

Global Forum for High School Students in HINATA 2026

MSECフォーラム 英語発表部門

令和8年7月9日(木)

対面 & オンライン

実施要項

1 目的

高校生がそれぞれ取り組んできた成果発表の場であると同時に、SDGs に象徴されるグローバル・イシューについて議論する機会とする。この機会を通して、グローバル・リーダーに必要な社会課題の認識、思考力やコミュニケーションなどの汎用的能力、グローバル・マインドを備えた行動力を育成する。

2 開催日時

7月9日(木) 9:30~15:40

前日準備 7月8日(水)14:00~(15:30)

3 会 場

ひなた武道館での対面開催、Zoom を利用したオンライン開催のハイブリッド開催

4 参 加 者

① 発表者 19校(県内 13校、海外6校) 99発表(県内81発表 海外18発表)

約264名(県内208名 海外 56名)

五ヶ瀬中等教育学校 4発表 4名 (英語対面3・日英対面1)

延岡星雲高等学校 10発表 20名 (英語対面10)

延岡高等学校 1発表 1名 (日英対面1)

日向高等学校 3発表 7名 (英語対面3)

宮崎北高等学校 7発表 16名 (英語対面7)

宮崎大宮高等学校 12発表 76名 (英語対面12・オンライン12)

宮崎西高等学校 8発表 8名 (英語対面8)

宮崎南高等学校 1発表 2名 (日英対面1)

飯野高等学校 2発表 6名 (日英対面2)

小林高等学校 19発表 35名 (英語対面7・日英対面12)

都城泉ヶ丘高等学校 2発表 3名 (英語対面2)

都城西高等学校 4発表 10名 (英語対面1・日英対面3)

日南高等学校 8発表 20名 (英語対面8)

Chung Hwa College of Medical Technology(台湾 飯野高校の連携校)3発表 9名

Kasetsart University Laboratory School, Center for Educational Research and Development(タイ 宮崎北高校の連携校) 2発表 2名

Kaohsiung Municipal Kaohsiung Senior High School(台湾) 3発表 7名

Nguyen Tat Thanh Lower and Upper Secondary School(ベトナム) 3発表 10名

Cao Ba Quat Senior High School(ベトナム) 4発表 19名

Suankularbittayalai Rangsit School(タイ 延岡高校の連携校) 3発表 9名

② 準備・運営 宮崎大宮高校・宮崎西高校・延岡星雲高校・都城西高校

③ 審査員 宮崎大学所属留学生 20名

高校教育課および各学校所属 ALT 17名

④ 参加者 ひなた AL ネットワーク国内外連携校生徒・職員
ひなた AL ネットワーク事業協働機関関係者(大学関係者など)
保護者(英語発表のオンラインのみ)

5 内 容

- (1) 【対面】ポスターセッション 【オンライン】プレゼンテーション発表(ポスター、スライドいずれも可)
- (2) 研究交流会

6 日程概要

【前日(7/8)準備】

- (1) 関係職員集合 13:50
- (2) 会場設営 14:00～(15:30)
※宮崎大宮高校職員(4) 宮崎西高校職員(3)
※掲示 シート敷 パネル設置 オンラインブース設置 プロジェクター等設置など

【当日(7/9)】

- (1) 開会式(Opening ceremony) 9:30～9:45
- (2) セッション(Research Presentation) 12 ターム 10:00～14:05
オンライン 6ターム 12:25～14:05
- (3) 研究交流会 (Research Discussion)
オンライン 14:10～14:40
対面会場 14:40～15:20
- (4) 閉会式(Closing ceremony)
オンライン 14:45～15:00
対面会場 15:25～15:40

7 セッション(Research Presentation)の概要

① 発表について

対面発表(合計12ターム)と海外姉妹・連携校とのオンライン発表(午後のみ 合計8ターム)にて発表する。

- (1) 各タームは 発表7分 質疑応答5分 計12分 とする。
- (2) 各タームで発表する生徒は最大2名までを原則とする。
- (3) 対面の場合はポスターを利用して発表し、オンライン場合はポスター画像(動画の使用は原則不可)などを共有して発表する。手持ち資料による説明等は認めるが、設置する展示物の利用は認めない。
- (4) 【対面】と【オンライン】は以下のように設定する。

【対 面】 ターム1～12の中で指定した最大6タームで発表する。(日本語にも参加する場合は午前または午後のみ)

※発表していないタームは、原則、他の発表に参加する。特に研究交流会で同じグループになる発表には必ず参加しておくこと。

【オンライン】 ターム7～12で発表する。各発表の発表回数は1回。

Zoom(発表ルームA～E)にて発表する。合わせて会場もA～Eの5ブースを設置する。

※午後は【対面発表】と【オンライン発表】に分かれます。

※【オンライン発表】のメンバーは午前中のいずれかのタームで、オンライン発表のリハーサルを必ず行うこと。

① グローバル高校生フォーラム in HINATA 2026 特設サイト

<https://sites.google.com/g.miyazaki-c.ed.jp/global-forum-2026-students>

※ポータルサイトとして利用する。大会参加（発表・参加）はこのサイトより行う。

② グローバルイシュープレゼンテーション ※①からのアクセスができない場合に使用する

アドレス：<https://zoom.us/jc/92326056345>

ミーティング ID: 923 2605 6345

パスコード: msec0709

② 発表作品について

発表生徒が研究した内容に限ります。ポスターとする。

(1) 四六版(788mm×1091mm) または A0 サイズ 1 枚とする

(2) 以下の内容はポスターに記載しておくこと。

- | | | |
|-------------------------------|---|------------------------|
| ☐ タイトル | } | この3つはポスター上部
に記載すること |
| ☐ 高校名 | | |
| ☐ 発表者名 | | |

(複数の場合は全員分記載)

☐ 背景・目的 (研究背景の説明, 研究の目的と意義)

☐ 研究手法 (実験方法・調査方法)

☐ 結果・考察

☐ まとめ (結論)

☐ 引用文献, 参考文献リスト

(3) ポスター掲示の要領は日本語発表と同じとする。(指定のボードに長磁石を使って掲示する)

(4) オンライン発表にあたっては、該当箇所を拡大して示すこと

③ 聴衆としての参加について

(1) 発表していない生徒は原則として他の発表の発表に聴衆として参加すること

※同じグループの発表には必ず参加しておくこと!

(2) 聴衆参加に当たっての留意事項

・他者が不快に思うような言動は厳に慎むこと

×相手が嫌がることを言ったりしたりすること、×探究活動の交流会としてふさわしくない発言や行動

・多くの生徒が集まる貴重な機会なので“積極的に質問する”。

・コメントは、◎前向きな内容・表現、◎アドバイス、×研究と関係ない内容、×傷つける内容・表現

・写真撮影について・・・生徒は禁止

8 審査・表彰

審査員(宮崎大学留学生、ALT など)による審査を行う。 ※参加者による投票は行いません。

(1) 審査項目 別表

(2) 審査結果の通知

審査結果に基づいて、一覧にまとめたものはもちろん参加者がフィードバックに利用できるように、発表作品毎に審査結果および審査員からのコメントを記載した審査結果通知(Fig.2)を送付する。

(3) 表彰

審査員が入力した審査結果をまとめ、下記の基準で表彰作品を決定する。

□Gold Award(金賞):各学校の作品のうち上位 20%に含まれる作品 □Silver Award(銀賞):

各学校の作品のうち金賞を除いた上位 30%に含まれる作品

□Honorable Mention Award(奨励賞):残りの作品すべて

Global Forum for High School Students in HINATA 2023 Evaluation Results			
No.	101	School	Miyazaki Omura Senior High School
Title	How to intake black garlic efficiently		
Research Member	Demizu Hikari, Fujimoto Haremi, Fukushima Hinao, Hashiguchi Azuki, Momota Daichi, Nei Yuito, Yanagita Yuki		
Factors			
1 Background / Fundamentals (背景・基礎)	5points		
Sufficient knowledge about the research topic		5.2	/6
2 Purpose (目的・目的)	5points		
2-1 Clear definition of the purpose of the research		2.7	/3
2-2 Sufficient hypotheses		2.7	/3
3 Research method (研究方法)	6points		
3-1 Using research method for the analysis		2.6	/3
3-2 Valid methods for the purpose of the research		2.4	/3
4 Results and discussions (結果・考察)	6points		
4-1 Properly organized with a sufficient amount of data		2.8	/3
4-2 Considering logically based on research results		2.5	/3
5 Conclusion and perspective (結論・展望)	5points		
5-1 Clearly answer the research question based on the results and discussions		2.6	/3
5-2 Perspective that would be connected to the next research		2.6	/3
6 References (引用・参考文献)	5points		
References that are quoted from proper items such as books, research paper and web site are effectively cited.		5.2	/6
7 Design of the poster (ポスターの構成)	6points		
Legible design and caption		4.9	/6
8 Presentation and Q&A session (プレゼンテーションと質疑応答)	8points		
8-1 Appropriate voice volume and body language		1.9	/2
8-2 Answering the questions accurately		4.8	/6

Fig.2 審査結果通知

表 審査項目

1	研究の背景 Background / Fundamentals		
	研究テーマに関して、十分に理解をしているか Sufficient knowledge about the research topic	/6	
2	研究の目的 Purpose		
	2-1 研究の目的は明確であるか Clear definition of the purpose of the research	/3	
	2-2 仮説は提示されているか Sufficient hypotheses	/3	/6
3	研究手法 Research method		
	3-1 分析のために学術的な研究方法を用いているか Using research method for the analysis	/3	
	3-2 その研究手法は研究目的に合っているか Valid methods for the purpose of the research	/3	/6
4	結果、考察 Results and discussions		
	4-1 十分な量のデータを揃えて、適切に整理されているか Properly organized with a sufficient amount of data	/3	
	4-2 研究結果をもとに、論理的に考察しているか Considering logically based on research results	/3	/6

5	結論・展望 Conclusion and perspective		
	5-1 研究結果・考察をもとに、明確に研究課題に答えているか Clearly answer the research question based on the results and discussions	/3	
	5-2 次の研究につながる展望であるか Perspective that would be connected to the next research	/3	/6
6	引用・参考文献 References		
	書籍、論文、サイトなどを適切な出典から、引用して研究しているか References that are quoted from proper items such as books, research paper and web site are effectively cited.	/4	
7	ポスターの構成 Design of the poster		
	わかりやすいデザイン・キャプションであるか Legible design and caption	/6	
8	プレゼンテーションと質疑応答 Presentation and Q&A session		
	8-1 説明・質疑の声の大きさとボディランゲージは適当であるか Appropriate voice volume and body language	/2	
	8-2 質疑応答に的確に答えていたか Answering the questions accurately	/6	/8

9 研究交流会 (Research Discussion)について

【Online Research Discussion】 14:10～14:40 (30 分間)

- (1) 会場 オンライン(Zoom) ※配信会場は 2F 会議室
- (2) 参加者 & グループ A～E の5グループで実施する。グループは、県内高校と海外姉妹校・連携校の5～6発表の生徒と審査員 2 名で構成する。
- (3) 内容 まず、各研究グループの学生が Zoom の各ルームで 1 分以内に以下のテーマについて自身の意見を説明する。その後、約 20 分間、発表生徒、審査員で意見交換を行う。
※指定グループの参加者で交流する。グループの発表には必ず参加しておく。
※オンライン発表で使用したブースをそのまま使用する。

Discussion Group	Discussion Theme
A	Environment & Resource Circulation "Environmental Solutions Through Resource Utilization"
	This theme invites participants to discuss how local resources and scientific innovation can be used to solve environmental problems. The presentations in this group focus on water purification, wastewater treatment, phytoremediation, air pollution reduction, and the reuse of vegetable waste in construction materials. Participants will share concrete examples from their own research, regions, or countries, such as using natural materials to purify water, turning waste into useful materials, or reducing pollution in cities. Through these examples, the discussion will explore how resource circulation can help communities become cleaner, more resilient, and more sustainable.
B	Green Chemistry & Bio-Based Innovation "Building Sustainable Communities Through GX, Energy, and Environmental Technologies"
	This theme explores how communities can move toward sustainability through green transformation, energy cooperation, regenerative agriculture, carbon dioxide utilization, and advanced technologies. The presentations include composting chicken manure, using sound and microorganisms for regenerative agriculture, carbonic anhydrase for CO ₂ sequestration and utilization, cross-border electricity cooperation in East Asia, and AI-guided drug discovery. Participants will consider how different fields of science and technology can contribute to sustainable societies. The discussion will also focus on how local actions and international cooperation can work together to achieve carbon neutrality and resilient communities.
C	Food, Health & Local Resources "Creating Healthier Communities Through Food, Nutrition, and Local Resources"
	This theme encourages participants to discuss how food, nutrition, and local resources can improve health and quality of life. The presentations include the effect of cooking methods on vitamin C, the use of discarded Hyuganatsu citrus parts, nutritional changes in white radish sprouts, support for mountain communities, and a new iron chelator for anemia treatment. Participants will share ideas about how food-related research can address health, welfare, and community challenges. By connecting local products with scientific knowledge, this group will explore how food can become a key to sustainable and healthy communities.
D	GX, Energy & Sustainable Communities "Building Sustainable Communities Through GX, Energy, and Environmental Technologies"
	This theme explores how communities can move toward sustainability through green transformation, energy cooperation, regenerative agriculture, carbon dioxide utilization, and advanced technologies. The presentations include composting chicken manure, using sound and microorganisms for regenerative agriculture, carbonic anhydrase for CO ₂ sequestration and utilization, cross-border electricity cooperation in East Asia, and AI-guided drug discovery. Participants will consider how different fields of science and technology can contribute to sustainable societies. The discussion will also focus on how local actions and international cooperation can work together to achieve carbon neutrality and resilient communities.
E	People, Society & Future Well-being "How Science and Society Shape Our Future: Human Behavior, Inclusion, and Well-being"
	This theme focuses on people, society, and the future. The presentations deal with stress relief, time awareness and performance, digital peer pressure, inclusion, equality, and gender consciousness. Participants will discuss how scientific data, technology, education, and social awareness can help improve well-being and create fairer communities. The group will also consider how social problems are connected to human behavior and values. By comparing experiences from different regions and countries, students will explore how young people can contribute to healthier, more inclusive, and more understanding societies.

【対面による Research Discussion】 14:40~15:20 (40 分間)

(1) 会場 柔道場

(2) 参加者&グループ A~O の 15 グループ(予定)

グループは4~5発表の生徒、審査員1~2 名程度で構成する。

(3) 内容 ディスカッションのテーマは、以下に記載されている通り、「あなたの研究は、さまざまな分野や状況において、どのようにして優れたアイデアや有用な手法を生み出すのに役立つか」。20 分間のグループディスカッションでは、提示された 2 つの視点を参考にしながら、議論を進め、発表生徒、審査員で意見を交換する。

※指定グループの参加者で交流する。グループの発表には必ず参加しておく。

※対面交流とするが、宮崎大宮高校はオンライン交流にも参加する。

※発表した生徒は原則参加とします。

※各学校の先生方にも入っていただき、支援をお願いします。

Discussion Theme

"How can our explorations generate 'wisdom' and 'systems' that are useful in different fields and situations?"

Group	Perspectives of the Discussion Theme
A	1. From Local Ecological Knowledge to Transferable Environmental Methods How can ideas from research on abandoned fields, phytoremediation, soil microorganisms, or crop growth be applied to other regions facing land degradation, food production problems, or biodiversity loss? Participants can discuss how small observations about plants, soil, and ecosystems can become useful methods for agriculture, conservation, and community planning.
	2. From Agricultural Challenges to Smart Resource Management How can research on crops, land use, and environmental stress lead to smarter ways of managing local resources? Like studies on rainfall effects, tomato growth, or plant-based remediation, participants can consider how data and practical experiments can help communities choose better farming methods and prepare for climate-related risks.
	1. From Water Problems to Practical Purification Strategies How can ideas from water purification, splash prevention, marine protection, and iodine deficiency research be applied to protect water resources and human health in different communities? Participants can discuss how simple materials, local actions, and scientific measurements can become useful methods for solving water-related problems.
B	2. From Marine and Water Environments to Shared Community Responsibility How can research on oceans, cyanobacteria, sea urchins, or water quality help people recognize that environmental protection is a shared responsibility? Participants can discuss how local water issues connect to food, health, biodiversity, and sustainable lifestyles.
	1. From Waste to Value: Designing Circular Systems How can research on biodegradable materials, vegetable waste, PLA composites, upcycling, and GX help transform waste into new value? Participants can discuss how methods developed in one material or industry can be adapted to other wastes, products, or local industries.
	2. From Green Transformation to Local Industrial Innovation How can smart ideas about waste, energy, and materials contribute to local industries and community redesign? Participants can explore how environmental technologies can become not only scientific solutions but also economic and social mechanisms for regional revitalization.
C	

Group	Perspectives of the Discussion Theme
D	1. From Food Culture to Healthier Daily Choices How can research on ramen, local specialties, cooking methods, vegetables, or nutrition help people make healthier and more sustainable choices in daily life? Participants can discuss how food culture can be preserved while also improving health and reducing waste.
	2. From Local Food Resources to Community Well-being How can local food resources become tools for improving community well-being? Like studies on nutrition, local products, or children's food preferences, participants can explore how food-related research can support education, health, and regional identity.
E	1. From Food Innovation to Support in Special Situations How can ideas from disaster curry, low-GI foods, rice-ball projects, or space food be used in other situations where people need safe, nutritious, and encouraging food? Participants can discuss how food innovations can support people during disasters, illness, allergies, or isolation.
	2. From Personal Food Choices to Social Connection How can research on food preferences, local ingredients, or comforting meals lead to smart systems that connect people? Participants can explore how food can be more than nutrition: a tool for communication, mutual support, and community resilience.
F	1. From Learning Methods to Self-Management Skills How can research on English learning, study methods, time indication, exams, or peace education help students manage their own learning and growth? Participants can discuss how practical learning strategies can be applied not only in school but also in work, community activities, and lifelong learning.
	2. From Education to Peaceful and Inclusive Communities How can ideas from education and learning support a more peaceful and inclusive society? Participants can consider how methods developed in classrooms can influence communication, understanding, and cooperation among people with different backgrounds.
G	1. From Local Culture to Shared Regional Identity How can research on tourism, Kagura, tea ceremony, school image, or local attractions help communities rediscover their own value? Participants can discuss how cultural practices and local stories can become smart tools for education, tourism, and regional pride.
	2. From Local Promotion to Sustainable Community Systems How can efforts to promote a school, town, or tradition become systems that support sustainable communities? Participants can explore how communication, branding, and cultural exchange can connect local people with visitors and future generations.
H	1. From Disaster Research to Everyday Preparedness How can studies on evacuation-center sleep, disaster communication, torrential rain, landslides, or fire prevention equipment be transferred to everyday safety? Participants can discuss how disaster-related research can help communities prepare before emergencies happen.
	2. From Local Risk to Resilient Community Design How can understanding local risks lead to smarter community design? Participants can explore how data, communication tools, and local memory can support communities that recover quickly and protect vulnerable people.
I	1. From Mental and Physical Signs to Better Well-being How can research on illness, stress, scent, reading, periods, or lifestyle management help people understand their own physical and mental condition? Participants can discuss how small daily signals can become useful methods for improving well-being.
	2. From Personal Care to Supportive Health Systems How can individual health practices be connected to systems that support many people? Participants can explore how self-care, school support, family understanding, and community health services can work together.
J	1. From Communication Research to Inclusive Relationships How can research on listening, love, parenting, sports, or animal-related community events help people build better relationships? Participants can discuss how understanding communication and emotions can support inclusion in families, schools, and communities.
	2. From Individual Differences to Social Participation How can ideas from research on class, foreign relationships, or shared experiences help more people participate in society? Participants can explore how smart methods can remove barriers and create spaces where everyone feels welcome.

Group	Perspectives of the Discussion Theme
K	1. From Scientific Observation to Useful Measurement Systems
	How can research on programming, sound collection, radio waves, chemical patterns, or simulation become useful tools for measurement and prediction? Participants can discuss how scientific observation can lead to systems that help people understand complex phenomena.
	2. From Models and Mechanisms to Problem-Solving Ideas
	How can mathematical models, physical mechanisms, or information technologies be applied beyond their original topics? Participants can explore how one method, such as pattern analysis or simulation, can inspire solutions in education, design, safety, or industry.
L	1. From Experimental Findings to Sustainable Technologies
	How can experiments on germination, lichens, pH, microbial electricity, or sound effects on bugs lead to technologies that support sustainability? Participants can discuss how basic experiments can become useful methods for energy, agriculture, space, or environmental management.
	2. From Extreme Conditions to Future Adaptation
	How can research on Mars-like environments, microorganisms, or chemical conditions help us adapt to future challenges? Participants can explore how studying unusual or extreme situations can generate ideas for resilience on Earth.
M	1. From Local Bio-Resources to New Community Value
	How can research on onions, menma, chicken manure, non-standard vegetables, or herbs create new value from local biological resources? Participants can discuss how familiar materials can become tools for health, industry, tourism, or environmental improvement.
	2. From Natural Functions to Practical Design
	How can natural functions such as odor control, flavor, plant activity, or microbial effects be turned into practical designs? Participants can explore how observing nature carefully can inspire products and systems that improve daily life.
N	1. From Health Behavior to Lasting Lifestyle Change
	How can research on picking up trash, memory and exercise, lung transplants, confidence, or exercise and health support long-term behavior change? Participants can discuss how small actions can become habits that improve personal and community health.
	2. From Cognition and Body to Smart Self-Management
	How can understanding the relationship between the body, mind, and perception help people manage themselves better? Participants can explore how data about exercise, confidence, memory, and health can become practical tools for decision-making.
O	1. From Creative Curiosity to Future-Oriented Ideas
	How can research on unique topics such as agriculture on the moon, card castles, kendama, romance, or original local projects generate ideas for future society? Participants can discuss how playful curiosity can become a source of innovation.
	2. From Unusual Perspectives to Useful Methods
	How can looking at familiar things from unusual perspectives lead to smart methods in design, education, entertainment, or future living? Participants can explore how creative research can open new ways of thinking across different fields.

| ☐ 審査用ファイル | |

② 会場レイアウト 下図

・両面にポスターを貼る ・ポスター間隔は横 3m、縦5m

③ 発表生徒の荷物は、柔道場の観客席の指定場所に置く。

※宮崎大宮高校の生徒は、副道場に荷物を置く

④ ターム12終了後、ポスターおよびパネル(搬出口へ移動)を撤去する。

グループの札を配置するなど研究交流の準備を行う。
