるべきだ、という意見について論じなさい。

ANSWER A

中心主張

Governments should continue substantial investment in space research

主な理由

long-term scientific projects can produce knowledge and technologies with benefits that are impossible to predict in advance

ANSWER B

中心主張

Public spending should focus primarily on serious problems on Earth

主な理由

limited resources have immediate moral importance when people lack health care, housing, or clean water

ANSWER C

統合の方向

to maintain stable scientific investment while requiring clear public goals and preventing prestige from replacing evidence

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Governments should continue substantial investment in space research. The main reason is that long-term scientific projects can produce knowledge and technologies with benefits that are impossible to predict in advance. For example, satellite research supports weather forecasting, navigation, communication, and disaster response. Satellites show how exploratory research can later support essential public services. Admittedly, prestigious missions can consume money without addressing urgent needs. Still, the proposal remains defensible if implementation is cautious. For a durable judgment, effects that emerge slowly deserve review. On balance, the change should proceed under safeguards and clearly defined exceptions.

S1

Governments should continue substantial investment in space research.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2

The main reason is that long-term scientific projects can produce knowledge and technologies with benefits that are impossible to predict in advance.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3

For example, satellite research supports weather forecasting, navigation, communication, and disaster response.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4

Satellites show how exploratory research can later support essential public services.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5

Admittedly, prestigious missions can consume money without addressing urgent needs.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6

Still, the proposal remains defensible if implementation is cautious.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7

For a durable judgment, effects that emerge slowly deserve review.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8

On balance, the change should proceed under safeguards and clearly defined exceptions.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

98 words

Public spending should focus primarily on serious problems on Earth. This is mainly because limited resources have immediate moral importance when people lack health care, housing, or clean water. For instance, the cost of one ambitious mission could fund many proven local programs. Opportunity cost matters because the same funds could meet urgent, proven needs. Certainly, abandoning space research would sacrifice future knowledge and international cooperation. Still, the case for broad reform remains unproven. Practical effects on missions and public needs matter as much as the principle. On balance, narrow exceptions are preferable to an immediate universal shift.

S1 Public spending should focus primarily on serious problems on Earth.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because limited resources have immediate moral importance when people lack health care, housing, or clean water.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, the cost of one ambitious mission could fund many proven local programs.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Opportunity cost matters because the same funds could meet urgent, proven needs.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, abandoning space research would sacrifice future knowledge and international cooperation.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the case for broad reform remains unproven.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Practical effects on missions and public needs matter as much as the principle.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, narrow exceptions are preferable to an immediate universal shift.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

93 words

Space research deserves stable support when evidence and public goals take priority over prestige. First, long-term scientific projects can produce knowledge and technologies with benefits that are impossible to predict in advance. For example, satellite research supports weather forecasting, navigation, communication, and disaster response. However, limited resources have immediate moral importance when people lack health care, housing, or clean water. For instance, the cost of one ambitious mission could fund many proven local programs. In practice, we should maintain stable scientific investment while requiring clear public goals and preventing prestige from replacing evidence.

S1 Space research deserves stable support when evidence and public goals take priority over prestige.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, long-term scientific projects can produce knowledge and technologies with benefits that are impossible to predict in advance.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, satellite research supports weather forecasting, navigation, communication, and disaster response.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, limited resources have immediate moral importance when people lack health care, housing, or clean water.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

ABSTRACT | 90-100 WORDS

競争と協力の共存

競争と協力は、互いに矛盾せず共存することができるだろうか。

ANSWER A

中心主張

Competition and cooperation can coexist when they operate at different levels

主な理由

people may cooperate within teams while competing under shared rules that reward improvement

ANSWER B

中心主張

Competition often weakens genuine cooperation because their incentives conflict

主な理由

participants who expect to be ranked may hide information or avoid helping strong rivals

ANSWER C

統合の方向

to design competition around transparent goals while rewarding contributions that strengthen the whole community

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Competition and cooperation can coexist when they operate at different levels. The main reason is that people may cooperate within teams while competing under shared rules that reward improvement. For example, research groups compete for recognition yet depend on common data standards and peer criticism. Researchers compete for credit within a cooperative system of verification. Admittedly, competition can gradually undermine openness and trust. Still, the account captures an essential feature, without reducing the concept to a single feature. On balance, this account is stronger than a simple or absolute definition.

S1 Competition and cooperation can coexist when they operate at different levels.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that people may cooperate within teams while competing under shared rules that reward improvement.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, research groups compete for recognition yet depend on common data standards and peer criticism.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Researchers compete for credit within a cooperative system of verification.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, competition can gradually undermine openness and trust.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the account captures an essential feature, without reducing the concept to a single feature.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 On balance, this account is stronger than a simple or absolute definition.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

96 words

Competition often weakens genuine cooperation because their incentives conflict. This is mainly because participants who expect to be ranked may hide information or avoid helping strong rivals. For instance, students told that only a few can succeed may treat classmates' progress as a threat. Scarce rewards can turn another learner's success into a personal loss. Certainly, cooperation without any external challenge can become complacent. Still, the broader account explains something the first one misses. The criteria should be explicit and applied consistently across teams and incentives. On balance, a broader account explains the evidence more convincingly.

S1 Competition often weakens genuine cooperation because their incentives conflict.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because participants who expect to be ranked may hide information or avoid helping strong rivals.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, students told that only a few can succeed may treat classmates' progress as a threat.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Scarce rewards can turn another learner's success into a personal loss.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, cooperation without any external challenge can become complacent.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the broader account explains something the first one misses.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across teams and incentives.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, a broader account explains the evidence more convincingly.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

92 words

Competition can support cooperation only when rules reward contributions to shared goals. First, people may cooperate within teams while competing under shared rules that reward improvement. For example, research groups compete for recognition yet depend on common data standards and peer criticism. However, participants who expect to be ranked may hide information or avoid helping strong rivals. For instance, students told that only a few can succeed may treat classmates' progress as a threat. The strongest policy is to design competition around transparent goals while rewarding contributions that strengthen the whole community.

- S1** Competition can support cooperation only when rules reward contributions to shared goals.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, people may cooperate within teams while competing under shared rules that reward improvement.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, research groups compete for recognition yet depend on common data standards and peer criticism.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, participants who expect to be ranked may hide information or avoid helping strong rivals.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

COMPARISON | 90-100 WORDS

経験か理論か

物事を深く理解するには、実際の経験と理論的知識のどちらが重要だと思うか。

ANSWER A

中心主張

Direct experience is indispensable for genuine understanding

主な理由

practice reveals uncertainty, resistance, and human variation that simplified explanations often omit

ANSWER B

中心主張

Theoretical knowledge is more important because it makes experience intelligible

主な理由

a framework helps learners identify patterns and transfer lessons beyond one particular case

ANSWER C

統合の方向

to use theory to guide attention and experience to challenge, refine, and sometimes replace theory

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

96 words

Direct experience is indispensable for genuine understanding. The main reason is that practice reveals uncertainty, resistance, and human variation that simplified explanations often omit. For example, a medical student learns from real patients that symptoms rarely follow textbook descriptions perfectly. Patients expose the variation that no simplified account can fully predict. Admittedly, experience without concepts can remain a collection of impressions. Still, the first option offers the stronger starting point. The criteria should be explicit and applied consistently across fields and cases. On balance, priority should go to the first choice, with room for justified exceptions.

- S1** Direct experience is indispensable for genuine understanding.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that practice reveals uncertainty, resistance, and human variation that simplified explanations often omit.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, a medical student learns from real patients that symptoms rarely follow textbook descriptions perfectly.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Patients expose the variation that no simplified account can fully predict.

- S5** Admittedly, experience without concepts can remain a collection of impressions.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Still, the first option offers the stronger starting point.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across fields and cases.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** On balance, priority should go to the first choice, with room for justified exceptions.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

98 words

Theoretical knowledge is more important because it makes experience intelligible. This is mainly because a framework helps learners identify patterns and transfer lessons beyond one particular case. For instance, economic theory can explain why an apparently successful policy may fail under different incentives. Theory makes one policy case useful beyond the conditions that produced it. Certainly, theory can become detached from reality when never tested. Still, the second option offers the stronger starting point. In addition, the preliminary judgment should remain provisional. On balance, priority should go to the second choice while the first plays a supporting role.

S1 Theoretical knowledge is more important because it makes experience intelligible.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because a framework helps learners identify patterns and transfer lessons beyond one particular case.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, economic theory can explain why an apparently successful policy may fail under different incentives.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Theory makes one policy case useful beyond the conditions that produced it.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, theory can become detached from reality when never tested.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the second option offers the stronger starting point.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 In addition, the preliminary judgment should remain provisional.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, priority should go to the second choice while the first plays a supporting role.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

90 words

Theory should guide attention, while experience tests, refines, and sometimes overturns theory. First, practice reveals uncertainty, resistance, and human variation that simplified explanations often omit. For example, a medical student learns from real patients that symptoms rarely follow textbook descriptions perfectly. However, a framework helps learners identify patterns and transfer lessons beyond one particular case. For instance, economic theory can explain why an apparently successful policy may fail under different incentives. A sound approach is to use theory to guide attention and experience to challenge, refine, and sometimes replace theory.

S1 Theory should guide attention, while experience tests, refines, and sometimes overturns theory.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, practice reveals uncertainty, resistance, and human variation that simplified explanations often omit.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a medical student learns from real patients that symptoms rarely follow textbook descriptions perfectly.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, a framework helps learners identify patterns and transfer lessons beyond one particular case.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, economic theory can explain why an apparently successful policy may fail under different incentives.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 A sound approach is to use theory to guide attention and experience to challenge, refine, and sometimes replace theory.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

内容・論理 10	問いに答え、理由と具体例が主張を支えているか。
構成 5	主張→理由→例→結論が自然につながるか。
文法 5	主語・動詞、時制、冠詞、単複、修飾関係が正確か。
語彙・表現 3	文脈に合う動詞・連語を用い、不必要な反復を避けたか。
自然さ 2	英語として読みやすく、極端な直訳がないか。

自己添削：最初と最後の文だけを読んで主張が一致しているか、各文の先頭を追って論理の流れが見えるか、具体例が理由の説明になっているかを確認する。

OPINION | 90-100 WORDS

学校制服

学校制服は、生徒に着用を義務づけるべきだ、という意見について論じなさい。

ANSWER A

中心主張

School uniforms can be justified when they are affordable and flexible

主な理由

common clothing reduces visible economic competition and simplifies daily decisions

ANSWER B

中心主張

Students should normally be free to choose their own clothes

主な理由

personal appearance is a harmless area in which young people can exercise judgment and self-expression

ANSWER C

統合の方向

to set broad standards for safety and appropriateness while avoiding expensive or excessively detailed uniforms

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

93 words

School uniforms can be justified when they are affordable and flexible. The main reason is that common clothing reduces visible economic competition and simplifies daily decisions. For example, students may focus less on brands when basic dress is shared. A shared baseline can reduce status display without erasing every personal choice. Admittedly, uniform rules can suppress identity and impose unnecessary costs. Yet the proposal remains defensible if implementation is cautious. Conditions differ across students and costs, so uniform rules may fail. Taken together, the change should proceed under safeguards and clearly defined exceptions.

S1 School uniforms can be justified when they are affordable and flexible.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that common clothing reduces visible economic competition and simplifies daily decisions.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, students may focus less on brands when basic dress is shared.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 A shared baseline can reduce status display without erasing every personal choice.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, uniform rules can suppress identity and impose unnecessary costs.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the proposal remains defensible if implementation is cautious.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Conditions differ across students and costs, so uniform rules may fail.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Taken together, the change should proceed under safeguards and clearly defined exceptions.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

91 words

Students should normally be free to choose their own clothes. This is mainly because personal appearance is a harmless area in which young people can exercise judgment and self-expression. For instance, learning to dress appropriately for different contexts is itself a useful social skill. Choice in clothing can become supervised practice in social judgment. Certainly, fashion pressure can create distraction and inequality. Yet the case for broad reform remains unproven. Beyond the present case, the preliminary judgment should remain provisional. Taken together, narrow exceptions are preferable to an immediate universal shift.

S1

Students should normally be free to choose their own clothes.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2

This is mainly because personal appearance is a harmless area in which young people can exercise judgment and self-expression.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3

For instance, learning to dress appropriately for different contexts is itself a useful social skill.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4

Choice in clothing can become supervised practice in social judgment.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5

Certainly, fashion pressure can create distraction and inequality.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6

Yet the case for broad reform remains unproven.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7

Beyond the present case, the preliminary judgment should remain provisional.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8

Taken together, narrow exceptions are preferable to an immediate universal shift.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

98 words

Schools need broad standards for safety and affordability, not rigid control of appearance. First, common clothing reduces visible economic competition and simplifies daily decisions. For example, students may focus less on brands when basic dress is shared. However, personal appearance is a harmless area in which young people can exercise judgment and self-expression. For instance, learning to dress appropriately for different contexts is itself a useful social skill. A workable balance is to set broad standards for safety and appropriateness while avoiding expensive or excessively detailed uniforms. This balance respects real differences among students, costs, and school settings.

S1 Schools need broad standards for safety and affordability, not rigid control of appearance.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, common clothing reduces visible economic competition and simplifies daily decisions.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, students may focus less on brands when basic dress is shared.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, personal appearance is a harmless area in which young people can exercise judgment and self-expression.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, learning to dress appropriately for different contexts is itself a useful social skill.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 A workable balance is to set broad standards for safety and appropriateness while avoiding expensive or excessively detailed uniforms.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among students, costs, and school settings.

射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

ABSTRACT | 90-100 WORDS

仕事の意味

仕事に意味を与えるものは何だと思うか。

ANSWER A

中心主張

Work becomes meaningful when people can see whom or what their effort serves

主な理由

a visible connection between action and benefit creates responsibility and pride

ANSWER B

中心主張

Meaningful work depends primarily on autonomy and personal development

主な理由

people value tasks that allow judgment, skill, and growth rather than mere obedience

ANSWER C

統合の方向

to seek work that combines contribution, competent agency, fair conditions, and room for growth

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

92 words

Work becomes meaningful when people can see whom or what their effort serves. The main reason is that a visible connection between action and benefit creates responsibility and pride. For example, a cleaner may find meaning in making a hospital safer for vulnerable patients. The cleaner can connect a routine task with a concrete human benefit. Admittedly, social value does not remove unfair pay or exhausting conditions. Yet the account still captures an essential feature, without making the concept absolute. Taken together, this account is stronger than a simple or absolute definition.

S1 Work becomes meaningful when people can see whom or what their effort serves.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that a visible connection between action and benefit creates responsibility and pride.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a cleaner may find meaning in making a hospital safer for vulnerable patients.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The cleaner can connect a routine task with a concrete human benefit.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, social value does not remove unfair pay or exhausting conditions.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the account still captures an essential feature, without making the concept absolute.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, this account is stronger than a simple or absolute definition.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

94 words

Meaningful work depends primarily on autonomy and personal development. This is mainly because people value tasks that allow judgment, skill, and growth rather than mere obedience. For instance, a craft worker may gain satisfaction from gradually mastering difficult techniques. Mastery gives the worker agency, progress, and a reason to care about quality. Certainly, personal fulfillment can exist in work that offers little benefit to others. Yet the broader account explains something the first one misses. The balance may reasonably differ across workers and tasks. Taken together, a broader account explains the evidence more convincingly.

S1 Meaningful work depends primarily on autonomy and personal development.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because people value tasks that allow judgment, skill, and growth rather than mere obedience.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a craft worker may gain satisfaction from gradually mastering difficult techniques.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Mastery gives the worker agency, progress, and a reason to care about quality.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, personal fulfillment can exist in work that offers little benefit to others.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the broader account explains something the first one misses.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The balance may reasonably differ across workers and tasks.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Taken together, a broader account explains the evidence more convincingly.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

96 words

Meaningful work combines social contribution, personal agency, fair conditions, and room for growth. First, a visible connection between action and benefit creates responsibility and pride. For example, a cleaner may find meaning in making a hospital safer for vulnerable patients. However, people value tasks that allow judgment, skill, and growth rather than mere obedience. For instance, a craft worker may gain satisfaction from gradually mastering difficult techniques. The better synthesis is to seek work that combines contribution, competent agency, fair conditions, and room for growth. This balance respects real differences among workers, tasks, and employment conditions.

S1 Meaningful work combines social contribution, personal agency, fair conditions, and room for growth.

COMPARISON | 90-100 WORDS

匿名性が説明責任か

インターネット上では、匿名性の保護と発言者の説明責任のどちらを優先すべきだと思うか。

ANSWER A

中心主張

Online anonymity deserves strong protection

主な理由

people need safe spaces to discuss illness, discrimination, political fear, and personal crisis

ANSWER B

中心主張

Accountability should take priority in public online debate

主な理由

speakers influence reputations and decisions and should bear consequences for deliberate abuse

ANSWER C

統合の方向

to preserve public pseudonyms while using confidential verification and fair procedures for serious misconduct

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Online anonymity deserves strong protection. The main reason is that people need safe spaces to discuss illness, discrimination, political fear, and personal crisis. For example, a victim may ask for help only when legal identity is hidden from the public. Public anonymity can be the condition that makes truthful help-seeking possible. Admittedly, anonymity can make harassment and deception easier. Yet the first option offers the stronger starting point. The criteria should be explicit and applied consistently across speakers and risks. Taken together, priority should go to the first choice, with room for justified exceptions.

S1 Online anonymity deserves strong protection.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that people need safe spaces to discuss illness, discrimination, political fear, and personal crisis.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a victim may ask for help only when legal identity is hidden from the public.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Public anonymity can be the condition that makes truthful help-seeking possible.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Taken together, priority should go to the first choice, with room for justified exceptions.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

100 words

Accountability should take priority in public online debate. This is mainly because speakers influence reputations and decisions and should bear consequences for deliberate abuse. For instance, verified authorship makes coordinated false campaigns harder to organize. Verified authorship raises the cost of coordinated deception without banning disagreement. Certainly, mandatory identification can silence people facing real danger. Yet the second option offers the stronger starting point. Implementation will determine the real effects on speakers and risks. The choice should remain open to revision as circumstances change. Taken together, priority should go to the second choice while the first plays a supporting role.

S1 Accountability should take priority in public online debate.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because speakers influence reputations and decisions and should bear consequences for deliberate abuse.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

MODEL A

90 words

Companies should experiment with a four-day working week without automatic pay cuts. The main reason is that rested employees may concentrate better, waste less time, and remain in their jobs longer. For example, some offices have maintained output by reducing unnecessary meetings and interruptions. Fewer interruptions can convert shorter hours into more concentrated work. Admittedly, hospitals, shops, and small firms cannot compress every task easily. Despite that, the proposal remains defensible if implementation is cautious, under continuing public review. Overall, the change should proceed under safeguards and clearly defined exceptions.

S1 Companies should experiment with a four-day working week without automatic pay cuts.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that rested employees may concentrate better, waste less time, and remain in their jobs longer.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, some offices have maintained output by reducing unnecessary meetings and interruptions.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Fewer interruptions can convert shorter hours into more concentrated work.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, hospitals, shops, and small firms cannot compress every task easily.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the proposal remains defensible if implementation is cautious, under continuing public review.

S7 Overall, the change should proceed under safeguards and clearly defined exceptions.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

90 words

A universal four-day week would be impractical and unfair. This is mainly because productivity gains differ greatly across industries, jobs, and levels of staffing. For instance, a factory that must operate continuously may need more employees and much higher costs. Continuous production shows why the same schedule cannot fit every workplace. Certainly, long hours can damage health and productivity. Despite that, the case for broad reform remains unproven. The criteria should be explicit and applied consistently across industries and jobs. Overall, narrow exceptions are preferable to an immediate universal shift.

- S1** A universal four-day week would be impractical and unfair.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because productivity gains differ greatly across industries, jobs, and levels of staffing.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, a factory that must operate continuously may need more employees and much higher costs.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Continuous production shows why the same schedule cannot fit every workplace.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Despite that, the case for broad reform remains unproven.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across industries and jobs.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Overall, narrow exceptions are preferable to an immediate universal shift.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

100 words

A four-day week should be tested by industry and judged through output, health, service, and cost. First, rested employees may concentrate better, waste less time, and remain in their jobs longer. For example, some offices have maintained output by reducing unnecessary meetings and interruptions. However, productivity gains differ greatly across industries, jobs, and levels of staffing. For instance, a factory that must operate continuously may need more employees and much higher costs. We should permit industry-specific trials and judge them by output, worker health, service quality, and total cost. This balance respects real differences among industries, jobs, and staffing models.

- S1** A four-day week should be tested by industry and judged through output, health, service, and cost.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, rested employees may concentrate better, waste less time, and remain in their jobs longer.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, some offices have maintained output by reducing unnecessary meetings and interruptions.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, productivity gains differ greatly across industries, jobs, and levels of staffing.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, a factory that must operate continuously may need more employees and much higher costs.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** We should permit industry-specific trials and judge them by output, worker health, service quality, and total cost.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among industries, jobs, and staffing models.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

自然さ 2	英語として読みやすく、極端な直訳がないか。

自己添削：最初と最後の文だけを読んで主張が一致しているか、各文の先頭を追って論理の流れが見えるか、具体例が理由の説明になっているかを確認する。

ABSTRACT | 90-100 WORDS

沈黙という伝達

沈黙は、言葉と同じように意思を伝えることができるだろうか。

ANSWER A

中心主張

Silence can communicate powerfully because it changes the meaning of the surrounding situation

主な理由

refusal to answer may express grief, protest, uncertainty, or distrust more clearly than a prepared sentence

ANSWER B

中心主張

Silence should not be treated as reliable communication

主な理由

listeners often project their own expectations onto what has not been said

ANSWER C

統合の方向

to recognize silence as meaningful evidence while avoiding confident conclusions without further context

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

91 words

Silence can communicate powerfully because it changes the meaning of the surrounding situation. The main reason is that refusal to answer may express grief, protest, uncertainty, or distrust more clearly than a prepared sentence. For example, a minute of silence publicly acknowledges a loss that ordinary speech may cheapen. The silence gains meaning from the shared loss and the public setting. Admittedly, silence is easily misinterpreted because it lacks explicit content. Despite that, the account still captures an essential feature. Overall, this account is stronger than a simple or absolute definition.

S1 Silence can communicate powerfully because it changes the meaning of the surrounding situation.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that refusal to answer may express grief, protest, uncertainty, or distrust more clearly than a prepared sentence.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a minute of silence publicly acknowledges a loss that ordinary speech may cheapen.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The silence gains meaning from the shared loss and the public setting.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, silence is easily misinterpreted because it lacks explicit content.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the account still captures an essential feature.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Overall, this account is stronger than a simple or absolute definition.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

96 words

Silence should not be treated as reliable communication. This is mainly because listeners often project their own expectations onto what has not been said. For instance, one person may read respect into silence while another experiences rejection. Without clarification, silence reflects the listener's assumptions as much as the speaker's. Certainly, words also fail, but they allow clarification and correction. Despite that, the broader account explains something the first one misses. In addition, later consequences may alter the result. The balance may reasonably differ across relationships and settings. Overall, a broader account explains the evidence more convincingly.

S1 Silence should not be treated as reliable communication.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because listeners often project their own expectations onto what has not been said.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, one person may read respect into silence while another experiences rejection.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Without clarification, silence reflects the listener's assumptions as much as the speaker's.

S5 Certainly, words also fail, but they allow clarification and correction.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the broader account explains something the first one misses.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 In addition, later consequences may alter the result.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 The balance may reasonably differ across relationships and settings.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S9 Overall, a broader account explains the evidence more convincingly.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

98 words

Silence can be meaningful evidence, but its interpretation requires context and restraint. First, refusal to answer may express grief, protest, uncertainty, or distrust more clearly than a prepared sentence. For example, a minute of silence publicly acknowledges a loss that ordinary speech may cheapen. However, listeners often project their own expectations onto what has not been said. For instance, one person may read respect into silence while another experiences rejection. A sound approach is to recognize silence as meaningful evidence while avoiding confident conclusions without further context. This balance respects real differences among relationships, settings, and possible intentions.

S1 Silence can be meaningful evidence, but its interpretation requires context and restraint.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, refusal to answer may express grief, protest, uncertainty, or distrust more clearly than a prepared sentence.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a minute of silence publicly acknowledges a loss that ordinary speech may cheapen.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, listeners often project their own expectations onto what has not been said.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, one person may read respect into silence while another experiences rejection.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 A sound approach is to recognize silence as meaningful evidence while avoiding confident conclusions without further context.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among relationships, settings, and possible intentions.

射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

国際共通語か言語多様性か

国際交流では、一つの共通語の普及と多様な言語の保護のどちらを優先すべきだと思うか。

ANSWER A

中心主張

A widely shared international language greatly expands practical communication

主な理由

people can exchange research, coordinate emergencies, and form relationships without waiting for perfect translation

ANSWER B

中心主張

Protecting linguistic diversity should take priority

主な理由

languages carry local knowledge, historical memory, humor, and forms of social identity

ANSWER C

統合の方向

to teach a common additional language while supporting education, media, and public life in local languages

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

96 words

A widely shared international language greatly expands practical communication. The main reason is that people can exchange research, coordinate emergencies, and form relationships without waiting for perfect translation. For example, a common working language allows students from many countries to study together. A common working language turns international contact into direct collaboration. Admittedly, dominant languages can marginalize other ways of thinking and remembering. Despite that, the first option offers the stronger starting point. This effect on communities and domains is easy to overlook. Overall, priority should go to the first choice, with room for justified exceptions.

S1 A widely shared international language greatly expands practical communication.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that people can exchange research, coordinate emergencies, and form relationships without waiting for perfect translation.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a common working language allows students from many countries to study together.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 A common working language turns international contact into direct collaboration.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, dominant languages can marginalize other ways of thinking and remembering.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the first option offers the stronger starting point.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 This effect on communities and domains is easy to overlook.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Overall, priority should go to the first choice, with room for justified exceptions.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

97 words

Protecting linguistic diversity should take priority. This is mainly because languages carry local knowledge, historical memory, humor, and forms of social identity. For instance, when a language disappears, ecological knowledge encoded in its vocabulary may disappear with it. The ecological vocabulary shows that a language stores knowledge, not just labels. Certainly, communication across groups becomes harder without a shared language. Despite that, the second option offers the stronger starting point. The criteria should be explicit and applied consistently across communities and domains. Overall, priority should go to the second choice while the first plays a supporting role.

- S1** Protecting linguistic diversity should take priority.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because languages carry local knowledge, historical memory, humor, and forms of social identity.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, when a language disappears, ecological knowledge encoded in its vocabulary may disappear with it.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** The ecological vocabulary shows that a language stores knowledge, not just labels.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Certainly, communication across groups becomes harder without a shared language.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Despite that, the second option offers the stronger starting point.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across communities and domains.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Overall, priority should go to the second choice while the first plays a supporting role.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

91 words

A common additional language should coexist with strong public life in local languages. First, people can exchange research, coordinate emergencies, and form relationships without waiting for perfect translation. For example, a common working language allows students from many countries to study together. However, languages carry local knowledge, historical memory, humor, and forms of social identity. For instance, when a language disappears, ecological knowledge encoded in its vocabulary may disappear with it. A workable balance is to teach a common additional language while supporting education, media, and public life in local languages.

S1 A common additional language should coexist with strong public life in local languages.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, people can exchange research, coordinate emergencies, and form relationships without waiting for perfect translation.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a common working language allows students from many countries to study together.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, languages carry local knowledge, historical memory, humor, and forms of social identity.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, when a language disappears, ecological knowledge encoded in its vocabulary may disappear with it.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 A workable balance is to teach a common additional language while supporting education, media, and public life in local languages.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

歴史教育

高校では、すべての生徒に歴史を必修科目として学ばせるべきだ、という意見について論じなさい。

ANSWER A

中心主張

History should remain compulsory in upper secondary education

主な理由

citizens need evidence-based knowledge of how institutions, conflicts, and identities were formed

ANSWER B

中心主張

Students should have more freedom to choose whether to study history

主な理由

compulsory courses often encourage memorization without creating lasting understanding

ANSWER C

統合の方向

to require a focused core course that emphasizes evidence, interpretation, and connections with current issues

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

92 words

History should remain compulsory in upper secondary education. The main reason is that citizens need evidence-based knowledge of how institutions, conflicts, and identities were formed. For example, understanding earlier propaganda can help students evaluate political claims in the present. Historical comparison equips students to test present claims against documented patterns. Admittedly, a crowded curriculum limits time for other important subjects. On balance, the proposal remains defensible if implementation is cautious. Conditions differ across students and curricula, so uniform rules may fail. Accordingly, the change should proceed under safeguards and clearly defined exceptions.

- S1** History should remain compulsory in upper secondary education.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that citizens need evidence-based knowledge of how institutions, conflicts, and identities were formed.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, understanding earlier propaganda can help students evaluate political claims in the present.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** On balance, the proposal remains defensible if implementation is cautious.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** Conditions differ across students and curricula, so uniform rules may fail.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Accordingly, the change should proceed under safeguards and clearly defined exceptions.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

92 words

Students should have more freedom to choose whether to study history. This is mainly because compulsory courses often encourage memorization without creating lasting understanding. For instance, a motivated elective class may investigate sources more deeply than a large required course. Voluntary inquiry may produce deeper source analysis than compulsory memorization. Certainly, leaving history optional could widen civic ignorance and social division. On balance, the case for broad reform remains unproven. The criteria should be explicit and applied consistently across students and curricula. Accordingly, narrow exceptions are preferable to an immediate universal shift.

S1 Students should have more freedom to choose whether to study history.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because compulsory courses often encourage memorization without creating lasting understanding.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a motivated elective class may investigate sources more deeply than a large required course.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Voluntary inquiry may produce deeper source analysis than compulsory memorization.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, leaving history optional could widen civic ignorance and social division.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the case for broad reform remains unproven.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across students and curricula.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Accordingly, narrow exceptions are preferable to an immediate universal shift.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

98 words

History should remain a focused core subject centered on evidence and present relevance. First, citizens need evidence-based knowledge of how institutions, conflicts, and identities were formed. For example, understanding earlier propaganda can help students evaluate political claims in the present. However, compulsory courses often encourage memorization without creating lasting understanding. For instance, a motivated elective class may investigate sources more deeply than a large required course. The better synthesis is to require a focused core course that emphasizes evidence, interpretation, and connections with current issues. This balance respects real differences among students, curricula, and forms of historical study.

ABSTRACT | 90-100 WORDS

進歩と喪失

何かを失うことなく、社会が進歩することは可能だろうか。

ANSWER A

中心主張

Most forms of progress involve some loss because resources, habits, and attention are limited

主な理由

a new system replaces older skills and changes relationships even when the overall result is beneficial

ANSWER B

中心主張

Progress does not necessarily require meaningful loss

主な理由

careful design can preserve valuable practices while removing avoidable suffering and inefficiency

ANSWER C

統合の方向

to evaluate progress by identifying losses openly and protecting what has continuing value

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

91 words

Most forms of progress involve some loss because resources, habits, and attention are limited. The main reason is that a new system replaces older skills and changes relationships even when the overall result is beneficial. For example, online maps improve navigation while weakening familiarity with local routes. Convenience is gained, but a practiced form of local knowledge fades. Admittedly, not every loss is serious or irreversible. On balance, the account still captures an essential feature, without making the concept absolute. Accordingly, this account is stronger than a simple or absolute definition.

S1 Most forms of progress involve some loss because resources, habits, and attention are limited.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that a new system replaces older skills and changes relationships even when the overall result is beneficial.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, online maps improve navigation while weakening familiarity with local routes.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Convenience is gained, but a practiced form of local knowledge fades.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, not every loss is serious or irreversible.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the account still captures an essential feature, without making the concept absolute.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Accordingly, this account is stronger than a simple or absolute definition.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

99 words

Progress does not necessarily require meaningful loss. This is mainly because careful design can preserve valuable practices while removing avoidable suffering and inefficiency. For instance, digital archives can widen access while protecting fragile original documents. Digitization can add access while preserving the object that carries historical value. Certainly, preservation efforts may still alter how a tradition is used. On balance, the broader account explains something the first one misses. Practical effects on technologies and practices matter as much as the principle. The balance may reasonably differ across technologies and practices. Accordingly, a broader account explains the evidence more convincingly.

| S9 | Accordingly, a broader account explains the evidence more convincingly.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

95 words

Progress deserves support only after its losses are identified and continuing value is protected. First, a new system replaces older skills and changes relationships even when the overall result is beneficial. For example, online maps improve navigation while weakening familiarity with local routes. However, careful design can preserve valuable practices while removing avoidable suffering and inefficiency. For instance, digital archives can widen access while protecting fragile original documents. In practice, we should evaluate progress by identifying losses openly and protecting what has continuing value. This balance respects real differences among technologies, practices, and affected communities.

- S1** Progress deserves support only after its losses are identified and continuing value is protected.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, a new system replaces older skills and changes relationships even when the overall result is beneficial.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, online maps improve navigation while weakening familiarity with local routes.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, careful design can preserve valuable practices while removing avoidable suffering and inefficiency.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, digital archives can widen access while protecting fragile original documents.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** In practice, we should evaluate progress by identifying losses openly and protecting what has continuing value.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among technologies, practices, and affected communities.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

内容・論理 10	問いに答え、理由と具体例が主張を支えているか。
構成 5	主張→理由→例→結論が自然につながるか。
文法 5	主語・動詞、時制、冠詞、単複、修飾関係が正確か。
語彙・表現 3	文脈に合う動詞・連語を用い、不必要な反復を避けたか。
自然さ 2	英語として読みやすく、極端な直訳がないか。

自己添削：最初と最後の文だけを読んで主張が一致しているか、各文の先頭を追って論理の流れが見えるか、具体例が理由の説明になっているかを確認する。

COMPARISON | 90-100 WORDS

大学の門戸か卓越性か

大学は、より多くの人に学ぶ機会を提供することと、少数の学生に高度な教育を集中することのどちらを優先すべきか。

ANSWER A

中心主張

Universities should prioritize broad access to higher education

主な理由

talent is widely distributed, while opportunity is often shaped by income and geography

ANSWER B

中心主張

Universities should protect intensive education for students prepared for advanced study

主な理由

high-level programs require demanding standards, close supervision, and concentrated resources

ANSWER C

統合の方向

to guarantee broad routes into higher education while reserving advanced programs for demonstrated preparation rather than social background

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Universities should prioritize broad access to higher education. The main reason is that talent is widely distributed, while opportunity is often shaped by income and geography. For example, flexible admission and financial support can reveal ability that conventional routes overlook. Support and flexible routes can uncover ability that privilege had hidden. Admittedly, rapid expansion can weaken teaching if resources do not grow. On balance, the first option offers the stronger starting point. The balance may reasonably differ across students and programs. Accordingly, priority should go to the first choice, with room for justified exceptions.

| S7 | The balance may reasonably differ across students and programs.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。 |
| S8 | Accordingly, priority should go to the first choice, with room for justified exceptions.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。 |

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

97 words

Universities should protect intensive education for students prepared for advanced study. This is mainly because high-level programs require demanding standards, close supervision, and concentrated resources. For instance, a small laboratory course may provide training impossible in a crowded lecture. Laboratory training shows why some forms of excellence require small-scale instruction. Certainly, exclusive systems can confuse prior privilege with academic potential. On balance, the second option offers the stronger starting point. The criteria should be explicit and applied consistently across students and programs. Accordingly, priority should go to the second choice while the first plays a supporting role.

S1 Universities should protect intensive education for students prepared for advanced study.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because high-level programs require demanding standards, close supervision, and concentrated resources.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a small laboratory course may provide training impossible in a crowded lecture.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Laboratory training shows why some forms of excellence require small-scale instruction.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, exclusive systems can confuse prior privilege with academic potential.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the second option offers the stronger starting point.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across students and programs.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Accordingly, priority should go to the second choice while the first plays a supporting role.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

99 words

Higher education should widen entry while reserving advanced programs for demonstrated preparation. First, talent is widely distributed, while opportunity is often shaped by income and geography. For example, flexible admission and financial support can reveal ability that conventional routes overlook. However, high-level programs require demanding standards, close supervision, and concentrated resources. For instance, a small laboratory course may provide training impossible in a crowded lecture. The strongest policy is to guarantee broad routes into higher education while reserving advanced programs for demonstrated preparation rather than social background. This balance respects real differences among students, programs, and levels of preparation.

S1 Higher education should widen entry while reserving advanced programs for demonstrated preparation.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, talent is widely distributed, while opportunity is often shaped by income and geography.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, flexible admission and financial support can reveal ability that conventional routes overlook.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, high-level programs require demanding standards, close supervision, and concentrated resources.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

OPINION | 90-100 WORDS

観光客数の制限

人気観光地は、訪問者数を制限すべきだ、という意見について論じなさい。

ANSWER A

中心主張

Popular destinations should limit visitor numbers when tourism threatens local life or cultural sites

主な理由

uncontrolled crowds can damage fragile places, raise housing costs, and overwhelm public services

ANSWER B

中心主張

Visitor caps should be used only as a last resort

主な理由

tourism supports employment and allows cultural exchange beyond a privileged few

ANSWER C

統合の方向

to use transparent capacity limits where evidence shows irreversible damage and invest the revenue locally

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

91 words

Popular destinations should limit visitor numbers when tourism threatens local life or cultural sites. The main reason is that uncontrolled crowds can damage fragile places, raise housing costs, and overwhelm public services. For example, timed entry has protected some historic sites while preserving a better experience for visitors. Timed entry protects the site precisely by controlling pressure at peak times. Admittedly, limits may reduce income and favor wealthy travelers. Even so, the expected gains still justify a controlled trial. For these reasons, careful implementation is more persuasive than abandoning the proposal.

S1 Popular destinations should limit visitor numbers when tourism threatens local life or cultural sites.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that uncontrolled crowds can damage fragile places, raise housing costs, and overwhelm public services.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, timed entry has protected some historic sites while preserving a better experience for visitors.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Timed entry protects the site precisely by controlling pressure at peak times.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, limits may reduce income and favor wealthy travelers.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the expected gains still justify a controlled trial.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 For these reasons, careful implementation is more persuasive than abandoning the proposal.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

99 words

Visitor caps should be used only as a last resort. This is mainly because tourism supports employment and allows cultural exchange beyond a privileged few. For instance, better transport, pricing, and seasonal distribution may reduce pressure without excluding people. Better distribution can preserve access while addressing the causes of overcrowding. Certainly, management measures may fail when demand is extremely concentrated. Even so, the benefit does not settle the policy question. The criteria should be explicit and applied consistently across destinations and residents. For these reasons, advocates of expansion still bear the burden of proving that the risks are manageable.

- S1** Visitor caps should be used only as a last resort.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because tourism supports employment and allows cultural exchange beyond a privileged few.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, better transport, pricing, and seasonal distribution may reduce pressure without excluding people.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Better distribution can preserve access while addressing the causes of overcrowding.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Certainly, management measures may fail when demand is extremely concentrated.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Even so, the benefit does not settle the policy question.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across destinations and residents.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** For these reasons, advocates of expansion still bear the burden of proving that the risks are manageable.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

98 words

Visitor caps are justified where evidence shows irreversible damage and revenues support local communities. First, uncontrolled crowds can damage fragile places, raise housing costs, and overwhelm public services. For example, timed entry has protected some historic sites while preserving a better experience for visitors. However, tourism supports employment and allows cultural exchange beyond a privileged few. For instance, better transport, pricing, and seasonal distribution may reduce pressure without excluding people. We should use transparent capacity limits where evidence shows irreversible damage and invest the revenue locally. This balance respects real differences among destinations, residents, and kinds of visitor.

ABSTRACT | 90-100 WORDS

情報と知恵

多くの情報を持っていることは、賢明であることと同じだろうか。

ANSWER A

中心主張

Possessing information is not the same as being wise

主な理由

wisdom requires selecting relevant facts, recognizing uncertainty, and considering human consequences

ANSWER B

中心主張

Greater access to information can substantially improve wisdom

主な理由

poor decisions often result from ignorance, narrow experience, or false assumptions

ANSWER C

統合の方向

to understand wisdom as disciplined judgment that organizes knowledge around purposes, limits, and consequences

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

96 words

Possessing information is not the same as being wise. The main reason is that wisdom requires selecting relevant facts, recognizing uncertainty, and considering human consequences. For example, a person may know every statistic about a policy yet ignore whose lives the averages conceal. Facts remain insufficient when averages hide the people affected by a decision. Admittedly, sound judgment still depends on accurate information. Even so, this objection refines rather than overturns the claim. Beyond the current case, later costs must also be considered. For these reasons, the distinction remains useful once its limits are made explicit.

S1 Possessing information is not the same as being wise.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that wisdom requires selecting relevant facts, recognizing uncertainty, and considering human consequences.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a person may know every statistic about a policy yet ignore whose lives the averages conceal.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Facts remain insufficient when averages hide the people affected by a decision.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, sound judgment still depends on accurate information.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, this objection refines rather than overturns the claim.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Beyond the current case, later costs must also be considered.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 For these reasons, the distinction remains useful once its limits are made explicit.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

100 words

Greater access to information can improve wisdom. This is because poor decisions often result from ignorance, narrow experience, or false assumptions. For instance, reliable health information enables families to compare risks instead of relying on rumor. Reliable evidence can replace rumor with comparisons that support sound judgment. Certainly, information overload can reduce attention and encourage superficial reactions. Even so, the alternative requires a wider definition. Practical effects on decisions and sources matter as much as the principle. This effect on decisions and sources is easy to overlook. The alternative view exposes a limit that the initial definition cannot safely ignore.

- S1** Greater access to information can improve wisdom.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is because poor decisions often result from ignorance, narrow experience, or false assumptions.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, reliable health information enables families to compare risks instead of relying on rumor.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Reliable evidence can replace rumor with comparisons that support sound judgment.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Even so, the alternative requires a wider definition.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** Practical effects on decisions and sources matter as much as the principle.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** This effect on decisions and sources is easy to overlook.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S9** The alternative view exposes a limit that the initial definition cannot safely ignore.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

98 words

Wisdom is judgment that organizes information around purposes, uncertainty, and human consequences. First, wisdom requires selecting relevant facts, recognizing uncertainty, and considering human consequences. For example, a person may know every statistic about a policy yet ignore whose lives the averages conceal. However, poor decisions often result from ignorance, narrow experience, or false assumptions. For instance, reliable health information enables families to compare risks instead of relying on rumor. A workable balance is to understand wisdom as disciplined judgment that organizes knowledge around purposes, limits, and consequences. This balance respects real differences among decisions, sources, and human consequences.

- S1** Wisdom is judgment that organizes information around purposes, uncertainty, and human consequences.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, wisdom requires selecting relevant facts, recognizing uncertainty, and considering human consequences.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, a person may know every statistic about a policy yet ignore whose lives the averages conceal.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, poor decisions often result from ignorance, narrow experience, or false assumptions.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, reliable health information enables families to compare risks instead of relying on rumor.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** A workable balance is to understand wisdom as disciplined judgment that organizes knowledge around purposes, limits, and consequences.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among decisions, sources, and human consequences.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

経済成長か環境保護か

政策を決める際、経済成長と環境保護のどちらを優先すべきだと思うか。

ANSWER A

中心主張

Environmental protection should take priority when damage may be irreversible

主な理由

economic gains lose meaning if they destroy health, ecosystems, and the resources on which future prosperity depends

ANSWER B

中心主張

Economic growth deserves priority in societies where basic needs remain unmet

主な理由

income, infrastructure, and employment give communities the capacity to invest in cleaner technology later

ANSWER C

統合の方向

to pursue growth within firm environmental limits while supporting people who bear the transition costs

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

92 words

Environmental protection should take priority when damage may be irreversible. The main reason is that economic gains lose meaning if they destroy health, ecosystems, and the resources on which future prosperity depends. For example, protecting a watershed may cost jobs temporarily but preserve water for an entire region. The watershed shows that environmental protection can secure the basis of future growth. Admittedly, strict rules can burden poorer households and workers. Even so, the first priority survives the stated objection. For these reasons, the first alternative deserves greater weight in most ordinary cases.

S1 Environmental protection should take priority when damage may be irreversible.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that economic gains lose meaning if they destroy health, ecosystems, and the resources on which future prosperity depends.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, protecting a watershed may cost jobs temporarily but preserve water for an entire region.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The watershed shows that environmental protection can secure the basis of future growth.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, strict rules can burden poorer households and workers.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the first priority survives the stated objection.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 For these reasons, the first alternative deserves greater weight in most ordinary cases.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

94 words

Economic growth deserves priority in societies where basic needs remain unmet. This is mainly because income, infrastructure, and employment give communities the capacity to invest in cleaner technology later. For instance, reliable electricity can improve health and education even when initial systems are imperfect. Basic infrastructure can expand the resources later available for environmental improvement. Certainly, growth based on severe pollution creates long-term costs. Even so, the second priority survives the stated objection. Over time, later costs must also be considered. For these reasons, the second alternative deserves greater weight in most ordinary cases.

S1 Economic growth deserves priority in societies where basic needs remain unmet.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because income, infrastructure, and employment give communities the capacity to invest in cleaner technology later.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, reliable electricity can improve health and education even when initial systems are imperfect.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Basic infrastructure can expand the resources later available for environmental improvement.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, growth based on severe pollution creates long-term costs.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Even so, the second priority survives the stated objection.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Over time, later costs must also be considered.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 For these reasons, the second alternative deserves greater weight in most ordinary cases.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

96 words

Development should proceed within firm environmental limits and support those bearing transition costs. First, economic gains lose meaning if they destroy health, ecosystems, and the resources on which future prosperity depends. For example, protecting a watershed may cost jobs temporarily but preserve water for an entire region. However, income, infrastructure, and employment give communities the capacity to invest in cleaner technology later. For instance, reliable electricity can improve health and education even when initial systems are imperfect. The better synthesis is to pursue growth within firm environmental limits while supporting people who bear the transition costs.

S1 Development should proceed within firm environmental limits and support those bearing transition costs.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, economic gains lose meaning if they destroy health, ecosystems, and the resources on which future prosperity depends.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, protecting a watershed may cost jobs temporarily but preserve water for an entire region.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, income, infrastructure, and employment give communities the capacity to invest in cleaner technology later.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, reliable electricity can improve health and education even when initial systems are imperfect.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 The better synthesis is to pursue growth within firm environmental limits while supporting people who bear the transition costs.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

選挙権年齢

選挙権年齢を16歳に引き下げるべきだ、という意見について論じなさい。

ANSWER A

中心主張

The voting age should be lowered to sixteen

主な理由

young people are directly affected by education, climate, debt, and long-term policy decisions

ANSWER B

中心主張

The voting age should remain eighteen

主な理由

a legal threshold should roughly reflect greater independence and responsibility for adult decisions

ANSWER C

統合の方向

to lower the age only alongside serious nonpartisan civic education and strong protection against coercion

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

93 words

The voting age should be lowered to sixteen. The main reason is that young people are directly affected by education, climate, debt, and long-term policy decisions. For example, voting while still in school can connect civic education with an actual public responsibility. Voting at school could turn civic knowledge into an immediate, accountable practice. Admittedly, political knowledge and independence vary greatly among teenagers. Still, the expected gains still justify a controlled trial. For a durable judgment, later costs must also be considered. On balance, careful implementation is more persuasive than abandoning the proposal.

S1 The voting age should be lowered to sixteen.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that young people are directly affected by education, climate, debt, and long-term policy decisions.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, voting while still in school can connect civic education with an actual public responsibility.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Voting at school could turn civic knowledge into an immediate, accountable practice.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, political knowledge and independence vary greatly among teenagers.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the expected gains still justify a controlled trial.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 For a durable judgment, later costs must also be considered.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, careful implementation is more persuasive than abandoning the proposal.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

98 words

The voting age should remain eighteen. This is mainly because a legal threshold should roughly reflect greater independence and responsibility for adult decisions. For instance, many sixteen-year-olds still depend heavily on family and school environments that may shape participation. Dependence on family and school can complicate claims of political independence. Certainly, older voters are not automatically informed or independent either. Still, the benefit does not settle the policy question. The criteria should be explicit and applied consistently across young voters and schools. On balance, advocates of expansion still bear the burden of proving that the risks are manageable.

S1 The voting age should remain eighteen.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because a legal threshold should roughly reflect greater independence and responsibility for adult decisions.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, many sixteen-year-olds still depend heavily on family and school environments that may shape participation.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Dependence on family and school can complicate claims of political independence.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, older voters are not automatically informed or independent either.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, the benefit does not settle the policy question.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across young voters and schools.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, advocates of expansion still bear the burden of proving that the risks are manageable.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

90 words

Lowering the voting age requires nonpartisan civic education and protection from coercion. First, young people are directly affected by education, climate, debt, and long-term policy decisions. For example, voting while still in school can connect civic education with an actual public responsibility. However, a legal threshold should roughly reflect greater independence and responsibility for adult decisions. For instance, many sixteen-year-olds still depend heavily on family and school environments that may shape participation. In practice, we should lower the age only alongside serious nonpartisan civic education and strong protection against coercion.

- S1** Lowering the voting age requires nonpartisan civic education and protection from coercion.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, young people are directly affected by education, climate, debt, and long-term policy decisions.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, voting while still in school can connect civic education with an actual public responsibility.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, a legal threshold should roughly reflect greater independence and responsibility for adult decisions.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, many sixteen-year-olds still depend heavily on family and school environments that may shape participation.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** In practice, we should lower the age only alongside serious nonpartisan civic education and strong protection against coercion.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

ABSTRACT | 90-100 WORDS

距離と理解

対象から距離を置くことは、それをより深く理解することにつながるだろうか。

ANSWER A

中心主張

Distance can improve understanding by reducing immediate emotion and habit

主な理由

time or physical separation makes patterns visible that daily involvement conceals

ANSWER B

中心主張

Close involvement is usually necessary for deep understanding

主な理由

repeated contact reveals complexity that detached observation easily simplifies

ANSWER C

統合の方向

to alternate between involvement and distance, using each perspective to correct the limits of the other

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Distance can improve understanding by reducing immediate emotion and habit. The main reason is that time or physical separation makes patterns visible that daily involvement conceals. For example, a traveler may recognize the distinctive assumptions of home only after living elsewhere. Distance makes familiar assumptions visible beside a different way of life. Admittedly, distance can remove details and responsibilities that insiders understand. Still, this objection refines rather than overturns the claim. A fuller assessment shows that later costs must also be considered. On balance, the distinction remains useful once its limits are made explicit.

S1 Distance can improve understanding by reducing immediate emotion and habit.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that time or physical separation makes patterns visible that daily involvement conceals.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a traveler may recognize the distinctive assumptions of home only after living elsewhere.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Distance makes familiar assumptions visible beside a different way of life.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, distance can remove details and responsibilities that insiders understand.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Still, this objection refines rather than overturns the claim.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 A fuller assessment shows that later costs must also be considered.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 On balance, the distinction remains useful once its limits are made explicit.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

100 words

Close involvement is usually necessary for deep understanding. This is because repeated contact reveals complexity that detached observation easily simplifies. For instance, a teacher who knows students over time can interpret silence more accurately than a distant evaluator. Long contact supplies context that a brief outside view cannot recover. Certainly, closeness can create loyalty and blind spots. Still, the alternative requires a wider definition. The criteria should be explicit and applied consistently across observers and relationships. A fuller assessment shows that later costs must also be considered. The alternative view exposes a limit that the initial definition cannot simply ignore.

- S1** Close involvement is usually necessary for deep understanding.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is because repeated contact reveals complexity that detached observation easily simplifies.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, a teacher who knows students over time can interpret silence more accurately than a distant evaluator.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Long contact supplies context that a brief outside view cannot recover.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Certainly, closeness can create loyalty and blind spots.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Still, the alternative requires a wider definition.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across observers and relationships.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** A fuller assessment shows that later costs must also be considered.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S9** The alternative view exposes a limit that the initial definition cannot simply ignore.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

98 words

Understanding improves when involvement and distance correct each other's blind spots. First, time or physical separation makes patterns visible that daily involvement conceals. For example, a traveler may recognize the distinctive assumptions of home only after living elsewhere. However, repeated contact reveals complexity that detached observation easily simplifies. For instance, a teacher who knows students over time can interpret silence more accurately than a distant evaluator. The strongest policy is to alternate between involvement and distance, using each perspective to correct the limits of the other. This balance respects real differences among observers, relationships, and periods of time.

S1 Understanding improves when involvement and distance correct each other's blind spots.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, time or physical separation makes patterns visible that daily involvement conceals.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a traveler may recognize the distinctive assumptions of home only after living elsewhere.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, repeated contact reveals complexity that detached observation easily simplifies.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a teacher who knows students over time can interpret silence more accurately than a distant evaluator.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 The strongest policy is to alternate between involvement and distance, using each perspective to correct the limits of the other.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

S7 This balance respects real differences among observers, relationships, and periods of time.

射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

MODEL A

91 words

Remembering past failures is essential for responsible progress. The main reason is that specific memory prevents people from repeating comfortable explanations and avoidable mistakes. For example, an engineering team must preserve the causes of an accident rather than merely promise improvement. Preserving causes converts failure from a warning into usable institutional knowledge. Admittedly, constant attention to failure can create fear and paralysis. Still, the first priority survives the stated objection. The balance may reasonably differ across people and institutions. On balance, the first alternative deserves greater weight in most ordinary cases.

MODEL B

94 words

Focusing on future possibilities is more productive. This is mainly because new goals encourage experimentation and prevent identity from being reduced to earlier mistakes. For instance, a student who failed once may improve only after imagining a different path forward. Imagining a future identity can release effort that shame had blocked. Certainly, optimism without memory can reproduce the same errors. Still, the second priority survives the stated objection, with room for individual exceptions. The balance may reasonably differ across people and institutions. On balance, the second alternative deserves greater weight in most ordinary cases.

- S1** Focusing on future possibilities is more productive.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because new goals encourage experimentation and prevent identity from being reduced to earlier mistakes.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, a student who failed once may improve only after imagining a different path forward.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Imagining a future identity can release effort that shame had blocked.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Certainly, optimism without memory can reproduce the same errors.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Still, the second priority survives the stated objection, with room for individual exceptions.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The balance may reasonably differ across people and institutions.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** On balance, the second alternative deserves greater weight in most ordinary cases.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

90 words

Responsible progress preserves lessons from failure while directing effort toward future action. First, specific memory prevents people from repeating comfortable explanations and avoidable mistakes. For example, an engineering team must preserve the causes of an accident rather than merely promise improvement. However, new goals encourage experimentation and prevent identity from being reduced to earlier mistakes. For instance, a student who failed once may improve only after imagining a different path forward. A sound approach is to preserve clear lessons from failure while directing emotional energy and planning toward future action.

S1 Responsible progress preserves lessons from failure while directing effort toward future action.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, specific memory prevents people from repeating comfortable explanations and avoidable mistakes.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, an engineering team must preserve the causes of an accident rather than merely promise improvement.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, new goals encourage experimentation and prevent identity from being reduced to earlier mistakes.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a student who failed once may improve only after imagining a different path forward.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 A sound approach is to preserve clear lessons from failure while directing emotional energy and planning toward future action.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

子ども向け広告

子どもを対象とする広告は、法律で厳しく規制すべきだ、という意見について論じなさい。

ANSWER A

中心主張

Advertising directed at young children should be strictly regulated

主な理由

children often cannot distinguish persuasion from neutral information or evaluate long-term consequences

ANSWER B

中心主張

Broad legal restrictions on children's advertising may be too difficult to define fairly

主な理由

educational products, entertainment, sponsorship, and ordinary information often overlap

ANSWER C

統合の方向

to prohibit manipulative techniques and hidden advertising while requiring clear labels and age-appropriate standards

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

93 words

Advertising directed at young children should be strictly regulated. The main reason is that children often cannot distinguish persuasion from neutral information or evaluate long-term consequences. For example, a game advertisement can turn social pressure into repeated demands for purchases. The game exploits social belonging before children can recognize the persuasive design. Admittedly, parents also have responsibility for media education and household choices. Yet the expected gains still justify a controlled trial. Beyond the current case, effects that emerge slowly deserve review. Taken together, careful implementation is more persuasive than abandoning the proposal.

S1 Advertising directed at young children should be strictly regulated.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that children often cannot distinguish persuasion from neutral information or evaluate long-term consequences.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a game advertisement can turn social pressure into repeated demands for purchases.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The game exploits social belonging before children can recognize the persuasive design.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, parents also have responsibility for media education and household choices.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the expected gains still justify a controlled trial.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Beyond the current case, effects that emerge slowly deserve review.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Taken together, careful implementation is more persuasive than abandoning the proposal.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

96 words

Broad legal restrictions on children's advertising may be too difficult to define fairly. This is mainly because educational products, entertainment, sponsorship, and ordinary information often overlap. For instance, a useful book recommendation could be restricted under rules written too widely. The book example shows how broad rules can suppress useful information. Certainly, companies should not exploit children's limited judgment. Yet the benefit does not settle the policy question. The criteria should be explicit and applied consistently across ages and media. Taken together, advocates of expansion still bear the burden of proving that the risks are manageable.

S1 Broad legal restrictions on children's advertising may be too difficult to define fairly.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because educational products, entertainment, sponsorship, and ordinary information often overlap.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a useful book recommendation could be restricted under rules written too widely.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The book example shows how broad rules can suppress useful information.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, companies should not exploit children's limited judgment.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the benefit does not settle the policy question.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across ages and media.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Taken together, advocates of expansion still bear the burden of proving that the risks are manageable.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

95 words

Law should ban manipulative techniques and hidden advertising while allowing clearly labeled information. First, children often cannot distinguish persuasion from neutral information or evaluate long-term consequences. For example, a game advertisement can turn social pressure into repeated demands for purchases. However, educational products, entertainment, sponsorship, and ordinary information often overlap. For instance, a useful book recommendation could be restricted under rules written too widely. A workable balance is to prohibit manipulative techniques and hidden advertising while requiring clear labels and age-appropriate standards. This balance respects real differences among ages, media, and kinds of commercial message.

- S1** Law should ban manipulative techniques and hidden advertising while allowing clearly labeled information.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, children often cannot distinguish persuasion from neutral information or evaluate long-term consequences.

ABSTRACT | 90-100 WORDS

忍耐は受動的か

忍耐することは、ただ受動的に待つことだろうか。

ANSWER A

中心主張

True patience is an active capacity rather than passive waiting

主な理由

it requires maintaining purpose, observing change, and choosing when not to react immediately

ANSWER B

中心主張

Patience often does involve valuable acceptance of what cannot presently be changed

主な理由

constant intervention may waste energy and create additional harm

ANSWER C

統合の方向

to define patience as disciplined delay combined with attention, preparation, and readiness to act

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

91 words

True patience is an active capacity rather than passive waiting. The main reason is that it requires maintaining purpose, observing change, and choosing when not to react immediately. For example, a researcher may repeat careful measurements while revising methods instead of demanding instant results. Repeated measurement makes waiting purposeful by joining restraint to continued inquiry. Admittedly, patience can become an excuse for avoiding necessary action. Yet this objection refines rather than overturns the claim, without making the concept absolute. Taken together, the distinction remains useful once its limits are made explicit.

S1 True patience is an active capacity rather than passive waiting.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that it requires maintaining purpose, observing change, and choosing when not to react immediately.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a researcher may repeat careful measurements while revising methods instead of demanding instant results.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Repeated measurement makes waiting purposeful by joining restraint to continued inquiry.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, patience can become an excuse for avoiding necessary action.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet this objection refines rather than overturns the claim, without making the concept absolute.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, the distinction remains useful once its limits are made explicit.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

100 words

Patience does involve valuable acceptance of what cannot presently be changed. This is mainly because constant intervention may waste energy and create additional harm. For instance, a person recovering from injury must allow biological processes time to work. Recovery shows that restraint can cooperate with processes that cannot be hurried. Certainly, acceptance without review can preserve injustice or error. Yet the alternative still requires a wider definition. Conditions differ across goals and changing conditions, so uniform rules may fail. Over time, effects that emerge slowly deserve review. The alternative view exposes a limit that the initial definition cannot fully ignore.

- S1** Patience does involve valuable acceptance of what cannot presently be changed.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because constant intervention may waste energy and create additional harm.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, a person recovering from injury must allow biological processes time to work.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Recovery shows that restraint can cooperate with processes that cannot be hurried.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Certainly, acceptance without review can preserve injustice or error.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Yet the alternative still requires a wider definition.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** Conditions differ across goals and changing conditions, so uniform rules may fail.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Over time, effects that emerge slowly deserve review.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S9** The alternative view exposes a limit that the initial definition cannot fully ignore.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

96 words

Patience is disciplined delay combined with attention, preparation, and readiness to act. First, it requires maintaining purpose, observing change, and choosing when not to react immediately. For example, a researcher may repeat careful measurements while revising methods instead of demanding instant results. However, constant intervention may waste energy and create additional harm. For instance, a person recovering from injury must allow biological processes time to work. The better synthesis is to define patience as disciplined delay combined with attention, preparation, and readiness to act. This balance respects real differences among goals, changing conditions, and possible actions.

- S1** Patience is disciplined delay combined with attention, preparation, and readiness to act.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, it requires maintaining purpose, observing change, and choosing when not to react immediately.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, a researcher may repeat careful measurements while revising methods instead of demanding instant results.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, constant intervention may waste energy and create additional harm.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, a person recovering from injury must allow biological processes time to work.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** The better synthesis is to define patience as disciplined delay combined with attention, preparation, and readiness to act.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among goals, changing conditions, and possible actions.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

個人の選択か専門家の助言か

重要な決定では、個人の選択と専門家の助言のどちらを優先すべきだと思うか。

ANSWER A

中心主張

Personal choice should have the final authority in decisions that shape an individual life

主な理由

experts provide evidence, but only the person concerned knows the values and risks they are willing to accept

ANSWER B

中心主張

Expert guidance should carry greater weight in highly technical decisions

主な理由

specialists understand probabilities, hidden constraints, and consequences that intuition may miss

ANSWER C

統合の方向

to let experts clarify evidence and options while preserving informed personal consent wherever others are not endangered

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

96 words

Personal choice should have the final authority in decisions that shape an individual life. The main reason is that experts provide evidence, but only the person concerned knows the values and risks they are willing to accept. For example, a patient may reasonably prefer quality of life to a treatment offering only a small extension. The patient's values determine which medical outcome counts as a benefit. Admittedly, people can misunderstand complex information or act under fear. Yet the first priority survives the stated objection. Taken together, the first alternative deserves greater weight in most ordinary cases.

S1 Personal choice should have the final authority in decisions that shape an individual life.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that experts provide evidence, but only the person concerned knows the values and risks they are willing to accept.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a patient may reasonably prefer quality of life to a treatment offering only a small extension.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 The patient's values determine which medical outcome counts as a benefit.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, people can misunderstand complex information or act under fear.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the first priority survives the stated objection.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, the first alternative deserves greater weight in most ordinary cases.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

91 words

Expert guidance should carry greater weight in highly technical decisions. This is mainly because specialists understand probabilities, hidden constraints, and consequences that intuition may miss. For instance, an engineer should determine whether a damaged bridge is safe rather than leave the judgment to public preference. Bridge safety requires technical judgment because error can endanger other people. Certainly, experts can have biases and may overlook personal values. Yet the second priority survives the stated objection, while justified exceptions remain possible. Taken together, the second alternative deserves greater weight in most ordinary cases.

S1 Expert guidance should carry greater weight in highly technical decisions.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because specialists understand probabilities, hidden constraints, and consequences that intuition may miss.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, an engineer should determine whether a damaged bridge is safe rather than leave the judgment to public preference.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Bridge safety requires technical judgment because error can endanger other people.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, experts can have biases and may overlook personal values.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Yet the second priority survives the stated objection, while justified exceptions remain possible.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Taken together, the second alternative deserves greater weight in most ordinary cases.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

90 words

Personal choice matters because experts offer evidence, but individuals know which risks they can accept, as new evidence becomes available. For example, a patient may reasonably prefer quality of life to a treatment offering only a small extension. However, specialists understand probabilities, hidden constraints, and consequences that intuition may miss. For instance, an engineer should determine whether a damaged bridge is safe rather than leave the judgment to public preference. In practice, we should let experts clarify evidence and options while preserving informed personal consent wherever others are not endangered.

- S1** Personal choice matters because experts offer evidence, but individuals know which risks they can accept, as new evidence becomes available.
統合方針＋根拠①。冒頭で結論の方向と第一の理由を同時に示す。
- S2** For example, a patient may reasonably prefer quality of life to a treatment offering only a small extension.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S3** However, specialists understand probabilities, hidden constraints, and consequences that intuition may miss.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S4** For instance, an engineer should determine whether a damaged bridge is safe rather than leave the judgment to public preference.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S5** In practice, we should let experts clarify evidence and options while preserving informed personal consent wherever others are not endangered.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

OPINION | 90-100 WORDS

安全保障とプライバシー

公共の安全を守るためなら、政府が個人のプライバシーをある程度制限することは許される、という意見について論じなさい。

ANSWER A

中心主張

Limited privacy restrictions can be justified when they prevent specific and serious threats

主な理由

public authorities need some power to investigate violence, organized crime, and immediate danger

ANSWER B

中心主張

Privacy should be protected even when broader surveillance promises greater security

主な理由

private space is necessary for thought, association, and opposition to authority

ANSWER C

統合の方向

to permit targeted, time-limited surveillance under independent judicial review and prohibit indiscriminate collection

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Limited privacy restrictions can be justified when they prevent specific and serious threats. The main reason is that public authorities need some power to investigate violence, organized crime, and immediate danger. For example, a warrant based on evidence may permit access to relevant communications in a kidnapping case. A warrant connects intrusion to evidence, a specific case, and independent authorization. Admittedly, surveillance powers tend to expand beyond their original purpose. Despite that, the expected gains still justify a controlled trial. Overall, careful implementation is more persuasive than abandoning the proposal.

- S1** Limited privacy restrictions can be justified when they prevent specific and serious threats.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that public authorities need some power to investigate violence, organized crime, and immediate danger.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, a warrant based on evidence may permit access to relevant communications in a kidnapping case.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** A warrant connects intrusion to evidence, a specific case, and independent authorization.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, surveillance powers tend to expand beyond their original purpose.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Despite that, the expected gains still justify a controlled trial.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** Overall, careful implementation is more persuasive than abandoning the proposal.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

96 words

Privacy should be protected even when broader surveillance promises greater security. This is mainly because private space is necessary for thought, association, and opposition to authority. For instance, mass data collection can expose innocent people without demonstrating that it prevents harm. Mass collection weakens privacy without proving that added exposure improves security. Certainly, absolute privacy can obstruct legitimate investigations. Despite that, the benefit does not settle the policy question. The criteria should be explicit and applied consistently across threats and investigations. Overall, advocates of expansion still bear the burden of proving that the risks are manageable.

S1 Privacy should be protected even when broader surveillance promises greater security.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because private space is necessary for thought, association, and opposition to authority.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, mass data collection can expose innocent people without demonstrating that it prevents harm.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Mass collection weakens privacy without proving that added exposure improves security.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, absolute privacy can obstruct legitimate investigations.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the benefit does not settle the policy question.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across threats and investigations.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Overall, advocates of expansion still bear the burden of proving that the risks are manageable.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反対側の便益も認めつつ、不利益の具体例から全面改革への慎重論を組み立てる。

MODEL C

98 words

Security measures should be targeted, time-limited, and independently reviewed rather than indiscriminate. First, public authorities need some power to investigate violence, organized crime, and immediate danger. For example, a warrant based on evidence may permit access to relevant communications in a kidnapping case. However, private space is necessary for thought, association, and opposition to authority. For instance, mass data collection can expose innocent people without demonstrating that it prevents harm. The strongest policy is to permit targeted, time-limited surveillance under independent judicial review and prohibit indiscriminate collection. This balance respects real differences among threats, investigations, and innocent citizens.

- S1** Security measures should be targeted, time-limited, and independently reviewed rather than indiscriminate.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, public authorities need some power to investigate violence, organized crime, and immediate danger.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, a warrant based on evidence may permit access to relevant communications in a kidnapping case.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, private space is necessary for thought, association, and opposition to authority.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, mass data collection can expose innocent people without demonstrating that it prevents harm.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** The strongest policy is to permit targeted, time-limited surveillance under independent judicial review and prohibit indiscriminate collection.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。
- S7** This balance respects real differences among threats, investigations, and innocent citizens.
射程確認。統合案が状況差を扱えることを短い一文で確認する。

答案の狙い 両論の根拠を対照し、実施条件・例外・検証方法を含む統合案へ収束させる。

ABSTRACT | 90-100 WORDS

規則と創造性

規則や制約があることは、創造性を高める場合があるだろうか。

ANSWER A

中心主張

Constraints can stimulate creativity by giving attention a clear problem to solve

主な理由

unlimited choice often produces hesitation, whereas boundaries encourage unexpected combinations

ANSWER B

中心主張

Creativity develops best when people can reject inherited rules

主な理由

major innovations often begin by questioning assumptions that define what is considered possible

ANSWER C

統合の方向

to use constraints as temporary tools that focus effort but remain open to challenge and revision

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

90 words

Constraints can stimulate creativity by giving attention a clear problem to solve. The main reason is that unlimited choice often produces hesitation, whereas boundaries encourage unexpected combinations. For example, a poet working within a fixed form must search for precise rhythm and language. The fixed form turns limitation into a precise search for alternatives. Admittedly, rules can become arbitrary and exclude promising possibilities. Despite that, this objection refines rather than overturns the claim, while remaining open to contrary evidence. Overall, the distinction remains useful once its limits are made explicit.

- S1** Constraints can stimulate creativity by giving attention a clear problem to solve.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that unlimited choice often produces hesitation, whereas boundaries encourage unexpected combinations.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, a poet working within a fixed form must search for precise rhythm and language.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** The fixed form turns limitation into a precise search for alternatives.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, rules can become arbitrary and exclude promising possibilities.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Despite that, this objection refines rather than overturns the claim, while remaining open to contrary evidence.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** Overall, the distinction remains useful once its limits are made explicit.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

97 words

Creativity develops best when people can reject inherited rules. This is mainly because major innovations often begin by questioning assumptions that define what is considered possible. For instance, a scientist may discover a new method only after abandoning a standard procedure. Innovation sometimes begins by treating a standard procedure as a question. Certainly, complete freedom can make evaluation and cooperation difficult. Despite that, the alternative still requires a wider definition. The criteria should be explicit and applied consistently across creative fields and stages. Overall, the alternative view exposes a limit that the initial definition cannot easily ignore.

S1 Creativity develops best when people can reject inherited rules.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because major innovations often begin by questioning assumptions that define what is considered possible.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a scientist may discover a new method only after abandoning a standard procedure.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Innovation sometimes begins by treating a standard procedure as a question.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, complete freedom can make evaluation and cooperation difficult.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the alternative still requires a wider definition.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 The criteria should be explicit and applied consistently across creative fields and stages.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Overall, the alternative view exposes a limit that the initial definition cannot easily ignore.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

91 words

Constraints should focus creative effort without becoming rules that cannot be challenged, under continued review. First, unlimited choice often produces hesitation, whereas boundaries encourage unexpected combinations. For example, a poet working within a fixed form must search for precise rhythm and language. However, major innovations often begin by questioning assumptions that define what is considered possible. For instance, a scientist may discover a new method only after abandoning a standard procedure. A sound approach is to use constraints as temporary tools that focus effort but remain open to challenge and revision.

- S1** Constraints should focus creative effort without becoming rules that cannot be challenged, under continued review.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, unlimited choice often produces hesitation, whereas boundaries encourage unexpected combinations.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, a poet working within a fixed form must search for precise rhythm and language.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, major innovations often begin by questioning assumptions that define what is considered possible.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, a scientist may discover a new method only after abandoning a standard procedure.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** A sound approach is to use constraints as temporary tools that focus effort but remain open to challenge and revision.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

中央集権か分権か

組織の意思決定では、中央に権限を集めることと、現場に権限を委ねることのどちらが望ましいか。

ANSWER A

中心主張

Centralized decision-making is useful when coordination and equal standards are essential

主な理由

one authority can allocate resources, respond consistently, and prevent units from working at cross-purposes

ANSWER B

中心主張

Decentralized authority usually produces more responsive decisions

主な理由

people close to a problem can adapt quickly and test different solutions

ANSWER C

統合の方向

to centralize goals, rights, and emergency coordination while delegating ordinary implementation to informed local units

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

96 words

Centralized decision-making is useful when coordination and equal standards are essential. The main reason is that one authority can allocate resources, respond consistently, and prevent units from working at cross- purposes. For example, a disaster headquarters can direct transport and medical supplies across several regions. Central command coordinates scarce resources when separate regional choices would conflict. Admittedly, central leaders may lack local information and react slowly. Despite that, the first priority survives the stated objection. Beyond the current case, the early judgment should remain provisional. Overall, the first alternative deserves greater weight in most ordinary cases.

- S1** Centralized decision-making is useful when coordination and equal standards are essential.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** The main reason is that one authority can allocate resources, respond consistently, and prevent units from working at cross- purposes.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For example, a disaster headquarters can direct transport and medical supplies across several regions.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Central command coordinates scarce resources when separate regional choices would conflict.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。
- S5** Admittedly, central leaders may lack local information and react slowly.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** Despite that, the first priority survives the stated objection.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** Beyond the current case, the early judgment should remain provisional.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Overall, the first alternative deserves greater weight in most ordinary cases.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

93 words

Decentralized authority usually produces more responsive decisions. This is mainly because people close to a problem can adapt quickly and test different solutions. For instance, a school may adjust support to its students more effectively than a distant ministry. Local authority can tailor support and learn quickly from the result. Certainly, local discretion can create inequality and duplication. Despite that, the second priority survives the stated objection, with room for individual exceptions. Beyond the current case, the early judgment should remain provisional. Overall, the second alternative deserves greater weight in most ordinary cases.

S1 Decentralized authority usually produces more responsive decisions.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because people close to a problem can adapt quickly and test different solutions.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a school may adjust support to its students more effectively than a distant ministry.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Local authority can tailor support and learn quickly from the result.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, local discretion can create inequality and duplication.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 Despite that, the second priority survives the stated objection, with room for individual exceptions.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Beyond the current case, the early judgment should remain provisional.

条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。

S8 Overall, the second alternative deserves greater weight in most ordinary cases.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

92 words

Goals and emergency coordination can be centralized while ordinary implementation remains local, as conditions change. First, one authority can allocate resources, respond consistently, and prevent units from working at cross-purposes. For example, a disaster headquarters can direct transport and medical supplies across several regions. However, people close to a problem can adapt quickly and test different solutions. For instance, a school may adjust support to its students more effectively than a distant ministry. A workable balance is to centralize goals, rights, and emergency coordination while delegating ordinary implementation to informed local units.

- S1** Goals and emergency coordination can be centralized while ordinary implementation remains local, as conditions change.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。
- S2** First, one authority can allocate resources, respond consistently, and prevent units from working at cross-purposes.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。
- S3** For example, a disaster headquarters can direct transport and medical supplies across several regions.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S4** However, people close to a problem can adapt quickly and test different solutions.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。
- S5** For instance, a school may adjust support to its students more effectively than a distant ministry.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。
- S6** A workable balance is to centralize goals, rights, and emergency coordination while delegating ordinary implementation to informed local units.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

S5 Admittedly, mere presence does not prove attention or learning.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the expected gains still justify a controlled trial, under continuing public review.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Accordingly, careful implementation is more persuasive than abandoning the proposal.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 具体例の含意を明示し、譲歩を実施条件へ変えて、賛成論を限定付きで結ぶ。

MODEL B

98 words

University students should normally be assessed by demonstrated learning rather than attendance. This is mainly because adults need flexibility to manage health, work, and different methods of study. For instance, a student may master recorded material independently and perform excellent analytical work. Demonstrated mastery can be genuine even when learning occurs outside the room. Certainly, frequent absence can weaken collaborative courses and professional habits. On balance, the benefit does not settle the policy question. The balance may reasonably differ across courses and students. Accordingly, advocates of expansion still bear the burden of proving that the risks are manageable.

- S1** University students should normally be assessed by demonstrated learning rather than attendance.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because adults need flexibility to manage health, work, and different methods of study.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, a student may master recorded material independently and perform excellent analytical work.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

25点の採点基準

項目	見る点
内容・論理 10	問いに答え、理由と具体例が主張を支えているか。
構成 5	主張→理由→例→結論が自然につながるか。
文法 5	主語・動詞、時制、冠詞、単複、修飾関係が正確か。
語彙・表現 3	文脈に合う動詞・連語を用い、不必要な反復を避けたか。
自然さ 2	英語として読みやすく、極端な直訳がないか。

自己添削：最初と最後の文だけを読んで主張が一致しているか、各文の先頭を追って論理の流れが見えるか、具体例が理由の説明になっているかを確認する。

ABSTRACT | 90-100 WORDS

信頼できる社会

社会が信頼に値するためには、何が必要だと思うか。

ANSWER A

中心主張

A trustworthy society requires institutions that explain decisions and correct mistakes

主な理由

trust grows when rules are predictable, evidence is public, and powerful actors can be challenged

ANSWER B

中心主張

Trust depends primarily on relationships and shared norms rather than formal transparency

主な理由

people cooperate when they expect honesty, reciprocity, and concern from those around them

ANSWER C

統合の方向

to combine accountable institutions with everyday habits of honesty, reciprocity, and willingness to repair harm

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

A trustworthy society requires institutions that explain decisions and correct mistakes. The main reason is that trust grows when rules are predictable, evidence is public, and powerful actors can be challenged. For example, an agency that admits an error and publishes a remedy may deserve more trust than one claiming perfection. Admitting error can strengthen trust because correction is visible and testable. Admittedly, constant suspicion can weaken cooperation even when institutions behave well. On balance, this objection refines rather than overturns the claim. Accordingly, the distinction remains useful once its limits are made explicit.

S1 A trustworthy society requires institutions that explain decisions and correct mistakes.

立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that trust grows when rules are predictable, evidence is public, and powerful actors can be challenged.

中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, an agency that admits an error and publishes a remedy may deserve more trust than one claiming perfection.

具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Admitting error can strengthen trust because correction is visible and testable.

例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, constant suspicion can weaken cooperation even when institutions behave well.

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, this objection refines rather than overturns the claim.

再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Accordingly, the distinction remains useful once its limits are made explicit.

結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 概念を一つの基準で定義し、具体例・反例・限定を通して定義の有効範囲を示す。

MODEL B

97 words

Trust depends primarily on relationships and shared norms rather than formal transparency. This is mainly because people cooperate when they expect honesty, reciprocity, and concern from those around them. For instance, neighbors may support one another during disaster before any official system responds. Reciprocity enables action before formal procedures can organize a response. Certainly, personal trust can protect insiders and exclude outsiders. On balance, the alternative still requires a wider definition. The criteria should be explicit and applied consistently across institutions and relationships. Accordingly, the alternative view exposes a limit that the initial definition cannot reasonably ignore.

- S1** Trust depends primarily on relationships and shared norms rather than formal transparency.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。
- S2** This is mainly because people cooperate when they expect honesty, reciprocity, and concern from those around them.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。
- S3** For instance, neighbors may support one another during disaster before any official system responds.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。
- S4** Reciprocity enables action before formal procedures can organize a response.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。
- S6** On balance, the alternative still requires a wider definition.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。
- S7** The criteria should be explicit and applied consistently across institutions and relationships.
条件整理。適用範囲・例外・評価時点を加え、主張の言い過ぎを防ぐ。
- S8** Accordingly, the alternative view exposes a limit that the initial definition cannot reasonably ignore.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 反例から最初の定義の不足を示し、概念を別の側面まで広げて捉え直す。

MODEL C

94 words

Trustworthy societies combine accountable institutions with habits of honesty, reciprocity, and repair. First, trust grows when rules are predictable, evidence is public, and powerful actors can be challenged. For example, an agency that admits an error and publishes a remedy may deserve more trust than one claiming perfection. However, people cooperate when they expect honesty, reciprocity, and concern from those around them. For instance, neighbors may support one another during disaster before any official system responds. In practice, we should combine accountable institutions with everyday habits of honesty, reciprocity, and willingness to repair harm.

S1 Trustworthy societies combine accountable institutions with habits of honesty, reciprocity, and repair.

統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, trust grows when rules are predictable, evidence is public, and powerful actors can be challenged.

根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, an agency that admits an error and publishes a remedy may deserve more trust than one claiming perfection.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, people cooperate when they expect honesty, reciprocity, and concern from those around them.

根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, neighbors may support one another during disaster before any official system responds.

具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 In practice, we should combine accountable institutions with everyday habits of honesty, reciprocity, and willingness to repair harm.

統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二つの定義が捉える価値を分け、両方を含む操作的な定義へまとめる。

COMPARISON | 90-100 WORDS

深さか幅か

教育では、少数の内容を深く学ぶことと、多くの内容に幅広く触れることのどちらを優先すべきだと思うか。

ANSWER A

中心主張

Education should prioritize depth because deep learning develops transferable habits of thought

主な理由

students who examine one question carefully learn to define terms, test evidence, and revise conclusions

ANSWER B

中心主張

Breadth should come first because learners need a map before choosing where to go deeply

主な理由

exposure to different subjects reveals interests and prevents one framework from appearing universal

ANSWER C

統合の方向

to provide broad exploration early and require progressively deeper study as learners develop interests and methods

注意

両論を並べるだけでなく、どの条件で何を優先するかまで示す。

設問処理のポイント： 問いに含まれる語を自分なりに定義し、主張の範囲を限定する。90-100語では理由を増やしすぎず、中心理由1つと具体例1つを深く説明する方が論理が明確になる。

MODEL A

94 words

Education should prioritize depth because deep learning develops transferable habits of thought. The main reason is that students who examine one question carefully learn to define terms, test evidence, and revise conclusions. For example, a close investigation of one historical controversy teaches more reasoning than memorizing many dates. One sustained inquiry trains methods that memorizing disconnected facts does not. Admittedly, narrow study may leave learners unaware of important fields. On balance, the first priority survives the stated objection, with room for individual exceptions. Accordingly, the first alternative deserves greater weight in most ordinary cases.

S1 Education should prioritize depth because deep learning develops transferable habits of thought.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 The main reason is that students who examine one question carefully learn to define terms, test evidence, and revise conclusions.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For example, a close investigation of one historical controversy teaches more reasoning than memorizing many dates.
具体例。場面・主体・結果を置き、抽象的な理由が現実にごく働くかを示す。

S4 One sustained inquiry trains methods that memorizing disconnected facts does not.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Admittedly, narrow study may leave learners unaware of important fields.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the first priority survives the stated objection, with room for individual exceptions.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Accordingly, the first alternative deserves greater weight in most ordinary cases.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第一の選択肢を原則とし、具体例と例外条件によって優先順位を明確にする。

MODEL B

90 words

Breadth should come first because learners need a map before choosing where to go deeply. This is mainly because exposure to different subjects reveals interests and prevents one framework from appearing universal. For instance, a student who encounters art, coding, economics, and biology can make a more informed later choice. Early breadth supplies the comparisons needed for an informed later specialization. Certainly, brief exposure may produce only fragments and slogans. On balance, the second priority survives the stated objection. Accordingly, the second alternative deserves greater weight in most ordinary cases.

S1 Breadth should come first because learners need a map before choosing where to go deeply.
立場提示。冒頭で判断を明示し、主張の強さと適用範囲を定める。

S2 This is mainly because exposure to different subjects reveals interests and prevents one framework from appearing universal.
中心理由。because / that節で主張を因果に展開し、次の具体例へつなぐ。

S3 For instance, a student who encounters art, coding, economics, and biology can make a more informed later choice.
具体例。場面・主体・結果を置き、抽象的な理由が現実はどう働くかを示す。

S4 Early breadth supplies the comparisons needed for an informed later specialization.
例の分析。事例から何が言えるかを明示し、具体例を主張へ結び直す。

S5 Certainly, brief exposure may produce only fragments and slogans.
譲歩。反対側の最も妥当な懸念を認め、答案の一面性を避ける。

S6 On balance, the second priority survives the stated objection.
再反論。譲歩を受けても自説が成り立つ理由・条件を短く示す。

S7 Accordingly, the second alternative deserves greater weight in most ordinary cases.
結論。新しい論点を足さず、冒頭の立場を限定付きで言い換える。

答案の狙い 第二の選択肢の強みを具体化し、第一の役割も残す比較答案を作る。

MODEL C

98 words

Education should begin broadly and demand increasing depth as learners develop interests and methods. First, students who examine one question carefully learn to define terms, test evidence, and revise conclusions. For example, a close investigation of one historical controversy teaches more reasoning than memorizing many dates. However, exposure to different subjects reveals interests and prevents one framework from appearing universal. For instance, a student who encounters art, coding, economics, and biology can make a more informed later choice. The strongest policy is to provide broad exploration early and require progressively deeper study as learners develop interests and methods.

S1 Education should begin broadly and demand increasing depth as learners develop interests and methods.
統合案の先出し。以下の両論がどの基準・方針へ収束するかを冒頭で示す。

S2 First, students who examine one question carefully learn to define terms, test evidence, and revise conclusions.
根拠①。First で一方の価値を示し、直後の具体例へつなぐ。

S3 For example, a close investigation of one historical controversy teaches more reasoning than memorizing many dates.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S4 However, exposure to different subjects reveals interests and prevents one framework from appearing universal.
根拠②。However で対立する価値へ切り替え、比較の軸を明確にする。

S5 For instance, a student who encounters art, coding, economics, and biology can make a more informed later choice.
具体例。抽象的な根拠を、主体・行動・結果のある場面に落とし込む。

S6 The strongest policy is to provide broad exploration early and require progressively deeper study as learners develop interests and methods.
統合。二つの根拠を具体的な配分・条件・手順へ落とし込む。

答案の狙い 二者択一にせず、段階・目的・状況に応じた使い分けの基準を提示する。

頻出コロケーション

study a subject in depth

語を一つずつではなく、この
まとまりで覚える。

develop transferable skills

語を一つずつではなく、この
まとまりで覚える。

examine evidence closely

語を一つずつではなく、この
まとまりで覚える。

社会的・抽象的な問題では断定の強さを調整する。

25点の採点基準

項目	見る点
内容・論理 10	問いに答え、理由と具体例が主張を支えているか。
構成 5	主張→理由→例→結論が自然につながるか。
文法 5	主語・動詞、時制、冠詞、単複、修飾関係が正確か。
語彙・表現 3	文脈に合う動詞・連語を用い、不必要な反復を避けたか。
自然さ 2	英語として読みやすく、極端な直訳がないか。

自己添削：最初と最後の文だけを読んで主張が一致しているか、各文の先頭を追って論理の流れが見えるか、具体例が理由の説明になっているかを確認する。

自由英作文の基本設計

主張は最初の一文で示し、理由は一つか二つに絞る。具体例は独立した飾りではなく、理由が現実
にどう働くかを説明するために置く。結論では新しい論点を追加せず、条件や例外を含めて主張を
再提示する。

練習方法：模範解答をそのまま暗記せず、主張だけを反対にしたり、具体例を自分の経験に置き換えたりして、同じ構文を
別の内容で使う。書き直した答案は24時間後にもう一度読み、不要な語と曖昧な因果を削る。

90-100語への調整

短すぎる場合は、理由の作用過程、具体例の意味、反対意見への譲歩を補う。長すぎる場合は、同じ意味の繰り返し、一般論だけの文、過剰な例を削る。語数を増やすためだけの空疎な文は評価を下げる。

練習方法：模範解答をそのまま暗記せず、主張だけを反対にしたり、具体例を自分の経験に置き換えたりして、同じ構文を別の内容で使う。書き直した答案は24時間後にもう一度読み、不要な語と曖昧な因果を削る。

最終チェックリスト

問いに直接答えているか。主張と結論が一致しているか。各段落・各文の役割が明確か。because と therefore を同じ因果で重複させていないか。可算名詞の単数に冠詞があるか。people, society, technology などの抽象語を具体的な動詞と結びつけているか。

練習方法：模範解答をそのまま暗記せず、主張だけを反対にしたり、具体例を自分の経験に置き換えたりして、同じ構文を別の内容で使う。書き直した答案は24時間後にもう一度読み、不要な語と曖昧な因果を削る。
